I Give Praise to God Almighty Creator of the Universe.

Preface

I am sending you a messenger. His name is Jeffrey. You should listen to what I have told my messenger, for this is an account of mankind. In the first days of life, I saw that there was a problem, a problem with what I had created. This problem was greed. Mankind needs to have more of everything - more water, more food, more clothing, more money. Other animals don't. They need more food, more water, but they are happy with whatever they receive while mankind is not happy with whatever he received. The reason I am sending you my messenger Jeffrey is that it has come time to prepare yourselves for the end. When I tell you that it is the end, I should clarify - the end of this life on this planet. In the end will come a new beginning, a beginning only for those of you who have chosen to believe in me. I send this message not out of hate but out of love, love for all that I have created, but mankind, the lowest of what I have created, has destroyed not only what they created, but more importantly what I created. I send this message from my soul - the soul of God is telling you to stop what you have done now. Stop the wars, stop the killing, stop destroying my planet, stop hating one another, stop hating yourselves.

In this book you will learn what I have done, what I should have done, what I will do...

Message 1

Let's start by telling mankind the story of life. On the day the Earth was created, we sent you three things. These things were life, air, water. We were happy to do so because you were our creation. In time we sent you more things - things that we knew you needed to have: fire to cook with, to keep warm with. Once again, we did these things because we loved you. All that we asked was that you loved us back. Now let's move forward to people. People began to see that there were places they needed to live in. Some places were better than others; some places were not as good. This is how the first of the most destructive events began to happen, war. Man saw that others had a better place to live so they would attack one another. This displeased God very much. We attempted to intercede, but in the beginning, man would not listen to what we told them, just like today. Days have passed, days have passed and still man continues to show that they know better than God. In time, man was given even more things trying to show them that there was a God, that God was superior to them, but once again man thought that it was of his doing that only he could create what we had given him. We continued to work - continued to try to change what man was doing. We showed him that there was a God, that God had created the Earth, the stars, the universe, but man continued to ignore all of the signs. We showed him that the Earth was round, and yet man discovered the Earth was round. We showed him how to find gold, man discovered gold. We showed him how to hunt and fish, but man discovered how to hunt and fish. We have been a part of all man's existence since creation, and yet mankind feels that they are all there is.

God created the universe - not only this planet but all planets. God sent you messengers and yet they were ignored. Man has told God that he knows better, not God. God is sending yet another messenger. This messenger is here once again, but this time God's messenger is here to tell mankind that the end is near, that the destruction they feel they have created is not the only reason for their demise, but that of what all mankind has done, over all the years, not only these years. In your Bible you speak of original sin. What we are telling you is original fault. For the fault of mankind, you must pay. We ask that our believers convert, show others how to convert. This will not stop what will be, for what will be is to be. But mankind must show they have changed, even though your God knows that your change will not satisfy what has been.

We want mankind to understand that God is not only one part, one being, one object. God is universal. There is no beginning and there is no end. God is master to all races, to all religions, to all universes. God shows you that there is a God. You must not question what he or others have told you he is in existence that in time, mankind will see that not only God exists, but that God is coming, that God's son is coming, and that the end is near. We ask that at this time you show your God that you love him. Bow your head and tell him that you love him now. This is how easy it is to speak with God. You don't have to go anywhere special to communicate with him, for God is inside of all beings, not only earthly but heavenly also.

In time, man must understand that they are not the only ones. There are many forms of life, if you wish to call it that. Life comes in many versions. There are versions of physical and versions of metaphysical. There are forms of inter physical. Life is not only what you make of it but what God makes of it. There are souls, beings that surround all things, earthly and outwardly. We send you messages that, in time, mankind will understand that there is so much more that man must learn, but there is no time left for this to happen. God shows you the future, a future full of disturbing events, but these events must be, for it shows mankind that the end is near. Next we

will discuss the Creator and what we should understand about our God. God is a force, but most of all he is the only force. He was not created for he was always. He has given us the ability to think, but far more the ability to exist. We have been given everything we need to survive and to prosper in each of the planets. Your planet is Earth. There are many more planets that you have no knowledge of. I cannot tell you the names of these planets for if we gave you knowledge of these planets, there would be forces on your planet that would seek them out. This cannot be. On these other planets there are heavens. We call them heavens because there is no pain, no suffering, no strife, only love, peace, and happiness. These planets come and go as God wishes, but all exist in the realm of heaven. You cannot understand all that we tell you for this is all new. We send you these messages because God loves mankind, but you must all listen that what we tell you is not ignored but read and understood.

Message 2

God has told man what he wants from them. God showed them three signs that the end was near, and yet man continued to ignore what he was being told. The funny thing is that when God speaks, all of the universe listens. This is because God has this much power, and yet mankind finds it unable or unwilling to listen to what God tells them to do. We spoke of original fault. It is important for mankind to understand what is original fault. This deals with the faults of all mankind, not only your faults, but that of all mankind. It does not originate with Adam and Eve but with the first of many events that displeased God. These events started with the murder of Consta. He was a wise man who knew something about what God was telling mankind, but Consta was told to stop telling these stories or he would be killed. Consta continued to tell the story of God, so Consta was killed. This displeased God very much, so this was the first sin. As time went along, man continued to kill, kill not for survival but out of greed and rage. God was displeased by this, and as a result started original fault. There have been many since that have displeased God. Some are only a few that have truly displeased God. One was the killing of St. Francis de Maculate. St. Francis de Maculate was murdered for the same prophecies you are sharing - that of the end of time. He was tried as a heretic and was killed for telling this very story to mankind. This story must be told for it is an account of mankind from God. In the days leading to his trial, St Francis de Maculate was given a story, a story to share with mankind, but once he started to tell this very same story he was tried by the church and burned at the stake. He was murdered for telling God's story. Do you understand the meaning of this? One man telling a story that was so different from what mankind had been told that he would be tried and put to death for spreading God's word? This again displeased God. More was added to original fault. You must see that through the ages, mankind has always attempted to stop the spread of God's word, not because they knew better, but because mankind does not wish to be told what to do by anyone. The ages have passed, and still mankind has not evolved to where they should be.

God continues to spread this message - a message of love for his people, for his planet, for all beings, and mankind will continue to attempt to stop it from spreading. Now let's start to talk about the first of many acts that God was pleased by. The first was the creation of Anton. Anton was the child of Jamesa and Heron. Heron was the son of Fable. As Anton grew, he knew that there was something different about him. He could see things that others could not see. He could talk to others that others could not talk to. In the beginning, people were afraid of Anton because they feared what he would say. God began to speak to Anton, telling him of this story that you spread. However, this time Anton was allowed to spread his story simply because man was so afraid of him. They would not attempt to stop him. This pleased God, but like others this message went nowhere since no one would listen to what Anton spoke about. The message fell on deaf ears. God continued to tell mankind the story of life, the story of now, the story of the end, but mankind continued to ignore what God was telling them to do. As time went by, others pleased God. Another one was named Mary. Mary brought forth God's son Jesus Christ. Mary, like others, was afraid when God spoke to her. She felt alone and empty. God reached out to her and showed her that he was in existence. He asked her permission to bring forth his son Jesus Christ, and she gave it to God. The birth of Jesus Christ pleased God very much. With Jesus Christ he showed mankind that God does exist. Jesus brought to mankind many things: the story of his Father, the story of life, the story of the end of time. All these things were given to mankind by God's son, Jesus Christ, but like the other messengers this story fell on deaf ears. Mankind took what they wanted and discarded what they felt was too hard to understand. When

Jesus Christ was crucified, this displeased God very much. But because God loves mankind, it was allowed to pursue. The days went by and then God decided that mankind must be given a sign what Jesus Christ was, so God raised Jesus Christ from the dead and took him into heaven with him where he seats to this day. So it is. Mankind has been given many warnings that the end is near, but God loves mankind so much that he allows what is to be. It is not for man to decide when and where the end will happen. Only God knows, and only God chooses the end. It is not bad, for with the end will be a brand new beginning for mankind without the need for original fault for there will be no fault in heaven.

Message 3

In the days ahead, we have shown you many signs. These signs show mankind the end of time, but mankind must understand this is not of our doing, but of God. God wants his people to understand that there is more to life than simply them - that everything has a soul: trees, animals, plants. We show you this not to scare mankind, but to wake up mankind. To the realization that there is more to life than simply them. We hope that your future is full of love, hope, and peace, but if mankind has shown us anything it is that this won't be. In time mankind will see that there is more to life than the universe is full of life that stars, nebulas, show you that there is life. Mankind feels this need to discover other planets. We understand this because man is of these other planets. Mankind was developed not by us but by God. God shows all that will look what God is. God is a universal force, a universal force of power. Imagine putting all of your nuclear power plants together. This would create a great force. This is not even a tenth of what God's power is. God's power is unimaginable. Mankind questions the existence of God. This is something that mankind knows better for if they look, they will see that nothing just happens. That birth, life, death are all of God's doings.

In the beginning, God showed mankind that he existed. The first of men understood that God existed, but as time went by man started to forget what God had told him. He started to tell this story, but things in it changed. As the years went by more and more things changed in this story to the point that God was forgotten in it at all. People have always known that there was a God. In times, there was more than one God. God was not happy with this, but God pursued his truth with all people showing them that he existed. We continue to tell this story - a story of God's love for his people, but that people must open their eyes and see what God has given them, what God continues to give them, and what God will give them. God only asks that mankind show him honor, include God in their lives, to show God their love for him. Today man asks the same questions that mankind has always asked. Is there a God? God has shown them he does exist. Mankind has always asked when will the end be. God is showing mankind when the end will be. Mankind has asked is there a heaven, God will show mankind that there is a heaven, but only to those who have shown their love for God, who convert and include God in their lives.

God tells his people of his love for them in many ways, mostly through symbols - symbols that mankind cannot or will not understand. God has shown mankind three chances to change what will be: first was the channeling of Sigmund, the second was the channeling of Anton, and the third is your channeling. God is not unhappy with mankind, but God continues to remember original fault, that mankind has made many attempts to change what they have done, but unfortunately this does not affect the original fault. Mankind has thought that with the birth of Jesus Christ this changed the idea of original fault, but it did not change it. For God showed man that he existed with Jesus Christ but when Jesus Christ was crucified, God had to show mankind that he was God. Jesus Christ was God's son. Jesus Christ did die on the cross for mankind's sin, but Jesus Christ did not die on the cross for original fault.

I think we need to talk about Jesus Christ, his creations, his birth, his life, his loves, his death. God came to Mary and spoke with her like he speaks now. In the beginning, Mary was scared. She thought that she was going crazy, that she was possessed, but then God showed her who he was. That through their talks and love for one another, God would give her his child and that by doing so mankind would see that he did exist. During Mary's pregnancy she was ridiculed by many. She was made fun of, and called names by many, but Mary persevered because she knew

she carried God's son. When Mary gave birth to Jesus the heaven opened up, and God was pleased for he saw that his son was born. This made God very happy. Jesus Christ grew from a baby to a young boy. This is when God began to speak to Jesus Christ showing him and telling him of his Father. Jesus was proud that he was the son of God, but God told him not to be proud but be humble for with mankind he would have to show them of his existence. Jesus Christ was like most children, but he felt that things were always different. He knew because he was the son of God he would not have a life like most. he dreamed of the day he would get married, would have children, would become an adult. But Jesus Christ knew this was not to be for him because he was the son of God and knew that God would always be a part of his life. Jesus Christ began to spread the message of God's existence. He spoke with all that would listen to him. He loved all, and all loved him. People would come from all around the Middle East to see him, to be in his presence.

Many have said that Jesus Christ was not married. This is not true. Jesus Christ was married to Mary Magdalene. Their love for one another was as that for God. They loved one another and there is nothing wrong with loving one another for this is what God is calling all people to do. Mary Magdalene followed Jesus Christ as her husband. God was pleased with this for he knew one day they would have a child. This child would follow in his Father's footsteps spreading the message of God's love for his people. Then came the Apostles - the Apostles of Christ. These Apostles sent messages to the four corners of the globe professing Jesus Christ's love of his Father God, but in these messages they failed to speak of Jesus Christ's marriage to Mary Magdalene. This displeased God, for God knew like we all knew that his child would be forgotten. The child of Jesus Christ was given the same gifts as Jesus Christ was given. He could cure people of illness, cure the blind, make the mute speak, cure all diseases. Jesus Christ had the power, the power of health. His son Anton was also given this power. The reason Jesus Christ named his child Anton was that for the first pleased God, the first to carry the story of God to all mankind, Anton lived and died. He had children. These children do not live in the Middle East but in France. They are known now by other names, but they carry the succession to Jesus Christ.

Message 4

While Jesus Christ lived, man was happy and content. The wars of the past were of the past. Romans had conquered most of the civilized world. Herod ruled Jerusalem. He was a great man or at least he thought so. Men attempted to exert pressure on Herod to arrest Jesus Christ for telling stories that did not coexist with their beliefs. After enough time had gone by and Herod felt that his throne was at risk, he had Jesus Christ arrested. Jesus Christ continued to tell this very same story the story of his love for his Father God. Herod tried over and over to get Jesus to confess that it was all a lie, but Jesus would not confess to something he knew was truth. Herod promised Jesus that if he would confess that it was a lie, he would save Jesus from certain death, but Jesus would not lie, for Jesus Christ knew that his Father was God. Jesus was set upon the cross for the death of all man's sins, but God did not forget what had been done to his son Jesus. God to this day remembers what Jesus endured and has not forgotten what mankind did to his son. Still God loves mankind, but the original fault still stands. We show you this message not to scare you or confuse you but to show you that God remembers all. Mankind may forget names, places, ideas, concepts, but that God remembers all things and all people. God shows mankind that he is in existence that his son was sent to Earth to show mankind that he exists, and still mankind questions the existence of God. Does man truly think that he is superior to God? Man continues to work on rockets in an attempt to discover space, but man has destroyed this planet. Should God allow mankind to continue only to destroy other planets, other beings, other creations? God has shown man that he was not the only being in existence, and yet mankind has covered it up in an attempt to control the lives of its inhabitants. God shows you that there are other planets and yet you question his existence. God continues to ask man when will you honor me, when will you show me your love, but mankind ignores what God is calling all man to do.

Let's talk a little about another era in time, World War III. God is showing mankind that if you continue on your same course you will see the destruction of yet another generation of people that through man's own greed and hatred for all they will show the universe just how destructive they can be. Imagine a universe of beings surrounding your planet watching as events happen, not like judges for they don't judge you. They question only how much more pain can you endure. They show you a planet full of life, and you destroyed it. They show you world full of love and yet you killed it. In time, mankind will not have to answer more of God's questions for God is showing all that will listen what happens when you ignore him. We have shown you what would happen if you continued to ignore God, but still you question what would be. God is telling you know what will be in the days and weeks ahead for mankind will see that there is far more destruction on the horizon for mankind. Man will start yet another world war. This will make all other wars look like a pillow fight. Bombs and chemicals will be unleashed onto your planet, causing great death and despair. All will ask is there a God? We have told you and told you that there is a God - that he does exist. We have shown you signs, symbols, of his existence. Is there nothing that God can do to stop this from happening? But mankind knows the answer to this for it all goes back to original fault - that mankind as a whole has never asked for forgiveness. We may ask for forgiveness of original sin, for our sins, but have we ever asked for forgiveness of original fault? All must do so for it to happen. Even then, God will show all man his displeasure for what you have done. But God, all-knowing and all accepting, will forgive you, but you must first ask that it happen. One will not make a difference, for this is a fault of all mankind. It must be made by all mankind.

God has shown you a planet full of life, full of creations, full of everything needed for mankind to survive, but mankind has felt this need to destroy, to kill, to disregard the sanctity of all things. Has one never asked why this is? It is from original fault. Mankind knows in their heart that God is displeased with them, and in their own attempt to satisfy what God wants, they are attempting to kill everything so that nothing will be left for their own survival, thus creating their own death. For without water, without food, without air, there is no life itself. You must not allow greed and self-destruction to continue to rule your existence. Show God that you love him, love one another. Share his message of love, peace, joy, and happiness, and stop the destruction of your planet and all the life on it. Your God will show all what will be. God has always given man a path to follow. It was up to mankind to follow the path that God had laid out for them to follow. But mankind is at a point where there are no paths left. The only path for man to follow is the path that he has created himself, the path of selfdestruction. God will not have anything to do with it, for it is a path that mankind has brought upon themselves. God has shown you the light. Walk out of the darkness and into his light. Follow God into the light of heaven. Convert and show others the joy, love, and peace that is God. Mankind must turn from their ways. By doing so this will mean that mankind will have to make sacrifices, just as man should be making sacrifices for their God, showing others they mean more than one, helping the sick and poor, showing that God exists in all things, respecting all things, loving all things. Death for survival is not survival, for in the end will only result in death of one, death of others, and death for all. Murder is not justifiable in any form. God will not allow this. Death for justice is not justice. Death for freedom is not acceptable. But just as women kill unborn children, man killing men who kill unborn children is not acceptable for death begets death, life begets life. When will you understand that all has a cause and effect, that death only brings more death, life only brings more life, and love only brings more love. What you send out to the universe is what you will get back from the universe. Show God your love for him now. Bow your head and say thank you God the creator of the universe.

Message 5

God is sending messages to mankind at this time so that man will realize they are not alone, that there are others in the universe who watch what you're doing that God has told man, that they are not alone, that God's creations are not limited to this planet, but that God is not limited period. Man questions the existence of others when man already knows there are others in the universe that God is not limited to only this planet but all planets throughout the universe. Do you understand that we are telling you that there are others in the universe, planets full of life, like your own? God created all. Mankind must learn to coexist with all beings human, animal, alien, all creations. God tells you of a future full of pain and suffering, not to scare or hurt mankind, for God loves all, but God is trying to show mankind that they must learn to love one another, to bring peace to your planet, to love all things. People feel that God is separate, that he is not with you now and always. God is with you all at all times. God understands all things. God shows all that he loves them, but mankind has choices. These choices affect your own outcome, the outcome of others, and the outcome on the universe. God shows mankind that there are others from other worlds, but mankind has felt this need to hide, to put away those things that they know come from other planets. God shows mankind these things because he knows of their existence for he created them.

Did you know that mankind is the most destructive of all God's creations? Did you know that the destructiveness of mankind prevents it from being included in the fold of the universe that others are scared of what mankind has done, will do, and most likely has already done? There are many things that mankind has no knowledge of or refuses to accept knowledge of. There have been beings from other worlds visiting your planet since creation. These beings are not here to harm or hurt but have come for observation, to report back to God on what is going on. God is aware but just as many things, God wants independent verification.

I understand how hard this is to hear. People feel that religion is all they need, but religion is only a part of what you need. You must learn to accept things that you cannot explain. God shows you all these things hoping that you will learn from them, for they exist without the need of destruction, killing, hurting one another. When we speak of heaven, we speak of other planets, other worlds that exist in the here and now. They are in other solar systems, other galaxies, that mankind has been unable to find, for God will not allow these other galaxies, other solar systems to be found by man for mankind would only bring its destruction to them. This is a new story but only to mankind, for God has been sharing this message with man since the creation of all things. God has told mankind on many occasions. Jesus Christ spoke of these things, but the Apostles would not speak of it, for at that time they were unaware of even their own planet. You must learn to accept it for it is truth. God only tells you this so that you will learn that it is not only about mankind's existence, but that of the universe. Things are happening on your planet that may affect other planets. Your space station is only temporary. That in time when it begins to fall can affect this planet.

Mankind does not understand the universe enough to affect these things. God is telling mankind stay on your planet. This is how God wants it. God told man in the beginning you're given this planet to live and prosper. Do what you want on it, protect it for if it is destroyed so will your race be destroyed. God understands that mankind feels the need to discover, discover who and what he is to reach into heaven to learn about God, but mankind is not permitted to do this for mankind is not at the level that they should be to discover new worlds. Everything in the universe

is on steps, plateaus. Man has not reached to steps that would permit him to interact with other worlds. God is universal. He is all things all beings, all universes, for God created all things. People question his existence. Look to the stars. Where did they come from? God gave you those stars so that at night you could look to him. God is showing all man many secrets for in fact they are only the secrets man has created. God has been telling you these messages since creation. People act as if they are all there is that only they make the decisions of life and death, but this is not so. God does it. God chooses who and what, but mankind has started to act as if he were God, choosing who and what lives or dies. This cannot be, for God decides all things. Mankind must learn to accept the word of God, to accept that he is in existence that he is with you all at this time, in the past, and forever more

Message 6

It is important for mankind to realize that God has plans for them. These plans are for mankind to follow God's rules and God's laws. People must accept that there is a God, that he is the God of the universe, that more than just mankind pay respect to God, that others on other planets pay homage to him. There is only one God. He is the creator of the universe. He created mankind. He has created other beings in other worlds. Mankind must feel honored that God would include them, to accept them, for few do. When we speak of few, we mean very few, for mankind has been so destructive in their treatment of themselves, others, and most of all their planet. God has told you over and over that you must respect yourselves, others, and your planet. God shows you that in the future things will happen that will make all clear that they are not alone in the universe that God's creations on other planets are watching you, checking on you for, they question how much pain you can endure. God wants only the best for all his creations, not just mankind, but others. There is nothing wrong with wanting the best for yourself. This does not imply that you do not honor God, for God understands this. This is why God created these things. Only mankind found that some things were illegal. God created all things to be enjoyed. Only mankind would find something evil to make out of what God has created.

I think it is time for us to talk a little about evil. Mankind has been taught that there is a devil, that this devil is the devil because he was forced out of heaven for attempting to become God. This is not so. There has never been anyone or anything that has attempted to take God's place, for all know that God is God. God knows all things, so how could this be? We understand what mankind has been taught. There is nothing wrong with attempting to scare people into submission, but you must understand the truth. The truth is that there is evil, there has always been evil, but this evil comes from mankind, not from other worlds. God understands this need for mankind to be controlled by others, by religions, by faiths, but what God wants mankind to understand is that God has given us everything we need, everything: air, life, water, food, things of enjoyment, but that mankind unlike others has not realized that these are of God's doings, not mankind's. Mankind must understand that God does not expect you to honor him by sacrificing everything you have or by turning from things you enjoy. What God wants mankind to understand is that there are only a few things that God expects from his people. They must include him in their life. This means talking with him daily. This means when you see something of enjoyment, let God know this makes you happy. God expects you not to kill, for God is the only one who can decide who, what, when, and why someone should die. You should love yourselves, you should love others. Another one of God's rules is that you watch out for the sick. This means to take care of them, help them, provide food and substance when they need it. Another one is to watch out for the poor. This does not mean you have to provide them with a place to stay in your home, but it does mean you should offer them a place to stay in your house. You should offer them a job. You should help them if they have children. There are many things that you all know you could do and should do, but what God is telling you is you must do. There is only one God, God creator of the universe. You should put no one above God. You should pay homage to him. You should convert to him. This is done by raising your head to the sky and asking God to forgive you for all the things that you have done. This is all God is asking of his people. Mankind must learn to talk with God, tell them of their love for him, include them in their lives, make God a part of your life. God has given mankind so much to be thankful for. Is it not time to do so?

God is showing man signs of the future. Mankind must realize that the end is near. That all must convert if they wish to be with God. God shows all what the future holds - a future full of war, hate, killings, disease, and death. God continues to show you these signs not because you must come with him, but because he wants you to come with him. God wants only the best for his children. Fighting and wars have only brought destruction of your planet. God tells you so that you will listen to him. Stop the wars, stop the killing, and love one another. People have asked why would God allow these things to happen to mankind, but God does not allow this, mankind allows this. God has chosen not to intercede on your behalf because mankind must learn their lessons from all of this. In heaven, the angels and others have to learn lessons, just as mankind must learn lessons. In heaven, angels work day-to-day running heaven, but they also must learn lessons from their past lives. See even in heaven you must learn your lesson. God does this for all. It is called life, a progression from one plain to the other plain.

God does not expect mankind to understand the running of heaven, the existence of other plains, or the truth of people coming back to Earth. But God does not tell you this looking for acceptance, for God is telling you this so that you will understand you're not alone that you should be looking out for the others who surround you. Listen to the angels. The spirits are telling you what to do. Follow their guides for what they are showing you is what God is wanting you to do. Prayers are answered all the time from mankind. Who does mankind think these prayers are being answered by? God answers these prayers. God sends his messengers, and sometime God comes to visit you. You should all be praised that your God would do this for you, for all beings in all universes listen when God speaks. Continue to pray to God, continue to listen to his messengers, and continue to look to the future. It is your choice - will it be a future full of life, and love, and happiness, or will it be a future, full of war, death, and destruction? God loves you all and wants only the best for you. Praise your God at this time.

Message 7

I think that we should tell something about mankind. Mankind is made of molecules, DNA, protein, particles, but mankind is made of so much more. There is a spirit. This spirit is used in the place of the body. It is used to communicate with God. It is used when one passes away and crosses over. It is used to communicate with others. The spirit is used to find courage within yourself. It is used to commune with the one you love. It is used for many reasons, but the most important of all uses is to communicate with God. God shows man that they have a spirit. At birth, men and women are given three things: physical body, mind, spirit. This is what God gives to man. Man has been given these things by God because God loves you that much. God has shown man that and so much more. To use the spirit takes time. Some men never learn how to use their soul to communicate with God. Others find the use only when facing death. The soul is a useful part of one's life, for with it comes a responsibility not to use the soul for the wrong reason. Did you know that people can use their soul for the wrong reason - that some find other uses for it, such as hate, fear, and yes, even death. God is displeased by other uses than what he has told mankind to use it for.

I feel that we should spend some more time on the devil. I think it is important for mankind to understand that there is evil, that evil is around all at any time, but that does not mean you should be scared of evil, for what evil is, is uneducated. Evil feeds on negative. Everything has negative energy, but when there is more negative around than positive energy, this is where evil forces get their energy from. It is important for mankind to realize there is no devil. The devil is made for what the devil represents: negative. God is of the light. He is surrounded by the light of his love for the universe, and that through this light all are whole and clean. Nothing evil can enter God's loving light. That is why it is important to ask those around you, do you believe in God? If they say yes, they are good spirits. If they say no or refuse to answer, then they are negative and should be told to leave your home, leave you, or others. You must not become negative for this only gives them more power. Show them your light - the light from God. Spread the light to them. Tell them to enter God's loving light or leave God's loving light. Ask for forgiveness for yourself and for them. Evil is evil because no one has ever done good to them. Show them your love for God. Spread your love for God to them.

It is important for mankind to understand that all is a cause and effect. There is positive energy God and negative energy evil. All is here for a reason. What we attempt to do is show mankind that positive is needed more than negative. Mankind has created his own negative world, a world full of destruction, wars, hate, pain, suffering. God wants things for his planet. He wants things of beauty, happiness, joy, love for these things are more important than negative. It is important for mankind to understand that there are people who feed on negative. These people, unless they change their ways, will become evil, here and forever. Do you understand the importance of positive thinking, positive actions, positive people? All of mankind has evil in them. It is a part of what makes mankind: negative and positive energies, but what happens to mankind is that some, not all, become more negative than positive. This is what feeds evil. Mankind must learn to think positive, be positive, show positive. Some feel that this is all smoke and mirrors, but God has told mankind this since creation. That God has shown mankind this throughout time. By showing God your love for him, you are spreading hope and love throughout this negative planet, so in actuality you're spreading a positive energy throughout your world and making the negative

forces weaker. There is no battle between the negative and positive world, for both are needed, God understands this and accepts this. Mankind must learn to accept it. That being said, negative should not be allowed to take over one's life. They should not be allowed to live with you, for they are negative and can cause harm. There are places for negative to coexist, just not with God's children.

Message 8

In days gone by, God talked with his people. He explained to them the need to respect each other, to love one another, to love one self, to love their planet, to love God. As the days went by, mankind felt that they no longer needed to include God in their day-to-day life. They should only include God on special occasions. In the beginning, God understood. Mankind was busy trying to find food and keep warm, but as the days and, yes, centuries went by, mankind stopped even doing that. God was left out of the equation. God once again was only spoken with at the greatest of times: birth, death. God wants his people to include them in their life, to talk with him daily, to include God when things make you happy, not just sad. God has shown mankind great things in the future, things of the past, but in all of these great things you must include God. Perhaps at this time we should talk a little about other worlds, others of God's creations. There are many planets in this solar system. This is only one small solar system. Imagine a universe filled with millions of solar systems, not just one or two or 100. Now in each of these solar systems there are, let's just say, ten planets. Can you begin to see the vastness of the universe? God has created all of these universes, not just yours, not just 100, but all things, beings, worlds in the universe. God's power is this great that when God speaks, all the universe stop to listen to what God is saying, not out of duty but out of respect. Now can you see the differences between your world and other worlds? In your world God must ask to be included, to be spoken to, respected, and, yes, loved, but in other worlds God only has to speak. In the future, things will change. Events will happen. People will be born. People will die, but your God will stay the same, loving nurturing, holding his children.

It is important for mankind to stop reaching for the stars, not because you're not able to do so but because God does not want it. You have brought so much pain and sorrow to this planet. What will you do to the next planet? God will not permit this. Do you understand what we are telling you? You went to the moon, and look what you left. Look around your planet and see the trash and junk that you have littered the stratosphere with. This is your home. Is this how you want to leave it? God must put a stop to mankind's need to destroy all that it touches. God has shown you a future full of despair, pain, suffering, and yet mankind will not ask for forgiveness from their God. Mankind will not have long to question what is happening to their planet for God has told you what is happening. You must learn to accept the things that you cannot understand, see, feel, smell, touch. These things are in existence because God created them. You are being asked to stop the destruction, stop the hate, stop wars, stop killing, and turn to love, for love is the only answer to what you bring to this planet. God has told you that there is a cause and effect for everything - that includes the destruction of your planet. If you turn to love and acceptance of all, your destruction will cease, but if mankind continues on its historic way of destruction, this will spell the end for mankind. God is telling you this not to scare mankind or to fear God, but to show mankind that this must stop and now. Raise your heads to the sky and ask your God for forgiveness for all that you have done and all that others have done.

I think we should spend some time talking about God. What is God? God is a force - all-knowing force, all-seeing force. From God all is created, from God all is eliminated. For it is God's will that everything happens. People have always questioned the existence of God, people who felt that they were all power and all force, but what people have always failed to realize is that God is more than just power. He is both positive and negative, somewhat like your batteries. Since he creates all things he also creates negative. this must be emphasized that God is not negative, but that some of the energies emitted by God are indeed negative. What mankind must realize is that

God is positive, but like in all matters there is a positive and negative aspect. We have spoken of negative forces on this planet. What mankind must understand is that there are negative forces in everything. This is the true building blocks of the universe, negative, positive. But just as a regulator regulates voltage, mankind must regulate itself. At this time in history of mankind, there is too much negative energy surrounding your planet. The only way you can regulate it is to increase the amount of positive energy being created. This means love, peace, joy, and happiness must become the norm. Mankind's greed must be placed in the back of the heart and not in its present location at the front.

It is time to talk about the animals of your planet. The animals have been placed on your planet for many reasons. Some bring joy, some food, some warmth, others medicine, but just like mankind all things have a reason for existence. The animals like all things must be protected and not hunted to extinction. Did you know that mankind can talk with the animals? Animals like man have a soul. This is how you talk with them. Use your soul to communicate with them. Talk to them. Ask them how they're feeling - are they happy? See what response you get by doing this. Remember to talk from your soul.

Message 9

In time, there have been many who have professed the faith of God, but one must realize there is only one faith of God, and that is God. Mankind must understand that Jesus Christ was a messenger of God. he is not God. He is the son of God. God wants his people to remember that God is the first of all and the only. Jesus Christ should be prayed to though, but mankind must understand that God is the only answer. God wants no one above him. Jesus Christ professed a faith, the faith of his Father. This faith is all that mankind should follow. Others have made a life of professing God to mankind, but mankind must understand the only one they need is God and that God is in each of you. You must ask God for what you need. Jesus Christ professed to all who would listen about his Father that he is all and only, but the Apostles felt a need to make Jesus Christ more - not that he wasn't all there was at the time. Nevertheless, Jesus Christ was the son of God, but he was also a messenger. The messages that Jesus Christ brought to man have been forgotten, changed, altered, not for the benefit of God, but for mankind. This cannot be, for God is the only one who has the right to change his laws. There are so many things that have been left out, denied, refused, and unaccepted that Jesus Christ spoke about - things that his followers did not understand. Mankind must understand that this is not an attack on Jesus Christ, for there is no reason to do so. He is God's son. Jesus Christ spoke of healing yourselves, about the poor, about the sick, about wars, hate, killing. He spoke about other worlds. He spoke about other beings, but all of these things were never mentioned again. Things that Jesus Christ spoke about are things that God has created for not just mankind but for the universe. Mankind cannot simply strike out the things it does not choose to accept or acknowledge, for all these things are from God. There has been much talk about God, who, what, if, but mankind does not need faith to see that there is a God, for all mankind must do is look around. How did these creations happen? Were they mistakes? Are you a mistake? Things simply don't happen for no reason. They happened by something, not just a mistake or accident. God is around you now, then, in the future, and always, for God is in everything you see, touch, smell, feel. I think it is time to talk about death. Mankind feels that this is it, the end, the finish, but mankind could not be further from the truth. When your body dies, your soul begins to live. People are aware of the soul. They have been taught throughout the ages that they have a soul. The problem is that no one has ever told them the reason for their soul. Yes it is there to communicate with God, but it is also there to communicate with other beings, other souls, other animals. Many will find this hard to understand but this life you're living now is only preparing you for your true life without your body. Only souls that are ready to cross over are permitted to do so. If you die without adequate preparation, your soul will not be permitted to cross over. To many this will sound harsh; it is not meant to be so. It is the rule of the universe that for your soul to transition into heaven you must meet certain requirements. These include purity, love for God, acceptance of yourself, acceptance of others. These are only a few of them. Mankind must understand that there are many more. These are used to allow only selected souls to transition into heaven. When you are in heaven, you are allowed to do what you want, as long as it is what God wants. This may sound strange to mankind what God wishes is what all do. The interesting part is that souls do what God wants them to do without being told what to do. I think it is important for mankind to understand that God is not like anything you have ever thought about. It is impossible for mankind to fully understand what God is. The supreme power in the universe, all knowing, all seeing, is more than mankind can understand. Your God is not only your God, but he is the universal God. God reaches all the corners of the universe. With his love and beauty, all are whole. No one is left

here forever. It will stay here until it has learned the necessary things to cross over. If he needs love, he will stay until he finds love. If he has murdered, he will stay until someone says a prayer for him. There are many things. God is telling you this not because it is your business to know the order of heaven or to even understand God, but God is telling you this so that you will realize there is a God. Not only your actions affect you, but all of the universe. God has showed you the past. God has showed you the future. What more must God show mankind for mankind to understand that there is a God. Must God destroy large areas of your world? Must he kill millions? Must he shower your planet with asteroids to prove his existence? Faith is faith. You must believe that from within yourself there is a God, that he does exist, that your future is provided by God, that your existence is from God. Mankind will learn this maybe not this year, or 100 years, but there will come a day when mankind will have to make a choice to follow God and Jesus Christ into heaven or stay on this dead planet. Many feel that they have aided by their faith, believed in Jesus Christ, and that this is all they need, but God is telling you, you need more. You must have faith in God almighty, creator of the universe. That God is all anyone needs. To their life, Jesus Christ was God's son. He was God's son but you must know his Father.

Message 10

God is sending a message to his children that he loves you all, but what God is also sending in his messages is that the end is near. Mankind has seen, done, all too much. What God wants from his people is simple, he wants them to show love, love for one another, love for themselves, love for their planet, and love for their God. God is telling mankind this not because he wishes to cause fear or terror but because mankind must understand that there is a God, that he does exist, that he is showing that he exists. Mankind has set wars on his planet. They have killed their own family members. They have sinned, not little sins but the greatest of sins by using God's name to wage wars as far back as the crusades. Mankind has used his own means to wage war all in the name of God. God is displeased, but God has always allowed man the right to choice to make their own choice in hopes that mankind would choose God, but mankind has continued to make the wrong choices. In the future, mankind will not have the ability to make choices for they will be made for mankind. It is up to mankind if God makes these choices for you or others who mean evil. God has told you of wars that will affect the planet and mankind but God is also telling you of those who wish to bring evil to the planet men of many countries, but in the future this will not be for mankind will have given in to these men, these few who wish to control the world, not for God but for evil reasons. Mankind must be made aware of these events, for it will come in the guise of peace clocked in good but will be evil. If mankind chooses this form of peace, mankind will become slaves to the few, and God will be outlawed. This may seem impossible to many, but what have you given up in the name of security? What will you give up in the name of peace? God is telling mankind this not to challenge you but to show you there is a God and that he does know all.

You have already seen what is on the horizon, but did you know there are far worse things on the horizon. These few men think that they know what is best for the world. What is happening today in your capitals show these men the need for one great leader. This leader is the Anti Christ. This one great leader will challenge men to give up on faith. Executions will show the masses that religions must be abolished, done away with. There shall be no more faith, religions, or humanity. You watch as others take away your rights, your freedoms, and you question it when you should be fighting it with all you have. Don't allow the few to control the world, for from the few will come the one. You have seen what happens when all is controlled by one. Evil runs wild, peace becomes quiet, and death is heard over and over again. Men must understand that God is telling you this because this will be. This is not of God's doing, but mankind is leaning toward this. It is for your sake that you don't allow this future to happen, for if this future happens, mankind will become nothing more than slaves to the one. Mankind must understand that there is no set course, no set way that the future will be for mankind, and yes, God changes it daily, hourly, seconds, but this is life. The day will come when there is only one path left for mankind, the path that mankind has made for himself. In the path for the future, there will be no religion, no faith, no money, no freedom, only subservience to the one. This one will be the ruler of the world. Laws will be made by him, laws will be abolished by him, death will be made by him. People will live and die by him. he will be all that people will know. This will last 100 years. Mankind was told about this many times, but like all other stories read once then put down, people will learn if they follow on their same course. This story will have only one ending, that of the ending of mankind. Mankind must understand mankind will end. This will be, but it is of your choice which ending it chooses to take. Does it take the choice that God has given you or do you take the choice that mankind has given you? Either way, the end will be, but one is far

greater than the other. Mankind will find this hard to believe that the end will come, but all must see the writing on the wall for it is showing mankind the end. God has sent you messages. God has sent you messengers. God has told you repeatedly what will be. Mankind will have to accept what God is telling them - maybe not today, maybe not tomorrow, but the day will come for all.

God is telling mankind things. Let's talk about other great things. What would you say to the birth of Jesus Christ? People seem to think that Jesus Christ comes back to Earth. He will appear just as he left. This is not so. Jesus Christ will come as a baby - a baby who will become Jesus Christ. This will happen, this is planned, but the time God has not chosen. God is telling mankind that this will be. With this event, all mankind will be able to know for the day will be the birth of the new planet Orion. Mankind will know that Jesus Christ has been born by the birth of the new planet at which time all mankind is to bow their heads to the east and pay homage to the son of God. Mankind will know that this is happening for they will see a strange glow coming from the east. This glow will be the new planet forming. Mankind must rejoice in this for it will mean that the savior of the world has returned.

Message 11

We are going to talk a little about the future of the planet. In the days ahead, mankind will fight in wars. There will be destruction, there will be famine, there will be global warming, but mankind must understand that these are not of God's doing but mankind's. Mankind has begun to do things that are contrary to what God wants mankind to do. These things include but are not limited to your dependency on wealth, your need to have money, yours and others. There are other things such as gas, oil, stocks and bonds, things that have no value in heaven but only here on Earth. Mankind must understand that wealth is a superficial need. It is not a need that God gave you. God gave you the need for love, the need for food, the need for air, but not for wealth. In history, man was happy with food on the table, clothes on his back, and a family to love.

Today man is driven to have more, more of everything, more clothes, more music, more money, more home. Mankind must look around and see those who have nothing. Judge not those who have nothing, but judge yourself for having so much. Share what you have with others. There is no reward for having the most in heaven but only helping those who have nothing. Mankind will come to the realization that those who have nothing are living within their means. This may sound hard at present but you will realize that mankind will have to live with far less for what mankind has brought upon God's planet. Food, clothing, gas, oil will be things of the past. Man will live with little, just as God wanted mankind to live. God never intended that mankind would divide by class, or color, but by culture. That is why God placed each of you in a different part of the world. Yes, you were meant to talk with one another, share ideas with one another, and, yes, love one another, but you were never meant to live with one another. By living with one another, you have exposed yourselves to many new diseases, new cultural problems. This does not mean that you're not to love one another, just not live with one another. Mankind will see in the future that cultures were meant to be separate, not for the reason mankind thinks about but through procreation man has altered what God has created. Human amino acids have been altered. This will cause new diseases that mankind will not be able to fight. We are telling this to mankind because it is needed. Perhaps if your medical experts understand this, they will be able to fight these new diseases quicker.

Let's talk a little about mankind and their responsibilities to God. God placed mankind on this planet. Their creation by God was not by accident. It was done on purpose. God did not simply choose to place mankind on this planet out of necessity but out of his love. God saw there was a need for human beings. When we speak of mankind, what we are saying is that mankind is human being, but there are other beings on other planets. This is something that mankind will have to accept for it is truth. Human beings have been evolving since the first Adam and Eve for the simple reason there was no reason to call them anything. They are his beings. People feel that all mankind came from only two. This is simply not so. Mankind came from many human beings, created throughout the planet, each having its own microbiology system. Each was different - not in every way, but small ways. Mankind has to know this or you would all look alike, but this is not so. When mankind realizes that there is more than simply looking different. There are biological things that are different. Perhaps after mankind maps the DNA they will see the differences, but mankind is evolving very slowly. If you wish to speed this process up, you will have to accept things that have never been conceived before. Taking the same piece of paper and breaking it down to the smallest microbe, you will see that no two pieces of paper are the same, just like mankind, there are not two exactly alike. All particles are different. At this present time you are looking at human beings in the mirror. Now imagine looking at human beings in a

super microscope. You're going to see things that you never saw before. With time this will happen. Man will have to learn that there is so much more to man than simple DNA, but even atoms are different. As we have spoken before, you must break mankind down to positive and negative. These are the building blocks of the universe.

Message 12

In time, mankind will see the wisdom of God's way. There are many ways that God has showed mankind what will be, what is, and what was. God is telling mankind things that at earlier times he would not have been able to understand, just as in the future things will happen that man at this time would not be able to understand. God is telling mankind these things for a reason. With God all things have a reason, but with mankind most reasons don't exist. We have talked a little about Jesus Christ and the Romans. We have talked some about the Romans. Did you know of the Hebrons? The Hebrons were a group of Jews who lived on the outskirts of Tiburon. Tiburon was a community in eastern Israel. The Hebrons enjoyed grace with God. They shared their ideas with God and sought his wisdom. God was happy with this. Many men have sought God's wisdom, but few have earned it. The Hebrons existed with all as a peace-loving tribe. They understood what God wanted from mankind: they existed with others without the need for violence and hate, but as what happens with peace-loving people, they were destroyed by a band of rebels. These rebels sought what the Hebrons had – their money, their homes, their food. Unwilling to accept what the Hebrons gave them, they wanted it all. This is a lesson to mankind, for mankind like the rebels wants everything anyone has. Not happy with what they have been given, they insist on taking everything. Mankind must learn to accept what it is given, not what it wants but what God has given them.

Mankind continues to aim for the stars, seeking what others have, offering a peace branch to many but giving nothing in return. God will not allow this to happen, for mankind has not earned grace with God. Mankind seeks to find others, other planets, other beings, other civilizations, but God will not allow this to happen for one simple reason. Mankind has not earned grace with their God. God has showed them what will be if they continue on this same course for discovery. Mankind must earn the right to seek others by not destroying what it was given. God is telling you to look in other directions, look among yourselves, discover who and what you are before seeking out others who already know who they are. Mankind will not be permitted to find and discover new worlds, not until it has solved its own problems within themselves. God has told you not to do this. Mankind will be shown what happens when you deny God. God will have what God wants. It is not up to mankind to take away from God what he wants, for it is God who will take away from mankind what it has not earned. Look to the stars and see what will be, but if mankind aims for the stars, it will not be. God has told mankind not to do this. Mankind has been told not to do this. Mankind must listen to what it is being told. Destruction only begets more destructions. Planets begets more planets. God begets to no one. Mankind seeks to discover new worlds. This discovery will happen, then all will be lost, for what God has aimed for the stars told you must be heard. People have sought the stars for eternity, looking to the heavens to find God. God is not in the stars, for God is with each of you. He is in everything that is or will be.

God sent you his son Jesus Christ. We have spoken of Jesus Christ before. It is important that man understands that Jesus Christ was not a God. He was the son of God, just as all men and women are the children of God. This is not to say that Jesus Christ was not important to the development of mankind, for with Jesus Christ mankind learned there was a God, that he did exist, that he does exist. Mankind needs something to symbolize God, for by choosing Jesus Christ on the cross this symbolized God. But what many have done is to replace God with Jesus Christ. God wants mankind to understand that Jesus Christ was his son, as all are his children, but Jesus Christ was a messenger of God's. He was sent to Earth to show mankind that God does exist and that he is with you all at any time. Jesus Christ understood this. The Apostles changed

Jesus' Words to reflect what they perceived to be. Jesus Christ spoke of his Father God. He spoke of what God is offering mankind, what God wants from mankind, what will be from mankind, not what has been written by the Apostles about Jesus Christ. Jesus Christ never said you cannot know my Father without knowing me. He never said honor me before my Father. He never said to my own self be true. Jesus spoke of his Father as you all should speak of your Father, for the love your Father has shown you. You should respect what your Father requests. Honor your Father and show you Father your love for him. God understands what is happening in the world that mankind feels the need to discover new of everything, but what God is asking mankind is to show their God respect and honor. This is what God is asking of all mankind. Mankind will recognize the day when Jesus Christ comes to Earth, for Jesus Christ is on Earth today. This does not mean all humanity will know when he returns, for what God has said will be. For what other have said will not. Listen to what your God is telling you. Don't question what he has said. Listen to the words, repeat the words, do as the words have told you to do. Do not seek the stars and do not seek the heavens, for this is not to be.

Message 13

Today mankind sees what happens when God is forgotten. It is important for mankind to understand that God is with them always. It is not necessary that God be mentioned on every building or in all text books. It is important that mankind not forget God period. If you keep God in your heart, expose God to your life, make him a part of your life, then there is no fear of forgetting him. It is only when we expect to see his name on buildings or have prayers in schools. God knows those who are with him without the need for controversy. God is here. God is with us all. There is no need to fight among yourselves over God, for God is here now, tomorrow, and forever. There is no fear that God will disappear, for if your meaning is that mankind will forget him, he will remind you that he is here.

Religions must learn to live with one another to love one another. There is only one God. He goes by many names, but nevertheless there is only one God. Throughout history, mankind has found the need to fight over God, to fight wars over God, to kill in his name. What mankind must know is that God does not tolerate this. He will not accept the responsibility of death in his name. Throughout history, mankind has killed hundreds of thousands for the sake of Christendom when there was no need. Look to the Romans who never believed in God, for they had many Gods, but without one bullet, one knife, without one death, Christendom was formed. This is not to say that many did not sacrifice for God, for they did. There were the lions. But what God is saying is that no one should use his name for the sake of killing. For heaven will move with or without mankind's help. People must learn to accept what God is telling them to do. Stop killing, stop hating, stop destruction, stop pollution, stop. For what God is telling mankind is to start loving, start accepting, start forgiving one another for the centuries of hate and despair that you have brought to his planet.

Religions must learn that they were formed for him, for his people to show him their love for him not for power, wealth, or control. God is showing all religions that the end is near. That he wants them to start working together to bring his flock back to the fold. That all children are his, that all mankind is his, that in the days and weeks ahead for mankind there will be many events that will take place that will call into question God's love for his people. God continues to state that this is not of his doing but of mankind's determination to ignore what God is telling them to do. You must listen to what your God is telling you to do. Turn to your neighbor and ask his forgiveness. Turn to your enemies and ask their forgiveness, for with forgiveness all will be made whole. Look to nature, witness the animals. They hunt for necessity, they kill for necessity, and they live for tomorrow. Mankind kills for enjoyment, and he lives life to the fullest. No matter what others' needs are, his are the first to be met.

God is telling mankind many things. A few are stop your greed, stop wanting more than you have, be happy with what your God is giving you, accept each day as a gift given to you by God, show your love to God, and accept him as the one and only God, the God of the universe. Mankind looks to tomorrow, puts all his hope in tomorrow, and looks to wealth in tomorrow, but mankind will have to learn that there may not be a tomorrow. If mankind continues on the same course, this continued course of destruction, God can only watch as mankind continues on this course. God knows everything and sees everything. There is no need to hide from God, for he knows all. Why would mankind continue to go on this same course knowing that God is watching, unless those leading mankind don't believe in God.

God is showing you a future full of events, events that will call on mankind to question his existence. But God is telling you loudly this is not of his doing. Stop before all is lost. Look to your heart, and ask your God for help. It is possible that God will listen to you, but it must be done soon, for what mankind is leading to is of its own doing. God loves you all. You must learn to love you as God does.

Turn to the Apostles, do for others, give to others, show others your love for them, and show the animals your love for them, but most of all show your God your love for him. Praise his name, ask others to praise his name, and show others the way to the light. Redeem yourselves before it is too late. In the days ahead, mankind will have to ask for God's help. God will listen, but you must learn to accept what God is giving you and what you have given yourselves. This planet is a big one, full of life, full of hope, full of love, but mankind has turned their backs to all of this in the pursuit of wealth. If each of you gave a tenth of what you have to the poor, there would be no poverty. If you gave a tenth of your clothing to the poor, there would be no one naked. If you gave a tenth of your love to your God, there would be so much more given back to mankind. But if mankind continues to take a tenth more than they have, of what everyone else has, there will be nothing left for anyone. There is no reward for one's life, for having it all. God looks to those who have given so much in their life, made sacrifices for the poor and sick, helped those who have nothing those are the ones that will be rewarded in heaven, but if you take and take from all your reward will be far different than those who have given.

There is no such thing as hell, but those who fail to give, those who only take, will be left on this planet in servitude to others. Tonight when you go to bed, ask God for forgiveness of all the things you should have done but didn't. Mankind will continue to think these are just stories told to make people feel guilty, but the truth is what we are telling you. Truth is hard to accept when it is contrary to what you wish to believe. You will learn now, tomorrow, or on your day of judgment, that what has been said is the truth, for all to see.

It must be said that your forms of government need to be changed. There cannot be one government, for with this one government will be the one leader. Mankind must understand that all people have the right to coexist with their God. That no laws should be made that restrict his commune with his flock. Governments that restrict religions will fall while those who embrace God will flourish. Listen to your hearts. Answer God's calling for all mankind. See the future, see the past, but always see God.

Message 14

Mankind must look to the future. It is their choice whether it is a future full of hate, despair, death, destruction or a future full of love, hope, peace, prosperity. Mankind must turn from violence and death and embrace peace and love. God is showing mankind that at this time they have a choice, but in the days, and, yes, even weeks to come, there will no longer be a choice for the wheels have already begun to turn. God has told man throughout time that peace and love are all that is needed, yet people have always answered God's words with hate, violence, and death. Death is seen as the best way to silence people, but the truth is that their death only makes them louder. With heaven and Earth on their side, all will be made right.

We have talked about many. We have talked about the Romans. We have talked about Jesus Christ. We have even talked about God. Did you know there are so many more who need to be talked about? There is a little woman in the Bible named Ruth. Ruth was a good soul. She showed the love of God for his people. She comforted Jesus Christ. Why cannot man learn from their elders to accept God and turn from violence and hate to love and peace. Ruth loved our God so much that she stood out from all her people and showed Jesus Christ her love for God. There was Ann. Ann was another good soul who brought wine to Jesus Christ. When no one else would look at him, she offered him wine, her wine. People must learn to make sacrifices for our God, to offer the last of what you have so that others will not be hungry, thirsty, naked. By offering people the last of what you have, God sees this as a sacrifice. Sacrifices need to be made to seek God's forgiveness. Forgiveness is needed by all. If you wish to change the amount of negative in the planet, people will have to do much more good for one another than they are doing today. Show your love for God by doing small things for others. Offer to hold a door, offer money to the poor, help others to walk if they can't, make sacrifices in your own life for your God. God does not expect all to make sacrifices. You should not have to sacrifice your all for God. God does not want this, but you need to make some sacrifices to improve the amount of positive in the world. This positive leads to an improved life.

I think we need to talk a little about the creation of Earth. This should be a fun one. God saw the need to have other planets, other beings, other animals, so on God's will a star was born. From this star, many stars were born. From all these stars, Earth was created. The boom, as many have called it, was from God, God's use of his energy to create Earth. Once the planet began to cool, things began to happen. God began to rain down on Earth organisms. From these organisms all life started. Mankind only happened after other life forms lived. They like others before you have since gone from this planet, but mankind was formed. God did not put two humans on this planet. God put hundreds of thousands of humans on this planet, each looking different from the other with some being twins. All were created by God, for God has this kind of power. He knows all, sees all, makes all. Your scientists are always trying to create theories for life, but some things are not meant to be understood. Creationism is one such thing. Accept what you cannot understand. See that all things don't have an explanation for it. With God, all things cannot be explained. This is just simply not done. Those who feel the need to explain God will learn that there is no explanation available. Power is power, force is force, and God is God. Do not attempt to understand what makes God. God, for this is not of your doing, nor ours. God is a power, the force of the universe that all are amazed by, but no one can explain. Mankind has seen what happens with death and destruction. Violence and chaos prevail. Mankind must understand that

love, peace, joy, and happiness will not happen overnight, for many will die. This is a fact. You ask yourself why would death occur from peace, love, happiness, and joy?

Those who wish to control the world, or even their town, will use violence to control people. It is not until these people are gone, gone by God, that things on this planet will change. This day is called Armageddon by many, but the truth is that it is the day of reflection, for on this day all will be forced to reflect on their lives, to see what have they done for others and to reflect on the negative and positive aspects of their lives. For one whole day mankind will reflect. At the end of this day mankind will each have to justify what they have done to earn the right to proceed into heaven. Those who are negative will remain on this planet, while those who are positive will progress into heaven. Many have felt that God would judge them, that he would rate them on some sort of merit system, but this is not so. What will happen is what has happened all along. If you're positive, you go to heaven. You're allowed into God's loving and protective light. If you're negative, you are not allowed into God's loving and protective light. People have always said they see relatives at the end of a tunnel of light. To some extent this is correct, for there are relatives, people that you know that are sent to help you cross over into the light. For others who are negative, they will not see the tunnel of light. They will not see friends or relatives, for they will remain on this planet seeking out other negatives, looking for others to show them the light. For some this is a long search. Others are able to convert into positive by doing good deeds, showing others the way to the light, for asking God for forgiveness. There are ways to change one's destiny into God's love.

Message 15

God is asking his children to show their love for him, their enemies, and their friends. At this time in human history there, are many things that mankind must be made aware of, and some of those things include man's reach for the stars, man's hate for one another, and man's need for more. We are going to talk about what man needs. Man needs certain things for survival. Those things include, air, water, heat, human contact, but what mankind does not need is money. Nowhere does God expect you to have money. Money is something that mankind made. Man feels this need to have more, to have the most, to have more than anyone else. This is something that was created so that those who have nothing will feel bad, and those who have everything will feel good. What God is telling you is that to feel good, you don't need to have money, nor does God expect you not to have money. He just wants you to put it in perspective. Some of the happiest people in history had nothing. This did not make them bad people because they didn't have money.

Mankind must learn to accept what God gives them not what mankind has set a goal for, not for what your neighbor has, nor what your employer tells you to have. You must ask God for what you want and then pray that he will give it to you. There are many ways that mankind has learned to earn money. Some ways are better than other, but the worst way is through wars, conflicts, killing, hurting people for your own self interest. God shows all who are willing to listen to him how to make money, how to spend money, and how to make the most out of what you have. You simply have to listen to what he is telling you. Do not be fooled by men who profess God and then ask for your money, for God is not seeking your money. If you wish to help the poor, seek them out and give them your money. Don't be fooled into giving your money to these men who profess to help the poor, for the only person they truly are helping is themselves.

Mankind will see that in the days and weeks ahead many men will profess to help people. Most of those will be to help themselves. There are some who will truly help the poor. This is when you ask God for guidance. God will show you the true men from the bad. Remember that in the days and weeks ahead, mankind will see the need to help the poor, for many will be poor. This is what will be. Mankind must learn to accept what God is giving them not what man is asking for. God shows all who are willing to listen to what he is saying how to make money, how to live their lives, and how to love one another, but mankind must first listen to God. Follow the footsteps of Christ. Learn to be forgiving, accepting, and loving, for this is what mankind needs more today than ever. God is telling you that the end is near. This does not mean that you should stop living and helping and loving, for in the end all will be needed. God loves you all, but mankind has been too strong to listen to what their God is telling them to do. God has asked that all men give up the sword, turn to love, and show all the love they have for their God.

There are more stories that we need to share. There is the story of Adomaria. She was a young girl who spoke with God. God talked with Adomaria about the future of the world. She told her mother, but her mother would not hear of it. She went to her church seeking help, but God showed her mother and the church what he meant that in the future things would happen that would challenge all believers. Seek out God, find him in all things, for God is a loving and accepting God. God wants his children to love one another, to accept one another, and to show their love for him. Adomaria was blessed because she would only listen to what God told her to do, to accept all for what they are, to love all things, and to love all people.

God wants mankind to understand that there is no one person who knows all things. There is no one religion that encompasses God, for all religions are a part of God. All religions must meet in the center. This has been said before, but do you understand what it is meant by that? God is the center, the center of the universe, the center of one, and all religions branch from God. Let's just say you practice the Christian religion, then you're a branch of God. Let's say you're Jewish, then you're a branch of God. No branch is stronger than the other, for without God they would not exist. But they do exist, just as God exists. Mankind must learn to stop fighting each other over his name, for no one is more than the other. Each is important to God. Show your love for one another and show your acceptance of one another, for all are God.

God understands that mankind feels this need to be the one, the chosen one, the only one, but mankind must understand that God is God. No one is larger than God. All belong to God, for all are of the human race. Some practice different faiths. Some practice paganism. This does not make them wrong, for they believe in something. The important aspect of what God is telling mankind is that it is what is in your heart that is important. If your heart seeks to hurt people, if your heart seeks to harm others, then this is wrong, but there is nothing wrong with practicing a faith, for it shows belief in God. God may go by other names to some, but nevertheless he is God. Do not question what God's reasons are and only know that they are his reasons.

Message 16

God has been telling his children a story of not only the creation of Earth but a story of the universe. In times things will happen that mankind has been preparing for. Beings from other planets that will come to visit your planet. This must be understood. These beings are good beings. They are creations of God's as well. Mankind was created by God. These beings are creations of God as well. Beings from other planets have always been. It is not until recently that mankind would allow their existence to be known. For years and years, they have been visiting your planet. The main reason they are not well known is that mankind, as it has been mentioned, is very destructive and hostile toward anything that they do not understand, much less accept. Mankind will have to accept these beings for they will visit your planet with only the best of intentions. These beings come from many planets. They have witnessed most of human existence, history, for they have been around for thousands of years, silently observing what mankind has been doing. They were here before the Romans. They have been here since your American revolution. They have been around during your World Wars. They have silently watched as mankind has become more and more violent, with more and more destruction. Mankind will have to learn to accept those things that they find hard to accept. This does not mean just because mankind has not accepted them, they do not exist, for they do. Just as God exists, beings from other planets exist. Many will call their existence a forgery or an event brought by the devil, but mankind must understand that God is not limited to this planet, that God is universal, and that his existence is here and on other planets. God has told mankind of their existence, but throughout the ages, mankind chose to ignore what their God has told them. We send you this message of their existence once again, not to scare or frighten you, but to show mankind they do exist. During the 1800s there was a man named Josiah Witcome who spoke of other beings from other planets. He was called crazy. He was ridiculed because he spoke of them. The truth is that Josiah was not alone in his belief then and certainly not now. Josiah was told of their existence by one of God's messengers, but mankind at that time was not ready to hear the truth. Just as today, mankind will have to learn of their existence by many means, not only God. In the future, mankind will have to rely on these beings for these beings will bring you great knowledge, knowledge of medicine, education, and values. They will show mankind that you can exist without violence, and that violence will only beget violence.

Mankind continues to seek out new planets, new life forms, but mankind must not seek them out, for they will find you when the time is ready when God has given his permission for them to visit you. God is not separate from other beings, for God is in all beings in the universe. Mankind must learn to accept this concept, for it is not a concept. It is reality. God loves all beings, but you must understand that God has infinite power. There is no limit to what God can do or what God will do. It is not up to mankind or other beings to question what God is. We must only have faith that God is.

There will come a time in the near future that mankind will feel scared that other beings are attacking them. What mankind must be prepared for is peace. Peace will either be brought to your planet or brought upon your planet. We understand how this sounds, but God has made it clear that unless mankind stops the destruction, the killing, the hate toward one another God will have no other choice but to defend his realm. God is not limited to super powers to enforce his laws. Mankind will have to learn that God is God not only of Earth but of heaven. God is telling you to listen to what he is saying and obey his laws or Enforcers will be sent to enforce what God is telling you. Those who believe in God will be sent to heaven, while those who do not believe

in God will stay on this dead planet under the direct control of the Enforcers. They will not be harmful but helpful, without the need for arms or violence. They will show mankind what God wants his people to be like even if this means returning them back to the dark ages without electricity or, most importantly, arms to kill and hurt one another. The Enforcers are not angels of God but are beings from other planets who will be sent to stop the wanton destruction of your planet. As we have talked before, everything is tied together. One cannot be without the other. Your planet is dependent upon other planets.

Message 17

God wants mankind to understand there is no conspiracy to tell mankind one thing and do something else. Mankind must understand that what God is trying to tell you is what will be. OK, we understand how it must sound that extraterrestrials will be coming to your planet and take control over everything that you're doing, but what God wants you to know is that beings from other planets will come to your planet. This is not a threat. It is reality. This will be. What God wants mankind to understand is that they are God's creatures as well. It is hard for mankind to understand that they were not God's only creation. God is universal. God did not only create Earth but many planets, all laying in the universe. The universe is large, larger than mankind understands. There are vast arrays of planets, moons, suns, all in God's universe. Mankind will accept new ideas as new ideas come to them. This is the same concept of beings from other planets. They will come to mankind when mankind witnesses them coming. Mankind must not feel threatened by these beings for they are all a part of the fabric that makes up the universe. God's universe.

Let's talk a little about mankind now. It is important that mankind understands what is happening to it. This is not only your creation, your problem. This is a problem that God saw after your creation. God saw that there was a problem, that mankind wanted more, more of everything. In the beginning, God looked the other way, allowing what mankind did to happen, but the centuries went by and mankind did not get tired of having more. In fact, they grew even more determined to have more. Mankind, look inside of yourselves. See what we are talking about, and see your own need to have more, more of everything, more money, more health, more of God. You're never satisfied with what God has given you. This is not all bad, but mankind must be made to recognize this themselves. God gives you things all the time, but man stops and asks is this all instead of being satisfied with what God has given you, what he has bestowed upon you. Look around and see all that you have. No matter how big or how little it is, you must see that, yes, you earned some of it, but all of it was given freely by God to you. Ask for his forgiveness for being so greedy.

God is showing you signs. We have spoken of this many times. It is important to understand what kind of signs God is sending you. Well, he is telling you that the end is near. You can see this by looking at the newspaper, watching the news, or seeing a movie. You can see for yourself the violence is escalating. This escalation is not of God's doing but mankind's. Mankind will learn that with wars and violence, all forms of violence will escalate, not only in those countries waging wars but others near, around, or even on the other side of the planet. This is a part of cause and effect. What happens in one place has a profound effect on other places. There are other signs that God is sending you, less visible signs, signs of love, compassion, and understanding. These, like violence, have a profound effect on your planet, for they counter what the violence is doing, like a large pendulum swinging back and forth. Violence swings the pendulum in one direction, and compassion, love, acceptance, swing the pendulum back in the other direction. One day in the future, the pendulum will remain constant. This will be a time of peace and love throughout your planet. This is how the universe is calling you to be. Violence and hate will be a thing of the past. The future will be full of love, peace, and understanding. Much will have to be done before this happens. Mankind will have to accept things that it has no control over – when mankind understands that the only force, the only power in the universe, is God

God is showing mankind many signs. More of the signs are that mankind cannot or will not be able to predict what will happen with God. There are many who claim to be able to tell you when time will end. This is simply not so. God is the only one who knows when time will end. It is certain that it is not up to mankind to make the determination as to this time. No matter how many people claim so, they will never know. God is telling mankind that the end is near. This does not mean that it will be tomorrow or the next day, for it is not up to us to make that determination. It is God who will make that determination. What we do know is that there are many factors that are out of God's hands. This is not because he has no control over them, but God will not intervene, just as God has not intervened in a lot of events that have happened in human existence. This does not mean that he is not aware of the events, but these events are of mankind's making and as such, God will not intervene.

God continues to show you two paths, paths that you have the ability to follow. One is a path with God and his son Jesus Christ leading to heavens. The other path is full of destruction, violence, death, leading to the end of time. Both paths will eventually lead to the end of time, but God's path is much less full of hate, despair, death than the other path. It is up to mankind to make the determination as to which path you will follow. One person cannot make the difference, but many together can help bring mankind to the right path. Follow your heart and lead yourself and others to the right path, God's path.

Message 18

God is showing mankind many things, things that in the past mankind was not ready to hear. These things are not told to scare mankind, only to show mankind that they are not alone that God is doing this, not that mankind would question his existence, but to understand that God does exist. That he is real, that others are real, and they are his creation, just as mankind is his creation. In the days and weeks ahead, mankind will see what God has created. God is sending others to show mankind how mankind is to live. Mankind has been told to coexist with others, to respect others, to love one another, and to love yourselves. God asks these things not for his own desire to have man live contrary to how they have lived, but to live as others have always lived. We have spoken of when God speaks other beings on other planets stop and listen, not because God is a boastful God, but because what God says is so important. God has told mankind to stop the violence, stop wars, stop the killings, to turn to love, and accept all as you wish to be accepted, but mankind has continue to ignore what their God is telling them. In the future, mankind will not have the ability to refuse what God is telling them to do. This will be. We have spoken of a universal love. This is so. In all the universe, all beings are creations of God. God created us all so that we would love one another and accept one another. This is how the universe is run, not run like a machine, but run with acceptance for all. Then there is Earth, a creation of God's. But after God created Earth, he realized that something was wrong, that mankind, unlike other beings, needed to have more and wanted to have more. God calls it greed. Mankind has never been happy with what God has given them. They have always wanted more, more of everything. They were not even happy with one God. They at first needed more Gods than all other planets. Then they needed more people, more hate,, more violence. This is where God has to draw the line, a line which is in your planet. Some call it the equator, and some call it other names, but what the line shows is how much violence there is, how much love there is. We have spoken of the pendulum, a giant pendulum that changes with the amount of violence, hate, despair in your planet, and then it swings back to how much positive there is in your planet: love, joy, happiness, hope.

We have spoken of the building blocks of the universe, positive and negative. This is what the universe is made of. Mankind must realize that the building blocks are made up of only positive and negative, and with too much of one or the other, your planet will be unequal. What mankind must understand is that it is not simply limited to your planet. When your planet is not equal, then other planets are not equal. We have spoken about cause and effect. This is so. What happens in one place transfers to another place, other things. Love has been described by some as an emotional response to affection. What God is telling you is that it is a response that happens when negative is felt in another place. Your body, your subconscious senses that there is negative, not in a large dose, but an atom of negative. Mankind has never understood that with this negative mankind has to create a positive to counteract or to swing the pendulum back. Look to your health care. Illness, diseases are all a response to the amount of negative in your planet. The amount of positive will help with your health care, your illnesses, your diseases, because what this is, is a direct response to the amount of negative in your planet. Some diseases, illness are not directly related to the amount of negative in the planet. Exposure to asbestoses and alcoholism, but cancer, stress, and other diseases are a direct response to the negative in your planet. Mankind continues to seek the cure for the different forms of cancer when in fact there is a cure today, if mankind will only turn to love and peace, joy, and acceptance. All these forms of diseases would disappear. With this would come new experiences, family, friendships of all

kinds, because with the release of positive comes only good things, things that mankind has forgotten about, things that have slowly disappeared from your existence. Mankind has been told of powers, powers that were given to all mankind in the beginning – things that were given to mankind not only to help mankind, but to help mankind communicate with God and those who have passed away. Today you call it ESP, but mankind was given other powers by God, for God's power to heal, powers to save, and powers to communicate with one another. To some extent this is the problem today. With the surge of violence on this planet, some have found the means to communicate with those powers, to sway others into following things for no reason, to go in ways contrary to what God has been telling them to go. Some feel that they can control great numbers with these powers, powers that have been given to all, but most have forgotten them. We are telling you this not to scare you into thinking there is some kind of mind control going on, but what there is going on is some who feel they have the skills, the ability to control great numbers of humans into doing things that God has forbidden.

You must understand that in the future, things will happen that will make all question the existence of God, but what God is telling you now is not to question his existence, but to show others that there is a God, that he does exist and that he is with them all right now. Others feel that they are controlling the herd, that mankind are like sheep. They will follow the leaders even if this means death for the herd. Listen to what your God is telling you to do. Accept him, and follow him and only him. God created you and everything in the universe. When will mankind understand that there is only one God, the creator of the universe. Mankind will not ever understand how the universe was created, for they have never found the universe. They think they know, they understand, but what God is telling mankind is that what they think they know. They only know one tenth of what it is. The universe is thousands of times larger than they think and even then it is still larger. There are other planets and other beings that are created by one God, the only God, God creator of the universe. All understand this except for mankind. God is sending you signs, signs that you're not alone, that you're destructive to all that come near you, that your negativity affects others, others that come near to approaching you. When mankind understands the building blocks of the universe, when they understand that positive is needed, then others will be able to come closer to you. But until all hate and destructiveness is gone from your planet, you will not come into the fold with the universe.

Message 19

God is sending mankind a message that the end is near. People seem to question what that means. Well let's start by talking a little about the end, for some feel that with the end all is final that there is nothing else, only the end. You must understand what God is saying. He is saying the end of life as you might know it. This should not be confused with the end of your life. It only means that your life in the here and now will be over – you will continue to live and prosper but in a different form. Ok, let's talk about the different form. This form will be called the soul. The soul is a lot of things. It is used to communicate through, you can speak with others, other animals, other beings. You can speak to the Holy Ghost through your soul. Some have used the soul to heal others, while some have used the soul to attempt to control others. The soul is a very powerful part of your being. Mankind needs to understand the power that comes with the soul, but equally mankind must understand what the soul is where the soul is, for many they feel that it is located at the top of your head. Others feel that it is between your eyes, but God is telling you that it is in your heart, that you should listen to your heart. This is your soul. Mankind will see a need to understand where their soul is in the future, for in the future you will be asked to make a choice, to go with God and Jesus Christ into heaven or remain on this dead planet. At this time, mankind will be asked to make a conscious choice. They will have to answer what is being asked by their soul. At this time all will have to know where it is and to listen to what it is saying. God will not make this a test. You will not be asked to judge yourself. You will simply be asked do you wish to go with God and Jesus Christ into heaven or remain on this planet. Faiths have always used threats and fears, to scare people into following them. What God is saying is there is no fear, no threats, only his love. God does not judge you. He will not make you conform to his way of being, for that would be impossible. What God is asking of his people is to learn to love yourselves, accept yourselves, as you are God's creation. God makes no mistakes. No matter how hard others will tell you that you're a mistake, you must listen only to what your God is telling you, that you're not a mistake. He has never made a mistake.

I think at this time it is important to talk about faiths, for so much of mankind is devoted to it but follows the wrong ones. For the only one anyone should follow is God, God the creator of the universe, founder and creator of mankind and all beings and all planets in the universe. This is not a hard issue. Only faiths have made it so. Faiths have never understood that those they choose to follow were merely messengers of God. God is the only one you should follow, no others. Messengers have been sent since the creation of time to speak with mankind, to advise mankind, but for some reason, mankind fails to follow what the messengers have told you instead followed the messenger. All faiths have done this. There is nothing wrong with following a faith, believing in something no matter what it is. The fault is that there is only one that you should be following and that is God. All others were merely messengers of God sent to you to show you that there is a God. He is the creator of the universe, and you must obey him and only him. Each faith has followed their own views of what God is. Mankind must understand that there is only one God. his name is God. He is the creator of the universe and all that is in it. Mankind must ask of their faiths not the question of was the prophet or messenger the son of God but were they messengers of God? There is only one God. He expects you to honor him, to show him your love, to accept him as your one and only God, creator of the universe. Mankind continues to fight for which faith is the one faith, for which faith is better than the other faith, but you must understand there is no faith without God. There is no one, no being, no faith above God. Think about what I am telling you. Look at all faiths – how many people have been sacrificed for their faith when there

was no need for one to be sacrificed for his faith. With God there is no need to organize into any one faith for there is only one God. God is not asking mankind to turn from their faith, but what God is asking mankind to do is ask his faith to worship only one God. Messengers were messengers, but what God is asking is to be observed. This is not to say that the messengers were not special in God's eyes, but what it is saying is that God is the only one, for without God there would have been no messengers. In fact there would be nothing, for God is God. God is asking his followers, he is asking you to believe in him, to follow him, to accept him, and to include him into your life, to put no others above him, and to ask only of him. God has told mankind that there is to be no false prophets. God has told mankind that no one should be above him. When will mankind listen to what their God is telling them to do.

We continue to talk about faith, but it is important that mankind understand the differences between faiths. Some faiths have a legitimate claim to heaven, while others who claim to represent God do not do so. This is hard one for all involved to understand. God has never given his name to any one for the sole use of profiteering just as God never made any promises to mankind, for it is not God's responsibility to give promises. It's God's responsibility that mankind keeps his promises, promises which have been made throughout the ages. It is important for all religions to come together to accept one for they are brothers in the faith of God. God is asking them, and, yes, telling them to come together for the sake of mankind. Stop fighting each other, accept your brother, show your brother your compassion for one another, and show God's children the light that is God. You can continue to fight among yourselves until till the end of time. This will not prevent what will be. Or you can come together and do what your God is telling you to do. Accept one another, and show God's children the way. For death and destruction have beget what your faiths have been created to stop. Look to one another. This is your brother. There is no need to hate one another. Love one another for you all come from the same place and will return to the same place.

We have spoken a great deal about faiths but the truth is this is a large part of where the hate and destruction comes from on Earth. People feel this need to belong, belong to this, belong to that. This is where faiths began. Telling people that this is what you must follow, you must obey, and you must succeed to. The fact of the matter is that God is the only faith that any one should have. With God there is no need for faith, for religions, for believers, for God is within each of you. He is there now. He is there always listening, watching, and holding you when you fall picking you up when you have fallen. None of you should ever feel alone, for God is with you. All you have to do is talk with him, include him in your life, invite him into your life. God loves you, God created you, and God will be there when it is your time to cross over. God will always love you, even when others have turned their back on you. God will be there.

I think that we should spend some time explaining this idea of no faith. God is not asking you to give up or leave your faith. Your faith shows that you believe in God. All God is asking is that mankind remembers that God is number one in your life. All other things, people, come second. God will never ask you to make a sacrifice for him, for with God there is no need to make sacrifices. God will only ask you to do things that will help you, and make you better people. Things that God is asking mankind at this time are not to show that you're willing to make sacrifices but to help mankind from the brink of destruction. God is asking you to stop killing one another. This is not a sacrifice, for what happens when mankind stops killing is that mankind will live longer. God is asking you to stop hating one another. This is not a sacrifice, for what happens when you stop hating one another is that there will be no more wars. God is asking that you love yourself. This is not a sacrifice, for what happens when you stop hating yourself, you

start loving yourself and will find not need to hate others. Everything that God is asking you to do has a deliberate reason for asking, so killing, destruction, hate, violence are all negative. As we have discussed negative is negative. Too much can swing the pendulum in the wrong direction or where it is today. Mankind is leading to destruction with all the negative in and around your planet. On the other hand, love, joy, peace, acceptance, are all positive. Positive is needed at different times in human existence. This is one of those times when there is the need for much positive. This is the only answer for the negative in and around your planet. Do positive things in your life, no matter how little or how small those acts are. They will help improve the quality of life on your planet.

Message 20

In the beginning man was created, and then female was created. This is not so. The truth is that man and women were created at the same time. In the beginning man and women were equal. You may ask yourself how was this possible. The reason was they both knew what their respective jobs were. Man and women were created to procreate, to create civilization. As we have spoken of before, couples were placed on the four corners of Earth. There weren't only two couples but thousands of couples in all areas of your planet. They were created for the sole purpose of procreation. I think it is important for mankind to realize that God created all beings that all were created for an express purpose. There has been much condemnation of gay and lesbians, but mankind must understand there is a need for them. All things were created by God. God chose gays and lesbians or homosexuals for other purposes - to express love, to show gentleness to others, to be in touch with their feelings unlike heterosexuals. People confuse homosexuals with this concept of a choice that to accept themselves, to love themselves is a choice, one that all faiths cannot or will not accept. It is important to understand why faiths have chosen this direction. It is in their belief that without proclaiming only heterosexuals the norm, they would prevent the procreation of the planet. This is just not so. God is aware of all. How could God create something that was wrong? It is important to understand that without homosexuals accepting themselves, what harm there would be to Earth. Mankind must learn that to love oneself is not wrong, to love others is not wrong, and to live a lie is wrong. Each must come to judgment on their own life. You will not be judged. You will judge yourself. For accepting yourself, you will not be judged wrong. For loving yourself, you will not be judged wrong. For with total acceptance all is right. In the days of yesterday, there were many men and women who were sacrificed for their acceptance of who and what they were. Some were even burnt at the stake for accepting their homosexuality. It is important for mankind to understand they are the children of God, made in God's creation, and that nothing is wrong with accepting who you are. Homosexuals exist throughout history and creation. They will be here long after. You must learn to accept them as they must learn to accept you. God shows all who are willing to look: accept yourself, accept others, accept God.

Mankind sees that the future is full of different ideas, ideas that you have been raised on, and ideas that you have not been raised on. The acceptance of this message means that we have made a contact that must make more contacts, for the spreading of God is not an easy task. Many will consider what we are telling you blasphemy, but what God is telling you is truth. You must listen to what God is saying to you. You will see that in the future, men will have to make choices they will find hard to understand. Why would God ask this of us? The truth is God has been asking this of you since creation. Mankind must learn to accept what God is telling them to do. Show others your love of God by doing good deeds. They can be small or large good deeds, but nevertheless they are good and with good equals positive. In the days ahead, you will see many signs that the end is near. People will continue to ask what is happening. Is there one who can give us all the answers? What we are saying is yes, that God can give you all the answers, but you must be willing to listen to what he is telling you to do. God shows those who are willing to listen to what he is telling them to do. There is no secret, no myth, no task that God expects from his children, for he loves you all and wants nothing but the best for you. Mankind must understand that with God comes responsibilities. You must honor your commitments to God. You must follow what you have promised to do, no matter how difficult or prolonged the promise was, you must honor it. God understands when there are events that you need extra time

to do things, but what God is asking is that you honor him, and know full well that you must keep the promises made at the time it was made.

Mankind will see that there are choices, choices that need to be made. Do you continue to follow the same course, the course which you know is leading you in the wrong direction from God or do you follow the direction in which God is calling you to go. We must ask ourselves, would God want us to do this? Does God accept what we're doing? Would God approve? Mankind continues to make the choices for themselves, without asking God what he would want. This is wrong. What God is saying to his children is include Me in these times, ask My opinion of things, let Me guide you into the direction that the universe wants and needs you to go, and listen to what I am telling you, My children. There has been much ado about what the future holds. Mankind must understand that the future will be full if you choose the right path, but following the path that you're presently following will lead to a path less followed, to one full of material things, but nothing else. Your God will be waiting to pick you up, but this is not the path that God wants his children to follow. Acceptance is the only path that God is asking his children to follow - acceptance of yourselves, acceptance of others, love, peace, joy, and happiness can come from God, but the path you're following is one that will lead to destruction. Mankind always felt this need to understand things that they have no need to question who is God? Where is God? What is God? These are things that mankind has asked since creation. It is not up to mankind to understand who God is, what God is, for he is God, God the creator of the universe. All things and all beings in it are created by God. God loves all things, but God must remind mankind who is God. Should he call for a flood, a disaster for mankind to understand that he is God. Know for what God is showing mankind is that with God is beauty, love, joy, and happiness. Follow God into the light. Accept God.

Message 21

God has told his children many stories, stories about the creation of Earth, about the creation of man and women. It is now time to tell the story of you. To many of you, the story of you is already known. You come from your mother and Father, but there is much more to the story than simply your birth. There is your creation. God asked that you return to this planet, you serve him in another way that you show God your love for him by coming back to Earth. You will not remember your prior life. This does not mean that they did not exist. What happens is that when you're chosen to return, your thoughts are removed from you. This is not done consciously. It is done because that is how God wants it to be done. If you remembered all the lives that you had, you would have no time for the life you're living. Mankind has always questioned what happens when you die. Where do we go? And what happens to us? The question you should be asking is why am I spending so much time questioning instead of living the life I have? Your life is so short already. Spend it doing what God wants you to do. Enjoy your life. Live your life, and have love in your life. These are things that God wants from his children. God has told his children on many occasions do not question my existence, for I exist, for I am real, for I am with you now and always. But mankind has always had this unrelenting need to find out where do we as humans come from? Do we come from beings on other planets? Do we come from God? Or do we come from an act of love? Mankind will always ask these questions, but mankind knows the answers to these question, for they know that God exists. God continues to show mankind his existence every time you see a thing of beauty. You know yourself where it comes from. Accept God. Go on with your life, and include God in your life. There have been many question that mankind has felt the need to ask of their God. What are we doing? What is the meaning of life? Am I meant to do more with my life? What mankind must learn to accept is their life, live their life, and enjoy those things that God has given you. These things were given not for God's enjoyment but that mankind could enjoy those things.

Mankind feels this need to govern over each other. This is fine, if you're the one governing, but not so if you're the one being governed. Mankind must learn to spend more time doing what God has asked them to do - love one another, accept one another, share your love for God with others, and include God in your life. By doing these small steps for God, God will bestow great riches on you, maybe not in money and gold but in heaven.

This story is about you, mankind, what you want, what you will get, and what you should get. There is a lot of talk about what God is. Where is God located? Is there such a thing as God? God wants all to know that he does exist and that he is here with you all now. There is no need to look for him, for he is with each one of you now. What would mankind do if they found out all they wanted to know not only about God but about all things. Would they be more understanding, more accepting of themselves, and others, of all things? God thinks not, for mankind has always wanted to know everything, not for the purpose most would have to learn to accept and understand, but mankind wants to know so that they may control it, point it into direction, and to make what they want to happen.

There has been much talk about the ark of the covenant. To posses it would be to control people and nations, but this is not so. The only power that the ark has is what God gives to it. You have powers, powers that God has given to mankind since creation. Knowing the need for healing and to be able to cure oneself from diseases that God knew would happen over time, but mankind has forgotten how to control it and how to operate what God has given mankind. People must learn

that to heal oneself you must first believe that you're deserving of the healing. Your life is what God has made it and what God will make of it, but mankind feels that they are undeserving of love, love from others, and love from God. Mankind must understand that through God's love for you, all things are possible. Through God's love, all can be healed, planets can be changed, and all things are possible, but only through God's love and acceptance. Only good things can come from healings. You are not able to hurt others, only to perform a healing. This is not what God has intended it for. God gives you these gifts, for God so loves you all. There are other gifts that we will talk about later, gifts that God and only God could give. To understand these gifts, you can only understand that there is a God and that he loves you all. How else would mankind get these gifts? Did they just appear? Many skeptics can point to all things and say see this is why it is not so, but to the skeptics God points how. If not by Me, then how do these miracles happen?

Mankind is always looking for answers. We again state that some things are not meant to be answered. Some things are nothing more than faith. You must believe. To believe in God and to have faith is all that you need sometimes. This is not to say that loved ones in your life are not important, but there comes a time in all lives that it is between you and God. Through God's guidance and wisdom, all can be answered perhaps not in the way you're seeking, but through God's ways. Challenges come to all at one point or the other, death, sacrifices, love, and children. All these things can become challenging, but through God's love and understanding, God will show you the way the way to raise your children, the way to share your love with others, and the way to accept death, for through death there is a new beginning a beginning in God's love and light. Mankind must learn to accept that death is not the end, but for all a new beginning, a beginning of their choice. Death is not a prison that one serves out eternity. Through death, you have a new direction to go and to follow what God has set out for you. Some in death have more to learn than others. In their cases, they have a different path to follow, but there is no judgment in heaven, for the judgment that you have already received by being on this planet is all that anyone should endure. This is not to say that all proceed into heaven, for those who have been negative, for those who have killed, and for those who have been so negative, must remain on this planet seeking out wisdom and guidance from God and his messengers until the day comes that their deeds have either earned them the right to continue on or that others have found the need to help them cross over. Only those who are ready to cross over are permitted to do so. This does not mean that all must be willing to accept death, for death comes to all, but on God's time, not ours. Death must be seen by some to be a cold and final stop to life, but what all must realize is that through death we are reborn. We come into the fold of what God has planned for us. Even in tragic circumstances, God is with us. he will guide us into the light, for through God's light and only God's light can man be found whole again. In death, the soul is set free to fly into the realm that is God. God shows all that are of good heart what it is they need to do, but those who have gone against what God has asked them to do remain on Earth in the dark searching for the sign that will free them from this burden.

Some of the reasons for God to write this book is to open mankind's eyes to God, to show you that the fears and promises made by mankind are not always the way of God, and that God makes no promises to mankind, but that mankind must honor the promises it has made to God. In the days ahead, there will be many signs that will point to a change, a change in the planet, a change in society, and a change in faith. It is important that mankind understand that God is here and now and always with his children. his children must learn to honor him by doing what they have promised to God. Make no others higher than God, accept God as the one and only God. Include God in your life, love others and yourself, watch out for the sick and poor, and learn to accept all

for what they are, brothers and sisters in God. For with God's love, your knowledge, your faith, will only grow stronger. New ways of belief will happen. New worlds will open up for you. By accepting God creator of the universe as the one and only God, you will free yourself of the old punishments and open yourself up to love and acceptance for all things.

Message 22

There have been many stories written about God. People seem to feel this need to know God. This pleases God, for he is happy that people wish to know about him. What displeases God is that they want to understand God. It is not mankind's need to understand God, only to accept him as their God. There have been people who have claimed to speak with God. Some have, but most have not. This is not because God does not wish to speak to them. It is because they have failed to listen to what God has told them to do. We all have questions that we would like to have answered. Will I be happy? Will I see my Auntie Julie? There is nothing wrong with wanting to ask questions of God. He is happy that people wish to speak to him, but what mankind must understand is that it is up to God what will be, not mankind, and that mankind must accept what God is giving them. This sounds hard to understand, but in fact it is not. God will give you many things - things of happiness, things of joy, and things of beauty, but what God will not give you are things of the future. It is not for you to make the determination of what the future will hold, only his. God tells you things that will happen in the future not to scare or excite you, but to show you of his existence. Things are told to mankind for many reasons - some to warn mankind not to do certain things, other times, it is to show his love for mankind. We must all learn to accept whatever our God gives us, not to question it or to examine it, but to rejoice in it, to be pleased with that our God has given us. There are many people who claim to speak with God. You must watch out for some of these people, for they are not speaking with God, the creator of the universe but others who mean to bring harm upon you. We tell you this story because it is the story of mankind from God's perspective. God is telling us what we should be doing, what he will be doing, what he will do. God tells mankind this story for much too much time mankind has listened to only one story, the story of the Bible. Mankind must understand that the Bible does not reflect what God is calling mankind to do. The Bible is not the word of God. This is hard for most to understand because you have been brainwashed into this thought that God would only speak once then walk away from his children. This is not so, for God is with you all at this time, but that mankind for its own sake has chosen to ignore what God is calling his children to do. In the days and weeks ahead, there will be many events. These events will continue to happen. There won't be one event that will signal the end of mankind, but there will be many signs that will show mankind that the end is near. Warming of the continents are only a few of the signs. There are the signs of war, the signs of famine, and the signs of plagues, but more and more signs will be seen by mankind, until all understand that the end is here. At this time, it will be too late for mankind to choose to believe in God. God is telling his children this so that they may prepare for the end. Do not be scared, for the end will be. This is God's doing, for mankind has broken their covenants with God, but other events, those of man's doing, are also to blame. With the end will be a new beginning for God's children, those who believe, and those who will follow him into the future, the future of heaven. Have no fear for God is with you. This is so, but mankind must understand that they have duties. They must obey God's law: thou shall not kill, thou shall not worship false idols, thou shall not hate one another, thou shall not destroy the planet. These are a few of what God is telling his children not to do. There are many more things that God is telling his children to do: love yourselves, love each other, love God, include God in your life, help with the sick and poor, and provide love to those who have none. These are things that God is asking of his children.

We have seen what happens when we forget our God. We have seen that through our own actions, we have brought shame and destruction to our planet. God is telling mankind that there

are ways to change what is happening in the world, but they must first learn to accept that it is God, yes, indeed God, talking. God is telling them what to do, and God is not asking all faiths to walk away from their beliefs, but what God is asking all faiths is that they must remember why they are here, for the worship of God, not others, not false idols, not messengers who were sent by God to spread the message that he exists that he is with you all. Faith is important to mankind. Faith is important to all beings, but you must remember what would faith be without God? God brought all into being. Without God, there would be nothing, just void of what we now call life, planets, a universe. Show God your love for him, include him in everything, and don't limit God. By attempting to limit God, you only empower him more. For God is all knowing and everything. There is no way that one or many could prevent God. No one is above God. No one is superior to God, for God created all, and God will take away all this is of God's doing. Mankind will see that the future is full of events good and bad. Some are from God and some are from mankind. But you must realize that God loves you all. God has so much to offer mankind if they will only open their hearts and listen to what he is telling them to do. Ask yourself, have I done all that I could do for my God? Have I done all I could do for the sick and poor? Have I given all that I could to show God my love for him? No one can answer all these questions with yes, for we are all human, but God is asking this of his children: make the extra sacrifice, show God your love for him, help those less fortunate, make things of good happen, create happiness and love for all on his planet, and show your love through love.

Message 23

It is important for mankind to understand what God is asking of them. He is not asking that they make large sacrifices for his love, for mankind does not have to make any sacrifices for his love. They already have his love. What God is asking for is that mankind show their love, not only to God, but to other human beings: their neighbors, friends, the poor, and the homeless. Show all mankind your love for God, by showing them your love as well. Mankind has been asking what they can do to show God their love. This is a start. God is asking mankind to show each other their love, for mankind must learn to understand that hate, violence, crime is not the answer to a way of life. It is only the means to finding money, but not for finding happiness. To be happy, you must learn to love yourself, for who and what you are, one of God's children. The very things that you feel compelled to possess are things that have been created so that you will desire them. Mankind must learn to accept what God gives them. This is all you truly need. Do not feel that God is asking you to give up all your possessions. He is only asking that you give up some of your possessions for those who have nothing. Do you really need that? Is there someone who needs more? These are things that God is asking of mankind. Through these things, these acts of kindness, God will reward mankind much more. These are small things that mean nothing to you but to others mean so much. Show your love for your God by doing small acts of kindness, showing all that there is love, and that we all need it to survive. These are things that will be rewarded. Mankind has so much to learn, so much that they must learn from their God. These are some of the reasons why God is communicating with his children at this time because there is so much that mankind must learn to accept, things that they know are right and true. Mankind feels the need to make things right. This is not only of their doing but what God is asking them to do. Mankind must learn to accept things that their God is telling them to do, to love, to be happy, to show kindness to all. This is a part of the reason why the things that you see everyday are happening because for much too long, love, kindness, and happiness have become only a distant thought. People have forgotten what God has told them to do. There is much that God has asked mankind to do to protect their planet, to show love, to show kindness to others, to love themselves, and to love others, but mankind in this need to have more, more of everything, has forgotten to give praise to him who deserves it. God almighty creator of the universe. God created all things, for without God nothing would exist. It is important for mankind to go back to the beginning and talk with God, express their needs, and their desires, to ask God for guidance. We must all remember there is only one God. Others who profess to speak on his behalf are in question, for God only speaks to those he wishes to speak to. This is how it is. God will only speak to those who he chooses to speak to. You can ask for him to speak to you, and he might. This does not mean that he does not love you, for he does.

It is time for us to talk about the planet that you live upon, this small planet called Earth. This is only one of many planets in the universe that God created. This planet is your home. This planet is your life. You must learn to treat it that way. You cannot allow anyone or anything to control it, to pollute it, or to destroy it, for this is your only home. God will not give you another one. You must all take possession of your home, and force those who will not maintain it to leave it. God will help you reclaim your home, but all must ask that this happen. We have spoken about miracles. They will only happen when you feel that you're deserving of it to happen. Then, all must ask that it happen. God is willing to do this for you because of his love for you. We have spoken of pollution, but there is so much more than only pollution happening that is disturbing God. There are things that are happening outside of your planet - the use of satellite technology,

space crafts, radio waves, nuclear particles that are being distributed throughout the universe all from your planet. These things may have little or no reaction to those of you, but to the rest of the universe they can have adverse reactions to them. Mankind must learn to act as though he is not alone, for he is not alone. There are many beings on many other planets throughout the universe.

We have spoken of this before, but it is important to realize that your pollution is having an adverse reaction on other worlds. All of these things are adding to God's displeasure with mankind. Mankind must learn to treat all as special, for it is one of God's creation. No one or nothing has the right to affect it. Let's talk a little about cloning. This is another subject that much displeases God, for mankind is not God and therefore does not have the right to create things for its own use. When mankind feels that they can step into God's shoes and start creating things for their own need, there will be very bad repercussions for this is not of man's doing, only that of God. There is no reason for this to happen. God's way has worked since creation. Why is this needed now? Is it for what they are saying or will there come a day when mankind will create races to serve at their pleasure? God sees all and knows all and will not allow this to happen, for what mankind does not understand about physics is the same as all things short. It will not be until it is too late that mankind will have introduced unidentifiable items into the metabolic structure of man. It will be too late to change back, for once it is in it will remain. Mankind must turn to God and ask for guidance. God will show you what to do and what mankind must not do. There is so much more that God has to tell his people. We think that this is all that there is and yet you know so much that no one can tell you more. Well, God is going to tell you so much more. Continue to ask questions for God has the answers to questions that mankind has not even thought of the questions for. Remember to include your God in your life. Show love for all.

Message 24

God is calling on mankind to make the sacrifices that it needs to make to save your world. There are many things that mankind will have to give up, including your dependency on large cars. You must learn to do more with less. By saving your gas, you're saving your planet. There are so many other things that God is calling on mankind to give up. Do you really need all the things that you have? Is there some prize for having the most? Is it to prove to others that you're better at some things than they are? Is it to impress those who you should not be impressing? Has this led you to this place in your life when physical possession mean more than your own life? Did you know that mankind can do so much more with so much less -cars, jewelry, furs, clothes, televisions, food? You must ask yourselves is this what my God would want from me. Is it important to tithe to the church or is more important to give to the poor? We must ask ourselves is this the way of God. Would our Father want us to share what we have with others or would he want us to hoard what we have?

There are many questions that in the near future mankind will have to ask. You continue to rely on your politicians to solve the problems that only mankind can solve. Governments have nothing to gain from stopping pollution or production of gas and oils or to feed the poor or help the sick. This is what our faiths were created to do. They were to lead the countries of the world to God, not away from him, not to fight among themselves over who is the greatest or the first but to bring God's people to the fold. We must think of Christ is this what he would want. God sent Jesus Christ to Earth to show mankind that there is a God, that he is the creator of the universe that all men must be humble before their God, and yet mankind continues to question not only Jesus Christ's existence but God's existence. How can this be? Where do men get such ideas that only they could create the Earth, only they could create miracles, only they could solve the problems of the Earth?

Mankind will have to come to God, will have to learn from God what they can and cannot do what mankind's responsibilities to God are. For far too long mankind has known of God, has talked of God, has taught others of God, but has not found God. God is calling all men to heed what he is telling them, to listen to what their God is telling them, to follow his messages, to stop what mankind is doing - pollution, greed, hate, wars, killing. All of these things must be stopped and stopped soon or mankind will have sealed their fate with God. God is not a vengeful or hateful God, but God expects certain things from his children and these things are not be followed. Listen to what God is telling you to do. Start your own grass roots programs to stop wars, stop hate, stop violence, stop pollution, stop greed. All of these things are what God is calling his children to do, for if it is not started soon, it will be too late for mankind to heed what their God is telling them to do.

Were you aware that there are prophets, people who have been given messages by God for his children? These prophets have been sent throughout the years since creation to give messages from God to his children. These prophets have told of great events, small events, terror, horror, and good events, but all the events have been told by his prophets. Did you know that there are prophets today who are spreading this message, a message of God's love for his children that in time things will happen that will cause all mankind to question God's existence? But what God is telling them right now is that he does exist, that he is with them, that he will always be with them, that they are not to fear. What will be for it will be, and there is nothing that anyone can do to stop it. There are different ways that you can reach it. One is God's way, the other is mankind's

way. Which way will mankind follow - that of their God or that of their politicians? Prophets send great messages, small messages, but all these messages are from your God. Listen to what the prophets are telling you to do. They are not seeking fame or fortune, only love God's children to their Father. There are many prophets on Earth at this time. You must look to them for guidance for they are giving you all the guidance of God. God is telling his children to listen to your Father, follow the advice that your Father is giving you. Cease the wars, the hate, the violence. Look out for the sick and poor. Make sacrifices in your own life, not for your God but for yourself.

There are many events that are happening quite quickly, and these things are encouraging God to speed things up. Do you understand what we are saying? Things are happening so quickly that God is speeding the end up. This may sound hard to understand, but look to the east. You will see the signs. They have already started. There are plans to start yet another war. This war must be prevented at all costs, for this is not of God's doing, but mankind is planning a great war that will once again be stated to end all wars. But it won't. You must listen to what God is telling you to do. Don't be tricked into a false war to help your economy, your money, your oil, for it is not a good thing that is to be done. God is telling his children do not do this for this will end certain things that will prevent you from following God's course to the end. Instead mankind will have to follow mankind's course to the end. Each will arrive at the same place. Only God's way is the best way to arrive at the end. Mankind will be asked to give up many things all in the name of security. These things will not provide you security. They will take security away from you. Do not be tricked into this for this is not of God's doing. Do not question why would God allow this to happen, for it is not of his doing. We have given mankind all the warning that it deserved. For not listening to their God, this is what will be. Pray to God. Include God in your life, for this is the only way you can be saved.

Mankind is being showed into what others have only dreamed of. There are some things that mankind has always wanted to know about. God is telling you for this. You must promise to abide by his law - love one another, love yourselves, watch out for the sick and poor, stop wars, and destruction on his planet. God is showing mankind that heaven is not just a place, it is places, that mankind must learn to accept things that they cannot or will not accept. That there is no rational answer to where is heaven. Heaven are places that exist not here, but there. Places that cannot be found by mankind. In these places there are different forms of life. For those who only believe one way, that is how it is. For those who believe in other ways then it appears as other ways. There are many forms of heaven. Sometimes you will see symbols, other times, you will see members of your family. Sometimes you will see old friends. Sometimes you will be alone, not for always but for the time you request. Heaven has been described as golden streets. This is not so, for some who may believe in that then that is how it will be. For others, their idea of heaven is Paris in April. Then that is how it will be. For others who believe in science fiction, that is how it will be. For some, heaven is a number of places that they move from whenever God and they want it to happen.

Message 25

God allows you the right to choose what kind of heaven you want. There are some who desire money, then that is what heaven is. But for most, heaven is a place where all hopes and dreams meet and there is no need to want, desire, for this is where it is. You will not be in pain evermore, for in heaven there is no pain. Imagine the greatest joy that you have had in your life. Now imagine that joy multiplied times a thousand. This is what heaven is. People continue to feel that only certain people are allowed into heaven. This is not so, only those who are positive in their life. There is no judge. You will be asked to judge yourself. That is why it is so important to be positive in your life, to love, learn to share love, learn to show love.

What God is telling mankind is that there is only a short time to listen to what he is telling you to do, that mankind has chosen a road of their own doing. Instead of listening to what God is telling them to do, they have chosen their own way to go. This road that lies before them will be full of disasters, hardships, death, and destruction. Both roads lead to the same place. Your road is what we have described, but on the other road is God's road. One in which mankind lives in peace and harmony with the world, loving each other, sharing in their love, accepting all who live in the world. Mankind feels this need to control everything, to control who lives, who dies, who is wealthy, who is poor, who leads, who follows. All of these things are for God to control, not mankind. We have spoken of the death penalty, capital punishment. It is not for man to decide who lives. and who dies. For justice by death is not of God's doing. That mankind has been told throughout the ages that it is not for them to decide on this that only God can decide who is born, who is killed, and who dies. There are many stories of injustice through this means - those who have not died when they were supposed to have, those who have died, then were cleared of their crimes. This is why it should be left to God to decide, not mankind. You will see in the near future that this form of punishment will be wrong. For just as the Romans killed the Christians, this will be revisited in the future. For you are already seeing what happens when one religion, one faith is seen as terrorist, not those radical elements, but that the whole religion, faith is condemned. Those who seek justice will only find justice if they use justice. You should always look further then you're being asked to look. Look over the horizon see what the effects of your laws can have. Not just on those you seek justice from, but from all. Throughout the ages, mankind has sought to seek justice. In the beginning it was from small crimes, crimes that shouldn't have been if mankind had been listening to what God was telling them. By looking out for the sick and poor, those seeking food would have never been punished. Mankind must learn that through God's laws, this in effect will solve all your problems, for God created you. God knows what is best for you. Listen to what he is saying. Those who are hungry are not criminals for seeking food. Those who seek warmth are not criminals. Those who seek sustenance are not criminals. Mankind should be helping these people instead of imprisoning them. Prison is not the way to look out for the sick and poor that God is telling you to do. Sickness comes in many forms, physical, spiritually, and mentally. Mental illness is not a crime. Those events that come from mental illness should not be crimes either, for what God has said, is to be followed. Lookout for the sick and poor. Look at your prisons, full with people whose only crime was that they were poor or sick. In God's world, mankind will learn to accept these things. For in God's world, there is no crime, for the simple fact that mankind is loving, accepting and follows what God has told them to do.

The interesting fact is that if mankind was seeking justice, then all should be in prison, for mankind has broken God's laws. They have killed, they have hated, they have ignored the sick

and poor, they have not included God in their lives. So those who profess justice should look to themselves before passing more laws that seek to hide those elements that they disagree with. God's justice is the only true justice in the world.

We have spoken of times in the future. It is important that mankind understand times of the past. By looking into the past, mankind can help stop the repeats of the past. There have been many events that call all into question - there is World War I, World War II, Hitler. Mankind must learn to accept what Hitler did. By truly looking back at Hitler, they can see what can be again. The very concepts were not created by Hitler, but by others who meant to prevent him from power. These same ideas are leading people today in the sake of protection and safety. Hitler was a horrible human, but not unlike some today, men who continue to seek world domination. In the name a security and peace, men will attempt to control the world. They will seek to limit faith and religion into consciousness. By using events of today and yesterday, they will show others that faith is a concept that must be stippled. This only leads to radical elements, which cause to harm the world when, in fact, it is only elements of faith that hold it together. Mankind must learn to accept that through faith, there is belief. Belief in something is not wrong, belief in nothing is. God answers to all names. There is only one God. There are many faiths, faiths that state they are the only faith. But there is only one faith. with many names. The faith is God. Mankind will learn to accept that there is only one God. God creator of the universe, all things in it. Mankind must look to the past for some of the answers of today. Events have happened and continue to happen over and over throughout the centuries. These events are not of the devil or evil, but negative, negative events recurring over and over attempting to gain more power each time.

As we have stated, there is only positive and negative in the universe. These are the building blocks of all things. Just as we encourage positive things, negative will continue to attempt to gain more and more power. This is easy with mankind for there is so much negative already here. Mankind must act diligently to encourage more positive into your world. By doing these small acts of kindness, hospitality, love can have a much greater effect on your world. When the pendulum begins to swing into the direction of positive, the whole world will notice. This is why throughout the ages there have been great progresses made that the discovery of electricity. The industrial revolution was brought about because of the amount of positive in the world. There have been other events, but just as there are great events from the positive, there is also great events from too much negative in the world. Look to these events then look to just prior to them and see what the world was like, what was happening. Were there wars, oppression, struggles? Through these struggles you will see what happens as the pendulum swings back because in God's world. The pendulum will be constant in the middle. This is great knowledge. The world should rejoice in that God is taking the time to explain to mankind some of the directions for their world, how to maintain peace, love and happiness. Through the regulation of positive and negative, the world can exist.

There are many ways that God is asking his children to show their love for him. The easiest way is to include God in your life. This sounds easy, but as many will tell you it is not so easy. You must include God in your life every day. That is to say that you must see things of beauty and tell God how beautiful it is that you have to be happy about something and include God in your exuberance. God is not asking that you build him shrines or temples, but that you do small things that together with others can make great differences in your lives and the lives of all. Small events when combined with other small events create large events.

Many have asked how does God do the things that he does. First this is not for you to ask, it is not mankind's right to ask. Further it is not in your ability to understand how God works. There are many things that God will show you - how to improve the quality of life for all on your planet, how to postpone the end of time, how to cure disease, how to feed the hungry, how to solve many of the problems of the world. But God will not allow you or anyone to question how he does what he does. For this is your Father. You must learn to treat him with respect and the honor that he deserves. Mankind will learn in time that God is God, mankind is mankind, and that the two will never meet. This does not mean that God is not with you now or that God will not listen to your prayers. What it does mean is that God, all that God is, will always be a mystery to mankind. For your ability to understand and, yes, accept what God is unimaginable and incomprehensible. This does not mean that mankind is lacking knowledge, for with mankind, if they feel there is something that they should know, they will stop at nothing to know it, learn it, discover it. So, why will mankind not accept God, learn from God, and discover what God is telling them to do?

Mankind has choices. In these choices mankind can either go to God, seek him, accept him as your Father, or falter, go on their own in the dark without his guidance. But no matter what mankind does in the future, God will always follow you. No matter how far you feel you have gone away from God, he is with you at this moment in time. Listen to what your God is telling you. Open your heart, open your mind, accept what God is saying. Turn from the ways of now and accept God as your Father - the Father of the universe and all that is in it. God shows those who accept him that there are far greater gifts in life than those you presently think of. Money and material things are created by you, not by God. If mankind will turn to God, accept him, include him in their life, their lives will be so much greater. But those who feel that God is a superstition, a myth, a fallacy will be greatly missed at the time of contemplation. For in the near future, all mankind will be asked to make a choice, to go into heaven with God and his son Jesus Christ or to stay on this dead planet with all that is negative? Mankind finds it hard to understand that at any time God would ask mankind make such a choice. But what you must accept is that it has already been made. God has told mankind what to do, what way to follow, what way to seek, and yet mankind continues to wage war and destruction upon themselves. This is not what God has asked from you. It is what you have asked from yourselves. Those of God's children who follow God's path into heaven understand that the end is near, that mankind has already made his choice. All you can do now is to follow the course that mankind has set for itself. This is the time that God has asked his children to make the choice. Rejoice in the fact that you will be with your Father soon. This world is coming to an end, but that through the end, will be the beginning. In the next world, there will be no pain, no suffering, no wars, no killing, only the love of God for his children. We ask this not as a weapon to make people convert to God, but to simply show that God is here. He is with you. He wants you to listen to what he is telling you to do. Open your heart. Accept him into your life. Live the life that God is calling all of his children to. Prepare yourselves for the end, but live your life as God has asked you to be you. Enjoy who and what you are. Don't allow anyone or anything to tell you that you're not alright being what God has created. For it is not up to mankind to decide what God wants you to be, for you are already what God has created. Rejoice in the fact that you're a creation of God. There is nothing wrong with you. The only thing wrong with you is in the world you're living. Through its desires, through its greed you have learned to live not as God has told you to live but as they and others have told you to live.

Why do mothers teach their children? To make them smarter, so that they will learn more, so that they will make more money in the future, so that they will be better Christians, better Jews, better Muslims. But the truth is that God created you with all that you need. There is no need to be educated. If mankind would listen to what God has told them to do, you would not need to know who the presidents of countries are, what country you come from, for you would all know that you're the children of God, you live on his planet, you were raised by God. This may sound impossible for most, but this is how you were created. You were created to have all the things that you needed. When it came time for you to pass, you did so, not at your time, but at God's time. When you were created you had the abilities to communicate with each other, with the animals, with plants, with all of God's creators, but you wanted more. To have more you learned to wage wars. You found things that were more important than living as God had told you to live. You learned languages in hopes that others would not understand what you were saying. You learned to live not as God had asked you to, but that by killing, hurting, and yes hating others, you could have more, more of everything, never content with what God had given you. This is how it has been since creation, mankind's greed for more, more of everything. The time grows near. The end is on the horizon, and still man asks for more, more time. This is not for anyone to question. It has always been up to God, the date, the time. All must ask that miracles happen, but that without true change on your planet this will never happen, and as a result mankind has set the wheel into motion. It is not only about this planet, not only about you as a person, but it is about God and the universe that he created. What happens on this planet has direct effects on other beings on other planets, beings that have lived the way God has asked them to without question. When God speaks, all in the universe stop and listen. This is not so on Earth. God continues to speak to all who will listen. You must open your hearts and listen to what God is telling you to do.

Message 26

There are many questions that mankind has wanted to ask God. These questions should be asked. It is up to God whether or not to answer those questions. Some of the questions that we can answer are where did we come from. The truth is that you came from God's creation. God wanted this to be, that is all. It sounds too easy, too made up to be true, but it is the truth. God has such powers, and God does what God wants when God wants. That is the only explanation needed. There are so many questions that mankind would like answered that are not up to mankind to make a determination as to the legitimacy of the answer. If mankind could understand all that there is, this would, in fact, make you God. This will not be. There is only one God, our God, the creator of the universe and all that is in it. Mankind will learn one day that there is only one God and that he goes by many names, many faiths, but there is only one God. Faiths should come together and see what separates them, in fact, is what holds them together. In the days and weeks ahead, faiths will see that they must come together if they wish to be active in the world. There are leaders and believers who are attempting to abolish all religions in their attempt to control the world. This may sound like science fiction, but it is not, for these few believe that they understand the powers of the universe, and that by eliminating faiths and religions they will be able to control the people of the world. This has been an ongoing attempt by those who wish to follow negative. For they see that God's way is right and that people would follow God but through this negative power they can alter what God has asked of his children. Don't be fooled into following such radical ideas, for they are not radical. They have been around for centuries when faiths were ruled by the masters and not God's children.

You must look to the past to find solace for the future. Radical ideas are never radical, for in the past you can find the answers for your future. Throughout history, man has attempted to harness the energy of God through legends and myths, man has attempted to control God's children. God's children only need to listen to what God is telling them to understand what the future is holding for them. At many times throughout the ages, man has asked where do we go. In the future this will not be so, for your future is already at hand. Those who have attempted to seek control of the world are at hand and are now setting the wheels into motion for world domination, not in the name of God, but in the name of freedom and security. God has said that you are to follow the way of peace and love and that you should show all that look into your heart his love, not today or yesterday, but always. Show those who question your faith what your faith is and that through God's love and acceptance no one is an enemy, no one is a stranger, for all are your brothers and sisters in God.

Follow the way of God, showing love for all. Death should not be an excuse for not living, for not loving, for not sharing God's love for one another. This is only a means by which negative wishes to gain the upper hand on Earth, by preventing the sharing of love and acceptance and the promotion of hate and death. God is telling his children this story not to read of his own power, but to show his children that he is real and that he is with you now. Things are happening in the world that will affect all of his children and that they must prepare for it. There is no secret. The only secret is that mankind has forgotten what they promised God, that they would include him in their life, that they would respect him, that they would love one another, and themselves and that they would look out for the sick and poor. This is no secret. There is no special faith, no special religion with sole authority of God, for God is within all. Those who read the word of God and continue to question what he is telling them must be lost from themselves, for what God is telling you is to love yourself, accept yourself, and by doing this, you will find God. God is

within each of you, not locked in a building secured from his children, but within you, and within all. That all is a part of God, and as such should not be harmed, for you would be harming God.

Mankind lives their life to a calendar created by a Pope. This is not God's calendar. This is not how God expected his children to live. The only calendar that should be recognized is the calendar of the universe. At certain times in the year, you should plant. At certain times in the year you should prepare for the winter. There is no work ethic in heaven. There is no need to keep to a schedule in heaven for all of this is man-made. God would not ask his children to keep to a schedule to worship him only a certain days, to worship his messengers on certain days. What God is saying is that this is one part of many parts that is leading to the end of man. By the obscenest need to hurry, to speed things up, to be the first, to excel, is not of God's doing, but of mankind's doing. These are ways in which mankind is killing himself. If you look throughout history people did not live longer, only happier, and that during these happier times great creations, great inventions took place because mankind was in a position to accept what God was giving them. Today, mankind is in such a hurry to get to the next event, the next meeting, the next planet that he is not enjoying what God has given him. In this quest to have more, to have it all, mankind is living longer but not happier. Look to your planet and see what the results have been. God is showing you that there are ways that can improve not only your planet but your lives. Money is the root of a lot of your problems. This need to have more, to have the best, to have more, is not of God's doing, but mankind has found that by making man work more, work harder, get less, and less is a way to control them. You must learn to live on less, to have less. By doing this, you will live a much happier life. You only get one life. That is the life that God has given you, not mankind, not your parents, but God has given you.

Mankind has seen that there are many forces that work in the world. There is the force of good and evil. There are positive and negative forces. There are the forces of love and hate. There are many forces that are at work in the world today. The most important force is that of God's love for his children. This force is never mentioned because mankind feels that there is no power that can be equaled to God's force. Mankind has tried with the invention of the atomic bomb, nuclear bomb, but there is no force that can equal God's forces. God has ability that mankind will never comprehend. This is not to say that there are not forces that can come close to equaling God's forces. Those forces of the negative side are close to equaling God's forces. Mankind must learn to accept that the forces of negative are not bad forces. They don't mean to harm mankind, but that it is just a result of being negative. Negative forces are around you at this time. They are in all things just as God is in all things. We have spoken of the building blocks of the universe are positive and negative. These energies are in all things.

God shows mankind many things that will help them to exist on this planet. Mankind has been given many things that will assist them in survival on this planet. The abilities to communicate with one another via telepathy, but there are other great gifts that mankind has forgotten about. Jesus Christ was only able to heal people because of the gifts that God had given him, his Father gave him and all the gift to heal one another that through these gifts. Mankind was expected to live and succeed on this planet, but throughout the ages mankind has forgotten how this is done. It is not done through a miracle as has been spoken of but rather through the gifts that God has given all mankind. We will show you how this is possible and that through meditation and visualization you are able to heal people. Through the concepts God has bestowed on you, you can heal one another of great diseases that have been passed from one to the other. This is not a miracle. This is not something special, for all men have the ability to do this. Only mankind has forgotten how to achieve this. Through the meditation and visualization of God and God's

healing powers mankind can do this, but just as all things, you have forgotten how to do this. In this book, God will show mankind how to do this. Through meditating of God's loving and healing forces you will be able to heal yourselves. There are many great gifts that God has given to mankind. This is only one of many. People will continue to question God's existence. This is not meant to show mankind that God exists. This is only to show you of your gifts that God gave you.

We show you a future full of despair and suffering not because we enjoy watching mankind suffer. This is not because we have chosen this for mankind. This is not what God has chosen for mankind, but this is what mankind has chosen for mankind. Bad things happen not from good, but from negative. Good things happen from positive. This has been told to mankind since creation. In the beginning, mankind could not or would not accept that life could be so simple, so easy to understand. Mankind has always attempted to make everything more difficult not for its benefit, but through power. If mankind could understand just how easy life could be, they would not be able to control them. They would not be able to have those things that they found more important than upholding the promises made to God.

God has showed you more than once that life was to be an easy life, but did you know that mankind has ignored not only what God has asked but others of God's messengers have asked? That Buddha spoke of the cycles of life and that meditation and relaxation was important to the benefits of life, but mankind ignored what Buddha spoke of. Jesus Christ spoke of relaxation and that the hurry of life would lead not only to their death, but the death of many. These concepts are not new concepts, but those who spoke of these messengers ignored those parts of the message in favor of more significant words that by their very means would promote their faith, their religion, their belief. But this is not what God is asking of his children. No one must come before God. No one can come before God, for God is everything, and all, the force, the being, the creator.

In the days of the past, you looked to the stars for comfort, for enjoyment, for solace. But today, mankind looks to the stars for conquests, staking out his path to the heavens. In the past, man looked to the heavens to find God. Today, mankind cares less for God and more for his own accomplishments, seeking new planets new discoveries, not for God or mankind but for his own fame. Mankind must learn to accept what God has given them and not look to new conquests, for these conquest will not happen. Mankind will not be permitted to go beyond the moon. You were given the right to seek out other planets, to go to the moon, and look what you did to it. You left behind your symbols - not those of Gods, but your symbols, as though without God you would have done it anyway. This cannot be, for what God has given man is all that mankind needs. Accept what your Father is giving you. Do not look to the stars for more, for this will not be. What happens on this planet has direct effects on other planets, other beings, other lives. We ask this not for our sakes that you cease this never ending quest for the stars, but for your own sake that other planets who mean to live in peace will have to do what they have to do to protect their ways of life. We have spoken of the Enforcers, these being that on the orders of God will come to your planet and enforce God's laws on mankind. This story has been spoken by many and ignored by all. God once again is telling you that you must listen to what he is telling you. Do not seek the stars for what you find in them will not be of your

Message 27

Mankind must accept what God is telling them to do. Do you understand the significance of what God is asking his children to do? He is asking that you stop the wars, the destruction of your planet, but not only the destruction of your planet, but the destruction of yourselves. That by all the hate and fear that is being released into your planet, there is no way that the positive will ever be able to make up the difference. Mankind must turn from the hate and violence that it is giving to one another and turn to the way of the universe. By turning to God and forgiving all those who have hurt and harmed you, you will gain so much more, more than can ever be imagined. God is telling you that through his love and acceptance, all will live not only longer lives but much happier lives. Mankind must learn to accept that those things they hold near are not the same things that God holds near. God is telling you to hold your families, your happiness, others you love close for those are the things that are important, not what kind of car you drive, what address you live at, what designer you're wearing. These things have only importance to those on Earth, not in heaven. When the day comes that you will be asked to show what you have done for others, designers will not be an adequate answer. For what God is asking is that you hold those in your family, those friends, those sick and poor close. By helping and loving, you're improving the world. Mankind will look into the past and see what happens when people forget their God. They will see that destruction will only beget destruction, that loves brings things of positive. God is asking that you look to each other for solace and love - not to those who wish to buy it from you but those who offer it freely. We have spoken of education. It is important for all to understand that what God has said is that yes, learn, be educated, but that mankind should be educated in what is important, not in politics, psychology, engineering, but in God. Tell mankind that God is still waiting to see that his promises are kept. Mankind was asked to include him in their lives, and they did not. God asked that the sick and poor be watched out for, and they were not. God has asked that you love one another and yourselves, and you haven't. Those things that are important have been ignored while those things that are trivial have been kept and not only kept, but advanced.

Mankind must learn that when they, promise something, this means that you will keep your word. You will honor what you have said. God is not a vengeful God. God wants only the best for his children, but just as any parent he wants you to keep your word with him not to lie to him. Mankind will learn those things that are not important. God is telling his children that the time is coming that you will have to show that you kept your word to him, that you abide by his law, not only those laws that mankind has created for their own self interest. Laws are not only to conquer and suppress people, but laws are also to guide people. The reason for God's laws is simple. They are enacted to prevent harm to mankind and all of God's creatures. Mankind must learn that they are not the only beings in the universe but that others do exist and they are God's creations as well. They live in a more conducive environment than you. They have learned that God's laws are to be upheld. God's laws were created not for their obedience, but for their good. Mankind fears what they don't understand. Mankind must learn that there are others in other planets, other universes that do exist just as God exists. But that mankind, being so destructive and harmful to the universe, is not being allowed to find them. Notice how I said find them? Can you see the destructiveness of Earth that others would have to hide from you?

We have spoken of the Enforcers. They are beings from other worlds that will be sent upon God's command to enforce God's laws on this planet. Enforcers are not evil, but to some of mankind they will seem to be. What they will do will cause great scare and horror to those who mean to

control the world. Enforcers will, in effect, eliminate all weapons, small and large. They will take all those things that God finds harmful to what his idea of Earth is. This is a large concept for mankind to understand, but God is telling you that those things you find dear - great, cars, clothes, designers, brands -will all be eliminated, for this is all a part of greed. Mankind will not be allowed to have weapons, for they will be taken away. If mankind finds this hard to understand, they won't have long to wait. This will be in the near future. What things man is planning even this day, are far worse than what the enforcers will do. They are God's creatures. They listen directly to what God tells them to do. God has asked that mankind listen to what he is telling them to do, but mankind's continued opposition to what he is telling you to do will only result in one alternative. God is preparing to take you back to the stone age. People find this hard to understand. Why would God do this to us? It is not of God's doing but that of mankind's continued disregard for what God is telling them to do. You must understand that this is not a threat. God is not doing this to scare you, but to show you that there are other options, not only those that mankind has set in stone. God is showing you that you must prepare for this inevitability, for this is what God will do if you continue to ignore what he tells you. There is no special weapon that can solve the Earth's problems. These problems have been created by man, and mankind must be the only one who solves them. But if mankind fails to do so, then God will have no option but to do it for you, with these consequences. All mankind must learn to accept that all are brothers and sisters of God and that there is no one place, one country that is greater, than the other. There is no faith, no religion that is greater than the other. There is no race greater, for you are all God's creations and made in God's direction. God does not make mistakes and as such no one should ever feel as one, for all have a reason for existence. We understand that this seems strict and that you're being blamed for things that you had nothing to do with. But mankind must learn to accept that all beings have responsibilities. You have elections, votes. If you don't have the power to make the change, then it has come time to take the power to make the changes. What God is saying is that you have little time to make the corrections in your lives. For if not done soon, it will be too late. The wheels will be set in motion and that there is nothing no one will be able to do to stop this from happening. People ask what can I do to stop it? Simply accept God into your life. Ask God for the guidance that you need to follow his laws. Accept all things good and bad, love one another, love yourselves, and watch out for the sick and poor. These are God's laws, not yours but God's laws.

Mankind sees that the future is full of disturbing events, and those who are true followers of God will have to suffer. This is so. But what God is telling his children is that on this world you were only here as visitor. On the next you will live your lives as they should be lived, with God as your Father. Things will happen that will call all to question God's existence. It is important that you remember and keep your faith. God is always with you no matter what pain or suffering you experience. God is with you helping, showing you his salvation, his hope, his world. Go into the world. Show all that God is love and that through love you will see that the world will change for the better. Love is not the only thing that you need. You must have faith in God also. Through God's love and understanding, all things are possible. There is a future full of despair, but there is a life after this one full of hope, love, acceptance.

Let's talk about today, this moment in your life. What would mankind say? That they knew that God was with each of them at this moment in time? That what God is asking is not that hard? That they listen to what he is telling them to do? What would mankind think if they knew all they had to do was to start talking, to start listening to what God was saying to them? Do you think they would accept it as God or not? We understand that it sounds strange that God would speak

to all, but that is what he is doing. He is speaking to all who will listen to what he is calling them to do. There is no secret handshake, no secret signal that God must be given to acknowledge your message. For God is with each and every one of you all the time. Do you think that he is unaware of what you're doing? He is aware, but what mankind has been told throughout the ages is that God is not to be spoken to and that you must use messengers or guardian angels to speak with God. The only part that is true is that there is a being called the Holy Ghost. Through the Holy Ghost, anyone can speak to God. Mankind will learn from this book how to speak to the Holy Ghost, how to heal themselves, how to cure themselves, how to communicate with each other. This is not magic or mysticism, which are those gifts that God has given to all mankind since creation. But for whatever reason mankind chose to ignore them, to forget them, to move from what God had told them to their own way of thinking. There is no need for medicine in God's world, for you're able to heal yourselves without the need for medicine. Mankind must understand that this is not about you or me. This is about God and God's powers. God is the only one who has the power to heal, not you, not me, but God and God's healing powers. All in the universe understand this and use these powers not for selfish reasons, but for those reasons that were explained to them. Let's start by doing a little experiment. Close your eyes and tell me what you see? Nothing. That is why you have seen that in the future this is what you will see if mankind refuses to do what their God is telling them to do. Listen to what the messengers of God are telling you - to follow your Fathers words. Do those things that he is asking for. The only positive that you will see will be for your own benefit, not others, but your benefit.

Message 28

There are many things that mankind will have to accept - those things that you do not or cannot accept, things that challenge your current way of thinking, and things that challenge your beliefs. All of these things will have to be accepted for this is what your God is asking of his children. Mankind thinks that with all the education, all the experiences that they have risen above their God, but this is simply not so. God has been with you since creation, and even before, for what God wants is what God will have. Mankind will have to accept that God is asking now, but in the future God will demand, and when God demands it will be. You must ask yourself, does this mean that I have risen above God or does this mean that I have fallen from God? God wants all his children to understand that he is with them at all times. You don't have to be a certain way to be his child, for all children are his. The future mankind will continue to ask is there a God, what does he want from us, what does he expect from us. The answers are simple – yes, there is a God, he expects you to honor your promise made to him. Mankind must be reminded of the promises that they have made to God. They promised to protect the sick and the poor. They promised to love one another. They promised to put no one above God. They promised to protect the planet. They promised to love themselves. These are not hard promises to keep, but nevertheless they must be kept. God shows you a future full of despair, pain, and suffering, not just for mankind, but for the universe because this is not what God wants from his children.

Mankind must learn to accept that those things happening to them do have effects on others on other planets and other worlds. All are God's creations and suffer the same as you. Mankind must learn to ask God's forgiveness, for this is the only way to true salvation. For the sake of your planet and all things on this planet, you must ask God's forgiveness. You must honor your promises made to God, for without the changes that God is asking and without honoring your promises God will have no option but to send the Enforcers into your world. Do you not see what God is asking of his children? True and noticeable changes must be made very soon or mankind's options will be limited. The Enforcers are not military forces. They are beings from other planets that will be asked by God to come to Earth and enforces his laws on mankind. This is not how God wants to do his children. But just as your Father would do, if you break his rules and engage in activities that could harm you or others, your Father would come in and take away your toys until you could play with them the way your Father wants you to. This is how God will be. This is not because God is angry with mankind. This is not because he is upset with you, but this is because mankind must learn to accept God and his laws. Some of you may feel that this sounds science fiction, but God is telling his children this so that they will begin to prepare for this. God does not tell mankind things without a reason. He is sending you this message because the time grows near that the decisions of mankind are affecting other beings, other planets. This cannot be for the other planets and other beings are living according to God's laws, with respect and love for one another. This is not so of mankind. Listen to what God is telling you. Don't look to others for courage or strength because God is with you. He is all the courage and strength that you need. Honor your God by accepting him into your life. Honor your promises made. Accept yourselves and others as they are brothers and sisters in God. God brought all into creation. Scientists will continue to question creation. This is fine, for God knows creation because he did it. But when mankind thinks that they can become God, they can create worlds, they can give life and take it away as God, this is where God must draw the line. Things that mankind continues to do, professing their love of God, by destroying those things that God holds true, is wrong. By professing their love of God, by killing one another is wrong, by professing their love of God, by

destroying their own planet is wrong. Mankind must learn to accept those gifts that God gave to his children and understand that without those gifts mankind will cease to exist. What mankind has already done to their own planet has hurt it beyond repair. Things done today can slow the effects that have already been done to it. But nevertheless, the damage has already been done, and there's nothing no one on Earth can do to counter it. See, mankind has chosen many roads, all leading away from God, but God is still with you. Accept that your God loves you so much that nothing you do can stop his love for you. But in the future, things will happen not of God's doing but of mankind's doing that will make all question his existence, his love for you. All must know that he will be with you even during these times of great tribulation. Mankind will see that God's love is immeasurable, that God's love for his children is unshaken, and that mankind will have to accept God's love, just as they must accept the love of others and the love for themselves.

Mankind has seen what happens to those who ignored what God is telling them to do. Look to the Romans, look to the Vikings, look to the Inca's. They were all great civilizations, but they ignored what God told them to do. Now look at them, gone from this world. Mankind must learn to accept what God is telling them to do. Look to the past to see what will happen. God is not threatening mankind, for this is not God's way. What God is doing is showing mankind that this will be what will happen if his voice is continued to be ignored. Mankind has seen many great civilizations that have vanished because they failed to listen to what God told them to do. Modern civilization feels invincible, but this is not so. You see how fragile your civilization is that the dependency on the Internet, telephone, television, mobile phones, energy. Your civilization is very fragile, not only your civilization but those creations that are dependent upon you for survival. God sends you this message because the need is great. with the continued destruction of those things that God holds near and dear to him. God's creations are all valuable, not in money but in love and happiness.

We have spoken of many things, things that God wants to share with his children. These things that God holds close to him, for you're his children. But just as all children, you must be shown things, shown what things are important and what things are not important. Ask yourself have I done what my God is asking me to do. You all know the answer to that that. We have all failed God, for what God has asked, has not been accomplished. just as the promises made to God have not been fulfilled. Mankind must learn to start working on those things that it has promised God to do. To accept yourselves. This sounds so easy, only mankind can make it hard to do. There is more than only saying I accept myself. You must learn to love yourself, for you are the creation that God created. This should be enough for you to love and accept, but that throughout mankind's existence they have showed others that they were not worthy of things, from love to money, power to health. They were not worthy of those things, things that they had no power or ability to change. Yet they found a way in which they could make those feel bad about themselves. Through these feelings they were not able to communicate, to show their true light, the light from within, the light of God. These small things have shown mankind that through the negative, they could control the masses, forcing those people to do as they were told to do all in a struggle to be accepted, even though through God they are all accepted. God is the only one who anyone should be concerned with being accepted by.

You must learn that through your own acceptance you can change great forces from negative to a more positive light, the positive light of God. That there is no need for depression, despair, anger, or hate. All of these feelings come from negative and are only beneficial to negative, not to God's positive loving light. Those forces that mean to control people through the negative must understand that God will not permit his children to be controlled in this way and that all have a

universal right of existence. No one, no country, no planet has the authority or the right to control anything through negative forces. Your attempt at gaining power through the use of the negative will be abolished by God. This is a warning to those who feel they can control the negative for their sole use and control. You must listen to what God is telling you. This will not be. Mankind must listen to what God is telling those who use the negative to control others. This is a force, the force of God. It is of God, by God and for God. Those who do not mean to use this will not understand that God is in control of it, but those who are seeking to use this will understand that God is so much above what you're doing. There will be only one result of this. God is telling you do not attempt to control the negative powers on this planet for God will not allow this to happen.

We have spoken of positive and negative. There is no need to explain more. Those who are attempting to control the negative on this planet will not be permitted because it has other effects on other planets. Those planets are living as God has instructed them to live, not as this planet has lived. As a result, those who attempt to control the negative will understand what is meant by the Enforcers. The Enforcers will be sent if further exploration of the negative is made. You must cease this futile attempt at mastery. For it is not up to you to use these forces. Only God has the authority to use these forces as God intends to use them, not as mankind intends. God embraces the sciences, for this is what God has intended that mankind do - to learn about themselves, their planet, their universe. But what mankind must understand is that the universe is made up of so much more than what you realize. The events that you create on this planet have direct effects on other planets, other beings. Through your own destructiveness, God must ask that you limit your exploration of energies and the universe. These must be off limit to mankind until the day that mankind is able to live in unison with one another in a peaceful world, without the destructive forces that you have unleashed into the universe.

Mankind seeks to learn all that there is to learn. There will come a day that mankind will have learned everything. Does that make you God? There are some things that mankind will not be able to comprehend, things that are out of the mind, beyond the universe, things that God has created for God's use, not for mankind or others throughout the universe. Mankind looks to the stars for beauty, for relaxation, for energy, for love, but mankind must not look to the stars for God. This will not be. God is beyond these stars, this universe, beyond all universes. God is universal. Throughout the ages, mankind has worshiped God by holding his head up to the stars. Mankind can continue to do this, but mankind cannot continue to reach for the stars, for your destructive ways will only bring more despair onto your planet. Mankind must learn to look unto themselves for learning, learn to accept one another, learn to embrace peace, embrace love, embrace joy. These things God is asking you to do. Not to continue to look to the stars for these things, for they will only be found on this planet. You must learn to live and coexist with one another in peace and happiness. But that through the destructive ways of mankind will only limit what it can participate in the universe. Those seeking other beings, other planets will not find them. You must bring your world into the fold with other planets, other beings. Live in peace and happiness.

You stretch the imagination with what you seek to accomplish and yet you cannot learn to live together. You seek new worlds, new planets, and yet you war against one another. Find the peace that God offers you all. Turn from hate, and love one another. Accept all as your brothers and sisters. Accept all that they have to offer as gifts from God, not your sole possession, for there are no sole possession. On this planet you can own material things, you can have possessions, but on the next you will not. You cannot bring them with you. They are not for you to leave to your

children to their grandchildren. They are the possession of the creator. When God created you, he created you with all you needed, a planet full of life, full of vegetation, full of sustenance. You were given gifts that could help you live a better life. You were given gifts that could heal you. You were given gifts that could help you communicate with all of God's creatures. Those who seek the end will find the end. Those who seek the beginning will find the beginning, and those who seek God will find God.

Message 29

There comes a time in everyone's life that they must make a decision on what way of life they wish to accept. Do they accept what their God is asking them to do or do they continue on the same course that has led them to where they are today. This question is being asked of all of God's children. Do you continue on your same course, the same course that has led you to where you are today or do you follow what your God is telling you to do? This is, at times, a hard question for most. For a few, there is no question. But let's be clear. For most it is a difficult question to answer. God is showing his children a course, a path, a crossroads in their life, one that must be accepted or denied. There are only two directions to follow. The reason God is asking all these questions is because the time grows near. All of God's children will have to make a decision, which way to go. God is not asking this of you at this time, but what God is saying is that all will have to make a choice on the day of contemplation. On this day, all will be asked to contemplate on where their life has taken them. Has it taken them on God's path or others paths? God is showing you that you all have paths, roads to follow. There are sometimes more than just two, there are three, or even four, but only one path to God. Those who contemplate, who must reflect to see whether or not they are believers of God, must ask themselves, who am I? Where did I come from? Did I achieve all that I did on my own? Through my own determination? Through my own knowledge? Or were there other forces at work, did the other forces assist me in any way? If you acknowledge other forces, then you must learn to accept God. For God is those other forces. Mankind has seen that they are strong and that they have the knowledge to recreate. They have abilities that others didn't. Mankind must accept that God has given them so much. Through these gifts that God has given them, they are who they are. They are where they are because of God. Miracles happen every day, some small, some large, but nevertheless, miracles do happen. God is asking you where do these miracle comes from? Do you create them? Do you generate them? You know where they come from. They come from the force, the being that is God.

Mankind has seen so much in such a short time. Mankind continues to question what they are doing to the planet. What they are doing to each other? What they are doing to creatures large, and small. God is asking mankind to reflect on all things, good, and bad. Look to the bad to learn what must not be done again, to learn from your mistakes. But also look at the good things, things that brought the planet happiness. You will see what those great events were peace, from wars, reunions with family and friends, things that have brought joy. Look to the positive things that have happened. Dwelling on the negative can sometimes create just as much negative as the negative event did. Mankind must learn from their mistakes, but they must not put them on a pedestal, to be worshiped. They must be learned and put away. For by dwelling on those negative things only reinforces the negative. Pain and suffering brings more pain and suffering. When one is killed, it not only affects the one who is killed but it affects the many friends and family of the one killed, bringing four times the amount of negative. If positive would only work the same way. If people would bring happiness to thousands instead of three. Everyone must understand that there are only two forces in the universe, positive, and negative. These are the only forces, the building blocks of the universe. Through those uses for good, and bad, create positive, and negative energies. That the importance of the positive might be understood. By attempting to control those forces, will only end in failure, for all those in effect. The forces of good and evil have been in existence since creation and are a result of the creation. These energies are throughout the universe. Mankind will learn to accept what God is telling them. This is not a

matter of accepting God. For it is more about accepting mankind, for without God there would not be a mankind to accept. Look to one another. Find the peace love, joy, happiness that is God. Accept yourselves. Look only for the positive in all that you do. Accept what God gives you each as your gift from God the Father, creator of the universe.

People continue to look for love. They seek love from others, from possessions, from animals, from all things. Where people must learn to look for love is from their God. God is within each of you. Show God love by showing yourself love. There is nothing wrong with showing yourself love, for this is a part of what God created you for. By accepting and loving yourself, you're showing your love for God. God is the only one who understands you, for he understands all; he created all. There can be no question of his existence, of his love for mankind, of his acceptance of all. God shows all his love for mankind, shows all who will listen to what he tells them to do. They must learn to accept what God is telling them to do. Through this acceptance, they will find new worlds, new beings, new universe. In those universe you will discover that God has created so much more than just one planet. He created all planets, all beings, all universe, for they are all his creation.

Throughout the centuries, mankind has sought solace from their faiths. By listening to those who spoke for God, they would be closer to God. All must learn that faith is an end result that God is within each of you. There is no need to honor him by going to services that speak of him. They must learn to accept him and that he is a part of all things. You only have to look to your friends, look to your loved ones to find God. For without your God, they would not exist either. God shows mankind all these things, not because there is a need to prove his existence. For those who believe, will believe. Those who continue to refuse his existence will continue to refuse his existence. There is no need to convert them, for there is no need to convert. They are already a part of God, whether they acknowledge him or not. This is the kind of love that God has for his children. An orphaned child is still someone's child whether they have a mother or Father. They are still someone's child. This is how God feels about his children. There is no need to prove that he is your Father, for he is, and that is all that must be said. If they choose to acknowledge that God is their Father is completely their choice, but it does not affect the outcome. You look to the future for happiness and growth. This is what God is hoping for mankind, but with the outcome of events happening every day do affect which path his children will follow. The importance of God's story of mankind must be shared with all who will listen. Once again, man asks that God prove who and what he is, for this is not for man to question, what, or who God is. All know that he is the Father, the creator of the universe, the creator of all things. Love and accept him for that.

You have seen the images on the television showing saucers from other planets. Mankind is not alone. They have never been alone. There are those from other planets, but until mankind can live as one, can show love and compassion, they will not communicate with you. There has been much speculation that faiths would question the existence of other beings. God is telling you that they do exist, just as you exist. It is not mankind's place to accept what God is telling them. It is only their place to do what God is telling them to do. Peace, love, joy and happiness are all parts of your loving and accepting God. God loves all beings, from all planets, for they are all creatures of God. God is the universal God, creator of all things in it. Faiths have not acknowledged this, for it is not faith's place to acknowledge what God has given. It is God's place to acknowledge. We show you a future full of despair, hate, intolerance, not of God's doing but of mankind's doing. These things that continue to drive man toward this end. These things have been stated over and over that mankind must learn to accept all for they are all God's

creatures. Mankind being so destructive, so hateful, so full of negative energy - these energies must be changed over to positive before others will attempt to communicate with your civilization. Throughout history, they have been here. They have seen you. They have witnessed all of human existence. For there to be talk that they do that, they don't. It is not mankind's place to argue this point it is fact.

You see that there are things that mankind must understand, must accept, must do before they will be welcomed into the fold of the universe. There must be true change. Mankind must learn to live and accept one another as what they are, brothers and sisters in God. God's love is all that all need. God is showing mankind that they must listen to what he is telling them to do and that ignoring what God is telling them will only lead to one direction. God will be with you, no matter what, but there are easier ways to get there than following the road that mankind has set down for it to follow. Plants and animals rely on what mankind does. Do they follow the road that God has asked them to follow or do they continue down this path leading to mankind's ruin? Plants, and animals are the first to go, then the people. Is this what mankind wants to experience? A planet full of death and despair? It is not the easiest thing to do what God asks, but nothing in this world has been easy. You accomplished great victories, the ends of great wars, the cure for great diseases, the peace, and love for God, but these things have been forgotten. For now, the path mankind runs toward is full of even more pain and sorrow. Mankind should understand that God does exist, that he has always existed, that he will always exist. Nothing they can do or nothing that will be done will change this. Those who seek world domination through unscrupulous means will end only in one way. Listen to what your God is telling you. Search for peace, love, happiness, and strength from knowing that your God loves all of his children. Great men have spoken of God, spoken of God's love for his children, spoken of great events showing that God does exist, but all continue to question these great men. Look to the east, and see what happened to those who questioned his existence. Egypt was a great civilization that failed to listen to what God was telling them to do. Look to Greece, another great civilization that failed to listen to what God was telling them. So is the course for all great civilizations that fail to listen to what God is telling them. This is not the way that mankind must follow. Listen to what God is telling you. Preach love and tolerance among my children, not hate, and fear. This is not what I want from my children. All have the right to exist with me in their life. No one, no being, no government, no faith has the right to restrict God from anyone. This is not a matter for faiths to argue. This is a moot point. God exists with all of his children. There is no one special, no one excluded from his love. Those who profess hate are entitled to only hate. Those who profess fear are entitled to only fear. Those who profess love and happiness are entitled to only love and happiness. Do you understand what God is saying? This is how easy it is that if you disagree with people, if you dislike people that is your right, to feel those feelings. But that does not give you the power or the right to reject those people, for they are all the creations of God, and as such must be accepted by all. God continues to speak of the power of acceptance, but mankind must learn that the acceptance of oneself and the acceptance of others is great. This takes power away from the negative that through these positive and powerful acceptances, can have a great effect on the direction of the world. Those who seek to control the world through the uses of negative, will not be able to maintain their power with love and happiness, joy, and peace. All positive events that happen on the Earth have a positive effect on the negative. The pendulum that swings from the positive to the negative must be kept in alignment. At this point in human history, the pendulum is well into the negative. There has been little to no positive for quite some time. If you look back in time, you will see that the last positive event was the end of the Vietnam War.

This war was not that large, but many died from it. All wars have a very negative effect on the planet. Those who profess national defense must learn to accept the fact that there is only one defense, and that is the defense of all God's creations. It is important for mankind to make peace and love an important issue in your day-to-day life. Just as important as the pay raise, is the importance of peace and love. Laws that restrict happiness must be abolished. Mankind must learn to accept the love that God has. The love that others have. The love for oneself. Love in any form is acceptable. No matter what your moral beliefs are, all people are God's creations, and no mortal has the right to make the judgments. Many profess to be motivated by the Bible, for the Bible is not the word of God. This book is the word of God and must be listened to. God is not a constant. He does not create and then leave. He is a God of change, a God of love and tolerance. He is with all at all times. Mankind must learn that there is nothing wrong with communicating with God. What is wrong is when mankind chooses not to communicate or even ignore what God is telling them to do. God's children know what to do. They understand what is good and what is bad. You must learn to accept all as what they are, God's creations. Even further down their life, they have strayed from God. It is not mankind's right or power to judge them. It is between them and God, no others. Love all, no matter what. Show the love that you have for God by showing it to others. Faiths must learn not to judge others, not to judge what God would say, or want, for this is only up to God. What God is calling on all faiths is that they go back to why they were created. To help God's children communicate with God, not to judge those who have strayed from God. God's house is God's house, but God is with all. There is no need to go to this place or that place to worship your God. All you have to do is accept him, listen to what he is telling you to do. Symbols are symbols, rites are rites, but God, is God, and this must be acknowledged and accepted. There is no one who is superior to God.

Message 30

People must take a look back to see where they have come from and where they wish to go. God shows you there are many paths, paths not only on this plain, but on other plains. Even in heaven we have paths that we must take. Life and the afterlife are still aspects of God's realm. We have things that we must attain so that we can develop spiritually. People question what is the spirit world like. Just ask God. There are many types of spirit worlds. There is the spirit world of the reckoning. On this plain you learn to understand things that must be realized before you can achieve a higher realm. There is the majestic plain. On this plain you learn to accept what others say about you, to accept, and learn from those things that have been said about you and things that others will say about you. This sounds strange that there are plains, but this is all a part of God's world. You will learn to accept that things have been set out for you, even before your birth. You have the ability to accept them or not. That is of your choice, but nevertheless you have a destiny that God has set for you. Along the way you will stray. You will follow paths that others have laid out for you, but there is always God's path, just off the side of your path, waiting, beckoning you to follow it. All follow these different paths. That is normal. What is not normal is to continue to follow those other paths, even after God has told you of the other path. Those who feel that there is more to life than what they have must recognize that there is. There is always more to life than just what you have at any given time. There is God's path. On this path, you learn not only how to go through life at ease, but you will learn to love and accept others. You will learn the way of God, that through acceptance of all things you will find peace from within. Don't question God's path, for on this path you will always find things that you must learn to elevate your soul to higher plains. Mankind does not need to understand God's world, for it is God's world. What God is doing is giving mankind a peek into it, to show you that not only does God exist, but that the things all must learn, must understand, must accept. In God's world, there are many paths. The path of least resistance is that path created by God, but just as life there are other paths. It is important to understand that following a path is not wrong. What is wrong is to follow your own path, for all must accept and learn to live with others, no matter what your feelings are of them. You must learn that through acceptance, you can find God.

We ask ourselves, how can this be. How can there be so much more than we have been told? what you must tell yourself is that it is not your place to question what God does. It is only your place to accept what your God is telling you. No one should ever fear what their God tells them. God just as your Father will only tell you things that you need to know, things that you need to understand. Through his love and through him you will find what you're craving. Those things that you truly desire, things that no others know, sometimes not even you. Peace comes from many places. It is important for mankind to understand that true peace comes from God. You must understand that the solitude, the loneliness that you feel at this time is only temporary. Those feelings are to be expected because in this life, you are to experience things that you could not experience in God's world. These things are a part of life on this planet. By having these feelings, you're learning things that will help you on the next plain. Life is a wheel that spins around and around. Sometimes you're at the top, while other times you're at the bottom, but you must understand this is a part of life. Life on this realm, this planet, is meant to engage you in ways that in God's world, you couldn't. This message goes out to those who contemplate taking their own life. This should never be an option. God understands that there are times that the pain, the suffering, the pressure becomes, too great. It is not as many profess that you will not go to heaven. What God is saying is that you need to place all your faith, all your trust in to God. By

asking God to take this pain, this suffering, this pressure, you will see that things will start to get better. If it is your time to cross over, this will assist you in your final journey. But taking one's life will only bring more negative to this world.

Mankind will see that in the future there will be many events that question all things, God, paths, destiny, hope, pride. But what mankind must understand is that these events will not be of God's doing but of others' - others who have varying reasons for accomplishing these events. Some hope to bring attention to their cause. Others will be out of revenge. Others will be from things that mankind has done to their planet. All of these things will be of mankind's own doing. It is important for mankind to see that their God is with them through these trying times. He stands with them. He will help pick them up, help steady them on his path. You look to the sky to find God. It is important that you look to yourself, find God within. Listen to what he is telling you. Follow the path that God has laid out for you. Accept not only God, God's path, but God's love. Show others that God does exist. Show all that God love can cure all.

God's paths have many courses. Some are acknowledgeable while others are not, some easy to navigate, while others are much more difficult. God understands this, but it is for the spirit to also understand that these paths are laid out for the soul to acknowledge and navigate. Mankind thinks that they are the captain of their own destiny. It is important for mankind to understand that it is the soul that guides you. Some feel that they control their own lives. It is who they are, what they are, but in fact it is the soul that guides you. Sometimes your soul needs to be reminded what God wants from it. People come and go, leaders are made, and leaders are removed. Cities come and go, but the soul stays the same. Lead only by what it is required to understand, to acknowledge, to gain elevation from this plain to the next. Ultimate perfection is reserved. There is only one who has gained that position, only the son of God, Jesus Christ ever achieved ultimate perfection. Souls all strive for this. Mankind must learn to not only communicate with God, but also learn to communicate with their soul. The soul is you. The only object that is you that no one has access to, not even you. But that does not mean you can't, through learning to listen, to interpret, to acknowledge what your soul is telling you to do. Mankind must learn to accept these things, things that God is telling them to accept. The soul to many is an emotion, an aspect of one's life that they have no concept of. They understand that when they pass, the soul is released. and moves on. Some faiths believe in reincarnation, while others believe that your soul goes to heaven or hell. Mankind must learn that there is no hell. The only hell there is, is of your doing, your contemplation on this place. The truth is that hell is on this Earth, this planet. The hate and despair and violence is what you would call hell. In God's world there is only perfection. This perfection is God, no other objects, or things matter for all is God. When you understand that God is perfection, then you will begin to understand that in God's perfection all things have a place. Those things mankind feels are evil or bad have a place. This does not mean that they are encouraged. It simply means that they have a place. We have spoken of God's positive and negative. It is important that mankind understand that you must become more positive in your own life. Through this difficult at times process, you become more positive. You will have access to things that as negative you will not have access to. Some call this becoming God like. God, on the other hand, calls this heavenly. By becoming heavenly you gain access to a higher spiritual realm.

Mankind has brought such ideas and fear to themselves all in the name of God. It is important that these stories be corrected. God never created the devil. This is a myth. There is evil in the world, this is true. But this is what is called negative. There are many negative aspects to the world, people, places, events, countries, but it must be understood that they have a place for they

are negative. For there to be a systematic change from the negative to positive, positive events must take place. We have spoken of asking for forgiveness, not only for yourself, but for them. By doing this positive note for them that have only known negative, this can help convert them into positive. They themselves can help by doing positive aspects themselves. Helping other souls to find doorways to heaven, this is when the doorway to heaven or God's world is opened, usually for a very short time. At this time positive souls can transfer to God's world. Learning to ask for forgiveness can assist. Correcting those events that they caused during their life time can assist.

Mankind must learn they all must assist souls cross over. Some cross quickly. Some have yet to understand that they're dead, while others cling to this place, this time, fearing the unknown, which can be understandable through all the miscommunication about God and heaven and hell. Mankind will see that there is less confusion on heaven than at this point in human existence. In God's world things are not as complicated. There is no need to have secrets, confusing plans, obstacles to pass. In God's world all is understood. There are things that we haven't learned, failed to accept, failed to achieve, and thus we return to correct those events. You must not fear heaven for this is the one place you will all be accepted through God's love for all things acceptance, and love are all. God has said that you are all my children. Love and acceptance are all that is needed to see me, to find me that was never lost, for it was you who was lost I have been here all the time, waiting patiently for your return. Rejoice in the fact that your God loves you this much that he would wait patiently for your return. There is nothing you or anyone can do to change that. Your deeds done on the realm, this planet, are nothing, for all can be forgiven if only asked for. Acceptance is an easy word with multiple meanings, acceptance of yourself, acceptance of others, acceptance of your God, acceptance of a world without hope, acceptance of a world without pain. Acceptance of all things. As you can see, hope runs hand in hand with acceptance because without hope there would be no acceptance. People will see that by hoping, things will be better. By hoping, positive will be. Good things come from hope, as with other positives hope, love, joy, happiness. You must look to the future full of hope, full of happiness, full of love, for these are positive. Through the positive, you can have a great effect on all things negative, the earth's negative, your negative, others negative. God shows all that negative can be adjusted through . Positive must be applied to those things negative. In doing so, small events, activities can change the negative greatly.

Message 31

You have seen what happens when God is forgotten. You must not allow this to happen. God is within all. You must learn to accept that God would not allow anything to harm you. That is not to say that things won't happen. It is saying that God is with you no matter what. He will be there to give you the support and comfort that you will need to meet all things that challenge you. God shows all of his children ways that they can protect themselves, ways that they can protect not only themselves but their families and their loved one. When God asks that his people talk with him, this is a part of the reason. God has things that he needs to tell you. You should rejoice in this fact that God would take the time to tell you of events that will challenge all of his children. It is important that his children learn to listen for God's voice. To each, God will come in a different way, so there is no set way that God will communicate with you. Some feel that God speaks with lightning bolts. Some feel that he comes in the sky. To each, he will come to you differently. What is happening is that you are communicating with the Holy Ghost. The Holy Ghost is how all mortals communicate with God. This is to be understood and accepted. God wants his children to include him in their lives, to talk with him daily, to understand that he wants to be a part of your life, to share in the joy, as well as the despair. People will see that by including God in their lives, their lives will become so much the richer. With your hopes and aspirations for the future God wants to know about them. He wants you to tell him about your hopes, your dreams, your happiness and your despair. All these things show God that you're alive and that you exist. Not only God exists but you exist in God's world. God has asked that no one be above him, that no idol, no person, no things, should ever be placed above God.

This is important to understand that no one, no being, no saints, no idols are to be above God the Father. God is all anyone needs and through God all is made, all is taken, and all is given. Importance of this is that your God showed you the way into the life that you have now. You may have taken the wrong path in your life, but he is still with you here and now. All anyone has to do is to ask for God's forgiveness. They include him in their lives. They accept that God creator of the universe is the only God. Mankind will see if they follow God's light that the end is not the end but only the beginning of a new life, one in the folds of our Father. Rejoice in this that our Father who loves us with all that there is shows us that through his love and acceptance all things are welcomed. No one must be turned away, for this is not God's way. This is man's way that through mankind man has been judged. This belief that only these people are accepted, that only these few have the right to enter heaven are wrong for all were created by God. It is up to God who is permitted to enter into God's world, not mankind, not mankind's faiths or religions, but God. Only mankind could make God so complicated, so confusing, so misunderstood. God is not complicated. There are no secrets to God. There are no rites to God. There is only a simple and profound faith of his existence, and that through our love for him and his love for us, all is right. Mankind in its need to govern to rule others has created these so-called laws of God. God's laws are simple. There is the law that you must accept him as the one and only God. There is the law that you must not kill one another. There is the law that you must accept others, the law that you must accept yourself. There is the law that you must include God in your life. There is the law that you must watch out for the sick and poor. These laws are not complicated, nor should they be made complicated. What God is saying is that through a positive life, by doing positive things in your life, you will have a good life, a heavenly life.

Mankind sees that the future is full of despair, but what God wants you to remember is that there will be good. There will good created by good people that positive things will happen, not only

the negative, but that it is important for God's children to see that there will be a need to do positive things, to make a difference in others' lives. Through these positive events much-needed good will arise. It is important that mankind remember to do the small things, things that mean a sacrifice in your life. Doing these things this will also increase the positive in the world. God wants all to remember that he will be with you all during these trying events. During these trying events, you will need him more than ever. Make a promise to God that you will include him in your life, that you will always remember that he is with you. Through your love for God and through God's love for you, all things will be right. Rejoice in the fact that God shares his love with all.

God also wants mankind to remember those things that he loves as well, the plants, the flowers, the trees, the animals. All of these things are loved by God and as such must be learned to be revered and not continued to be destroyed. Plants and animals are just as man. They must be accepted by all. They have a life cycle as well. God respects and loves these creatures, for they are all God's creatures. In your life, you must make sacrifices for them as well. Remember that all things have been created for man by God and that he allows them to exist. As such, you must learn to treat them with the respect you would treat your family. Plant trees, plant flowers, watch them grow. Then you will understand that flowers, just as men, have paths that must be followed. On these paths, some will die, some will be born but all follow a path that allows them to grow and develop. This is what God is asking of mankind, that you grow, that you develop, that you learn.

God has showed mankind many signs of the future. He has shown mankind signs of the past. There are more things that God is wanting to show mankind, but mankind must be to a point that they will allow what God is sending to be received. Mankind has asked for many things from God. All those things have been answered from God. Some were answered how mankind wanted it to be answered while other times, it was for God to decide if it should be answered and how to answer it. We continue to speak of the importance of communication, communication between mankind, communication between mankind and God. Communication is important, not just for what you receive but sometimes for what you give. God ask mankind to communicate with him, not only to know how you're doing, but to also see how the world is doing, what the people on it are thinking, feeling. We have spoken of angels, God's messengers, and what their existence is meant for mankind. The angels bring many stories, ideas, feelings, warnings, great events. Angels are from God. They show mankind that there is a God. Some angels carry ominous messages of disasters. Mankind must learn to accept what the angels are telling them to do, but it is also important to find out where the angels come from. It is important for mankind to ask them, where do they come from, who is sending them, why are they being sent. Mankind will see that in the future there will be many events that will change mankind's perception of faith, religion, being. But what mankind must accept is that God is sending his angels to announce these events. Some events of mankind's making cannot be announced, for this is what God means by "of your making." Some events cannot be told for it is your place to go through these events, and with hope you will learn that these events and those leading to them will not be repeated. But as we have spoken before, civilization must learn from the past, for some events repeat themselves, over and over again. Events changed but the event itself repeats over and over. God is telling mankind to listen to what God is telling you. You must put your differences away. You must learn to accept all things, those that you understand, and those that you don't, learn to listen to what God is telling you, rejoice in the words of God.

You see that there are many paths to follow. Some of the paths are lined with false and misleading steps that will lead you away from God, but what mankind must accept is that there are other paths, paths that have been laid down by God for you to follow. From time to time, you must ask God are you going on the right path, and if not can he show you the right path, his path. Do not fear that God will lead you astray, for God is the only one who can point you in the right direction. Family members, friends, loved ones, who feel they are doing what is best for you sometimes don't know about God's path. By following God's path, life will begin to make sense. Things you have feared, things that meant nothing to you become meaningful. God wants only the best for all of his children. God has only one means for you and that is the best that you can be. his path, you will be led to him, God the Father.

God is asking you all to follow his path. If you feel that you have gone astray that is ok. Ask God for guidance, ask God to point you back to his path. It is important for mankind to understand that God is always with you, but you must talk with him. Without talking with him, without including God in your life, you will never know if you're on God's path for you or not. There are those who struggle their whole life searching for God's path without finding it, simply because they never asked God to point them in the right direction. What we must learn and accept is that God is the power, the force, the all. God knows all things. God is all things. We feel that at times he has forgotten us, has done things that harm us, but what is important for mankind is that first we cannot question what God does. You may feel that God's actions were hasty, were hard to understand, but what we must learn to accept is that God is all. You, I, no one has the right to question what God is doing. There is nothing wrong with being upset at God, but what you must accept is that at this time in your life, at this moment in time, it makes no sense. It was too harsh, too cruel, but through this event the action you will learn to accept it as God's choice, maybe not on this realm, but on the next. When you lose someone that you were close to, you have to have the faith that you will see them again, not in this lifetime, but in the next you will see them again. We cannot understand why God does the things that he does, but this has been the question since creation. No one has the answer for this is God. We send this message so that those who question his existence will see that there is no question that there is a God. He does know all. He does loves us all. For through God's love you will see that there is nothing left behind. All have a place that all will be seen again. In God's world, or as many call it heaven, you will have many tasks that must be completed. Heaven is not only for relaxation, but there are tasks that must be completed. Through the completion of these tasks, our souls are elevated to the next realm. We have no control over this, for this is in God's world. Through these elevations, we become more heavenly, more like God. Each life time comes and goes. We repeat ourselves over and over, attempting to gain a higher realm.

Message 32

There are many ways that God wants to speak to his children. He wants to talk about the things that they can do to stop the destruction of their planet. God also wants to talk to them about how they are living their lives. He wants to talk to them about what is expected from them. Mankind must understand that what God is asking is not that difficult to do. You see what is needed and yet mankind continues to question what is happening. You should ask yourselves, does it matter what the cause of the destruction is. You understand that it can be many things, so why not stop those many things or better yet stop only one of the things then notice if there is a change in the effects on your planet. Mankind is being asked to make sacrifices for your world. What mankind must understand is that you can make the sacrifices now or in the future. They will not be sacrifices. They will be facts. Those things that are causing the destruction of your world will be gone, but so will your planet. God sees that mankind feels the need to have certain things, cars, electricity, but all of these things are not needed. There are only a few things that mankind needs to survive. Cars and electricity are not among those things that you need to survive. These items are luxuries, luxuries that are not needed for survival. Those who profess that they are in fact needed, need to look back in time and see that mankind has made great achievements without either of these things. It is not only these two items that we are talking about, but so much more. God gave you all that you need to survive. Everything else is not needed for survival, but mankind's own greed. You profess this need to have all things, to master the world, without hope. Unless mankind can turn to God, listen to what God is telling them to do, accept those things that mankind finds hard to accept, all the things in the world will mean nothing without a world to live in.

Wars and hate have brought such strife to God. through mankind's hate for one another you have brought such destruction, such negative to the world you live in. There is only little time for mankind to bring peace to his planet. There is no need to hate one another. There is no need for leaders of this world to become the police force of the world. Without hate and with acceptance, there will be no need to control or enforce anyone, for all will live as God has asked you to live. Through your hate for not only others but your own self, hate that by not accepting yourself as you are with the good, and bad that you are, you will continue on this struggle for power. Seeking praise from those you have conquered. This is a false sense of accomplishment. In God's world all are one. There is no one greater, there is no one stronger, for all are one. God is above all.

Mankind must look to God's world to understand that those things you seek on this planet are false. There are only a few things that must be achieved. Love and acceptance are some. Through love for yourself and others there is not hate. Through love and acceptance there is no need for wars or destruction. God sent you his son to show the world that not only that he exists, but that there must be peace on his planet. Peace in your world is very important. Hate, destruction, killing are of the negative. God is of the positive. Through God's love and acceptance all things can be made whole. Those things you seek are unimportant.

Mankind will learn that through listening to what God is telling them to do, their lives can be so much richer. Through God, all can be greater, kinder, lovable, gentler. Those things some consider weak, but the truth is that it is far harder to be greater through kindness through love, and that to be gentle is far harder than to be brutal. The forces of violence have always been stronger than the forces of love and acceptance, for mankind finds those things that they don't like and destroys them. It is easier to destroy the messenger than it is to accept the message.

Mankind has destroyed many messengers because of the message. Hate and violence have been the answer to peace and love for far too long.

Mankind sees those who profess love and acceptance as weak, but God gives you these feelings for a reason. Through these forces good can be attained. Through these forces the world can find peace. Through God, the world will have peace. God has said to his children bring peace to my planet. Show that I do exist through love by showing others your love for me. God is asking his children that they once again must become soldiers, not for war, but for peace. They must make the sacrifices that the world needs at this time in human existence, for without peace on God's planet, the world will be lost. Those who continue to seek to control the world through negative means will never control the world through negative means. God will not allow this to happen. God is the one force. No matter what you have thought, no matter what you have discovered, there is always God, and God is in control of all things. God is asking his children to bring peace. They must all accept that peace is the only answer. Wars, hate, crime, murder are not the answer for God. There is only one answer and that is peace, love, and acceptance. Spread the message that the end is near. Those who wish it will get their reward. God's children are prepared for this event, but the rest of mankind must prepare for this. Learn to listen to what God is telling you to do. Accept that God is talking to you. Listen to what God is telling you. There is no faith, there is no religion that can be superior to God. All must accept that God is telling them. This not to scare, not to harm, but to show mankind that the need is great. All must turn from their ways and turn to God. Accept God as the only God. Through his love and acceptance all things will be brought into the fold with the rest of the universe. That it is more than just universal love, it is God's love.

There are many things that God wishes to tell his children. Some of them will understand that this is not a strike at those who profess to know God, but to some they will consider it that. God is telling those who use his name, must have God's permission to do so. They cannot speak for God without asking God's permission. This sounds easy enough, but you must look around the world to see what happens when some people profess to speak for God. There are only a few who God gives this permission to. Those who use God's name without God's permission will see the cost for this. They are not punished by God, but they are taught a valuable lesson that without God's permission, bad things will happen. Negative things are the only result of using God's name without his permission. It is important for mankind to understand when someone states that God has said something. They need to question it, ask God themselves is this what he said. This is a part of including God in your life. Not all who profess to speak for God can.

Mankind must learn to stay in their own realm, not to attempt to cross over and take possession of what is in God's world. This will not be. God has given mankind the ability to cross over to have a glimpse into heaven. This does not mean that they can stay in God's world that they can take things from God's world. They should remember they are in their Father's house. Those who are there are there for a reason. They did not get to God's world through negative things, but through positive things. Remember that this is God's world, and as such remember that it is up to God whether you can enter or not. It is time that we talk of beauty, things of beauty, things that make God happy, trees, flowers, plants. Things that grow make God happy, so it is important to include those things on your planet. They have multiple reasons for their existence. It is true that they create co2, but it is important to remember that these things bring God happiness. God loves to see flowers, trees, plants, animals. All these things are of God's doings that God created them. Just as God created you and as such must be respected, and accepted. Those people who feel the need to clear the land must remember that they are there because of God. No one has the right to

remove them. You may own the land, but God owns all things. God is telling mankind that these things are things that God loves. Just as he loves you, he loves other things that he has created. You feel that the simple weed is a pest that must be eliminated, but that pest has a reason for existence just as mankind has a reason for its existence. All things have a reason for being on this planet. You may not understand what it is at this time, but in time you will see that there is nothing on this planet without a reason for it being. God shows mankind these things to remind you that just as the weed is being killed off because it causes ugliness for your garden, many would have mankind eliminated, for this is what mankind does to the universe. Mankind must learn to understand and accept that there are other worlds, other beings. Just like mankind, these other beings have thoughts. All are given free choice, but unlike mankind they don't respond through violence, and hate, but through love and acceptance, just as mankind is being asked to respond. God has shown mankind that in God's world, there is no hate, no wars, no death, no destruction, for in God's world only positive things will happen. Those who profess to know what God's world is like have no idea, unless they have returned with some special knowledge that God was unaware of. In other words, nothing happens without God's knowledge of it.

There are many places on the planet that are in need of peace. Let's talk a little about the Middle East since it is in the news daily. God never promised anyone anything. It is not for God to promise anyone anything for God is God. All things are his. You should never promise people things in an attempt to make them your friends, your followers, your children. Thus, God has never promised anyone anything. Peace will come to the Middle East when all realize that they are the children of God, and that killing, hating, destroying, will bring nothing but more destruction, killing, death. God is telling you that you must put down the weapon and accept each as the children of God. There is no faith that is worth the destruction of one person. It is for God to decide who lives and who dies. This is not up to mankind. All can live as one, if they choose to listen to what God is telling them. Hate will only beget more hate. Isolation will only breed more hate. Separation will only make all feel unwanted. God is telling you turn to love and acceptance. Your faith is to be embraced, not hated or feared.

Anything in God's name can only be positive, not negative events. God has never encouraged or professed that death is justifiable or that death and hate are acceptable. This is not what God wants from his children. God only wants acceptance peace, love and happiness, not death, destruction, violence. Accept that you're all his children, and as such are all loved equally. What God is saying is if there is not enough world for you all to live in peace on, then perhaps it has come time to remove some from the planet, so that you can all live in peace and happiness. This is not what God wants, but mankind must learn to accept what God is telling them to do - live in peace and happiness or suffer the consequences. God does not like to be stern with his children for he is a loving God. But just as your Father would punish you and your siblings when you fought, God is telling you to stop this senseless destruction of not only his land but his children. All must be accepted and loved as God's children.

This is not the only place on your planet that is in need of help. There is Africa, an old continent that has seen many things, from great civilizations to great events but this is another continent that is in need of God's love. This, once again, is a place where man's greed has overtaken what God is telling them to do. Social unrest, famine, despair are not only limited to a few places on this planet, but many places. There is no reason that one child should go hungry or that one child should be orphaned, for all are God's children. Those who have attempted to give to those who don't. Mankind must understand that God is needed in their lives. Through their own negligence, through their own greed, they have been forgotten. There is no need to hate, no need to challenge

each other for control. For those who have nothing will always seek what they don't have,. This means food, medicine, money, drugs, power, all things that are needed in this place. Show that I do exist; show them that money is not always the answer to your problems. Faith is important, and power is meaningless without God in your life. God wants all his children to understand that love and acceptance can solve some of the great events, events that torment you, and those things that mankind struggles with. All can be helped with God's love and acceptance. Even in this great continent, miracles can happen if asked for.

Message 33

God is asking his children to live their lives, but to include God in it. God created all things including you. You should always want to include God in your life. Many times God has asked this of his children, that they don't forget him that through their busy lives. They forget to include him, not that they mean to, but in day-to-day life, there are many things that they forget. God understands this, but what God is saying is that at this time particularly that they remember to include him in their lives. God understands and accepts that there are times that you forget to include him. That is acceptable. What is not acceptable, is that you forget him daily. Mankind will see in the near future the importance of including God in their life. This is more than a simple request from your God, but that it is a command from your God. You must include him in your life, not only at the sad times, but all the time. There are many events that are on the horizon. These events will do more than simply scare man into belief. That is why God is telling his children now that they must prepare. They must be ready for when the calling starts. Those who will profess to believe will only do so out of fear. This is not how you should want love. This is not how God wants love. God is asking that you all show your love for him now, not at the moment of great contemplation. Mankind will see great events unfolding as they speak. These great events will not be of God's doing, but others who for their own faith have followed the wrong teacher, not God but others who profess the knowledge of God. This must be understood during this time, man will call into question the belief in God. What God is saying now before these events take place is that he does exist and is a part of your life. You must learn to listen to what God is saying at any given time, not only at this time of great sadness.

God is showing his children that through your faith you have learned of God. You know of his existence, but you must also learn to listen, learn to talk with God. By including him in your life, you will be rewarded with great things, peace, love, happiness. God has said that you are my children. You are all on this Earth because of me. I have brought you into this world. I have raised you in this world. It is now time to follow me into the next. Will you be ready to listen to God, to follow God's command? All must stop and ask themselves, have I listened to what God was telling me to do? Did I try everything that God asked me to do? There are times in the near future that all will question what is happening. God's children will not for they will know what is happening. Those who feel that the end of time is a great secret are correct for there is nothing set in stone. God decides for himself, when, where, what. It is not for mankind to make the call, to seek the knowledge. What God is asking of his children is that they should live every day as if it was the end. Show those you love your love. Show God your love. Act as every day is the end. For when it happens only God knows. But for his children who listen to what he states, God is telling them not to fear the end. The end is not the end, but the beginning. People have always questioned what is after this life? Is there a next life? What God is telling you in this book is that there is a next life, there will always be another life. You must not fear what you don't understand. You must rejoice in the fact that God is sharing this message with all. Mankind dwells on the end, their end, their world's end, their families' end. But mankind must stop dwelling on this, for by doing so you are forgetting to dwell on your life, to enjoy your life, to live the life that God has given you. Rejoice in your life. Live your life, but always remember to include God in it.

There are many times that mankind has asked God to foretell the end of time. Mankind looks to the stars for dates. What God is telling you is that it is in his hands. No one knows a date, a year, an hour, for this is in God's hands. Mankind has the ability to sway events, all are in mankind's

hands. But if mankind continues on its present course, this will speed the date by far. For mankind is attempting things that only God has the power of. Life is of God's doing not mankind. Cloning is not the means to life but the end of life. Mankind must not dabble in God's work. God has asked that you include him, not attempt to become him. Listen to what God is telling you. Stop your ways of finding life, for through these means you will only lead to the end of life. God grants you your life. This is not to a doctor, a physician, a medical person, for they are not God. They attempt to be like God, but there is only one God, God the creator of the universe. Listen to what he is telling you. Don't attempt to create life through false means for this will only lead to your own destruction. Those who profess all knowledge are mistaken. There is so much more that is needed to be learned, and even then it is not for mankind to cure, it is only God.

You must learn to accept that those things man continues to question, decoding the past, are to some extent true. This is what we have been telling you. You must look to the past and see that some things do repeat, over and over. You can learn from these events, understanding what the future will hold. But just as you learn from the past, you must also learn of your future. The events that are happening today will have a direct effect on the future of the world and those people and creatures who live on it. God is telling mankind that they must learn to accept what he is telling them to do. There is only his force, the force of God. All other events repeat. Yes, good things repeat, but also bad things repeat. By looking back in your life, your history, your people you will see that there are things that will happen again. Some continue to question what does this have to do with me, what does this have to do with today. But you will see by looking back in time that all things have relevance. Mankind and those creatures created by God change, but the history, the story stays the same. You have seen what has happened to those who questioned God's existence. You have seen that all great civilizations fall. This will be, but what is important is that all remember that God is God. He will always be a constant force in the universe. All things revolve around him. At this time, you may feel that it makes no sense to you that things revolve around God. But it is not your place nor mine to question what God does, what God plans. It is only our place to tell his children what will be. All must prepare for these future events. Look to your past, learn from your past, see that through the past you can see the future, change the future. Pray for a happier time, a time shared with God.

Message 34

Mankind has seen that there are many things that are forecast for the future, things that they have no control over, things that God has not been involved in, things that are of mankind's making. Those who profess to know God must learn to accept that there are things that have never been written about our Father, things that at the time were never discussed. This does not mean that they don't exist, for all have seen them and know that they are real. But, simply put, they have never been discussed before. God has told you that the end is near. Mankind feels this need to know the exact time and date of this event. It is not for mankind to know the when, where, and how, for this is up to God. Those who profess to know these things are incorrect, for the only one who knows this is God. There has been much talk about God. Who God is? What God is?

Mankind must learn to live on God's faith, to have the faith that he exists that he is real that he is a part of all of our lives. Through God's love and acceptance all things are made whole. There are many question that mankind has had for God, from the simple to the complex. What God is telling mankind is simple - you need to prepare yourself for the end. Does this mean that it is going to happen tomorrow or the next day? This is not our business. What is our business is to learn to accept what God is telling us to do, to love one another, to love ourselves, to accept all, to watch out for the sick and poor, to accept God as the one and only God, to show our love for him, to include him in our life. There is no secret to the marvels of God's love. There is no secret society that protects God from us. All he is asking is that we include him in our life, that we show our love for him. God wants the best for his children, but in return God is asking to be a key part of one's life. You must learn to talk with God, not only when in despair but when you're jubilant. It is important to discuss the idea of multiple lives. It is possible for us to return to exist yet again. Those who profess reincarnation may be correct, not in the overall process of reincarnation but in the fact that we do return. There are many reasons for this. Sometimes, it is because we have failed to learn what God wants us to learn, other times it is because there is business from the past life that must be resolved before the soul can transition into the next life.

Mankind will learn one day, but not until they have passed, that what God is sharing with you is correct. There are many people who have returned to this planet for many reasons. Some had issues that must first be resolved. Others have such a strong connection with someone from this realm, such a strong desire of love and passion, that they must return. God will allow those who seek to return to return. In God's world, all do what God wants them to do, and God allows them to do what they wish. Mankind must learn to accept that in God's world, your earthly desires are non-existent. When you're in God's world, those things that drove your earthly being are so unimportant that only the spiritual aspects of your life are here. Love, peace, joy, happiness, health, courage, are those things in God's world, but there are so many more things that mankind will never understand. It is starting to sound like a recreational brochure, but what God is telling you is that fear, hate, destruction, negative, emotions are not in God's world.

There are many signs that the future is full of strange and exciting events, events that will happen. Some are of God's making but others of mankind's making. There is nothing that anyone can do to change what will be. It is important to live your life for today by including God in your life. Rejoice in the words that God is sharing with you. There are many things that God wants to share with his children many, many things. God wants all to understand life, to understand that those things that drive mankind to do the things that it does. God wants mankind to understand that through mankind's own greed, they have hurt what God had planned for this planet. Through mankind's own negligence, they have set wheels into motion that will, in effect, cause mankind

to fade from the role of the universe. There is nothing that no one can do about it. At this time in mankind's existence, it would be impossible for mankind to change, to begin to accept what God is telling them to do. God understands this and wants to share this with his children so that they will not feel abandoned by their Father. God wants his children to know that he loves them all. By including God in their lives, they can fulfill what God has planned for each and every one of you.

Those who question God will see that there is no need to, for your question is put there because of God. Does this make sense? Your thoughts are God's thoughts. Mankind has the right to make up its own mind, but what God is saying is that you must learn to listen to what he is telling you to do, to accept the total love and acceptance that God is giving to all his children. Through God's love and acceptance, you will see that the life you thought you would have is not the life that God has planned for you. By following what God is giving you, you will find the true meaning of life. These earthly desires will fade. You will see that through God's love all things will be put in their place. People will see that there is nothing that anyone can do to prevent what will be. This is what God wants, but that God is showing you is that it is time to give your love to God, to talk with God and include God in your life.

Let's talk a little about God's acceptance. This should be an easy one. God accepts you, just as you are with the clothes on your back. Lift your head to the sky and ask God's forgiveness of all the things that you have done. That is all that is required. It is not required that you change your name or that you change who you are. What it is saying is that you accept God as your Father. God is the creator of the universe and all things in it. Mankind has the ability to look inward to see what God gave you at creation, those things which allow all men and women to know the difference between right and wrong. Many feel that with some they don't understand the difference between right and wrong. This may be so, but at creation all were given the basics. Only after birth are these things taught or forgotten. Once again this shows mankind the basics. You have the ability to control these ideas, these events. By not including God in one's life, things that God has placed within each will not be utilized and will fall into neglect. This is one of the many things that God is sharing with you. Learn to look at the smallest of children and begin to share with them God. Let them learn of their Father. Expose them to all faiths. Let them decide which one to follow for they all lead to God.

Message 35

There are many things that God wants to tell his children. There are things of great importance and things of small importance. Some of the things God wants his children to understand is that with acceptance of yourself, great things can be accomplished. If your years of persecuting yourself are ended, then you're open to new and great ideas. Things that challenged you before come much easier. There are many books about accepting yourself. Some want you to repeat certain phrases over and over. Others call for you to write things down over and over. What God wants you to know is that to have acceptance of yourself, you must start. No matter what the process is, you first must say to yourself that I accept myself just the way that God created me and that all things that I do are ok. God created me with those feelings. Mankind has been told for much too long that certain feelings were wrong that certain feelings were a sin. This cannot be further from the truth. God created you with all the feelings that you have. There are certain feelings of death and killing that are not of God's doings, but your sexuality, your feelings of self love, your feelings of pride are things that God gave you. There is no sin that can be associated with things that God has given you. People will continue to go back to the Bible for inspiration. What God is telling you is that he is the inspiration. God is all you need. To find inspiration, you must ask God for it. Through God you will find it. Mankind fears the unknown. This is understandable, but what mankind must learn to accept is that death will happen. This will be. It is more important for you to live your life the way God has planned it for you. You must learn to put all your faith in God. God is not like a restaurant that you can pick and choose those things that you want. God is all or nothing. You must fully accept God. You cannot pick part that you believe while ignoring those things that you don't agree with.

God has been spoken of as a Father, and this is true. He is the Father of all things. This is not meant to make women feel any less, for what God is saying is that without the Father there would be no life. But also without the mother there would be no birth. Women have always been around. There was no Adam and Eve. If anything, there were Adams and Eves. Mankind must learn to take the position that all are equal in God's eyes and that there is no one better, no one worse. Sins are sins, and God will judge those things. It is not mankind's place to do this. Just as some sin in some ways, they make up for it in others ways, through God's assistance. Those who seek to control the feelings and emotions of God's children must see the writing on the walls that the end is near. Those who profess to know God, to speak for God, must succeed to the fact God is speaking to his children. All are welcome. No one must be turned away from God's house. There are many times that brothers and sisters of God have been turned from his house, not for what God has said but those who profess to speak for God. This is addressed to you. You do not have God's authority to speak for him, and therefore the things that you pray for, the things you desire will not be.

God wants you to atone for those you have turned your head to, for those you have cast out from God's house. God is telling you that you must make good for those that you have discarded. You must ask God for his forgiveness. God is of love, not hate. God is of peace, not war. In the sake of protection, God is for happiness, not despair and sadness. Mankind will learn that there is only one that they must listen to - that is the voice of God. No others have the right to speak for God without his permission. There are other ways to express your love for God, but not by using his name. Those who seek praise will not find it this way. They must ask themselves, is this what God wants from me? If they ask, they will see that it is not what God wants from them.

Peace and happiness must come from all. There is no one who should be left out of God's house. There is no one unworthy of God's love. Those who feel uncomfortable around some must learn to not only accept them, but to welcome them into God's house. Those who spread hate in the name of God will be punished. This is not a promise, but a fact. God wants you all to come to him, to seek him out in all things. There is only the way, the force, the light of God. There is nothing wrong with praising God, praising God in a crowd, praising God in his house, but what God wants mankind to understand is that there is no need to go to a special place to talk with him. You don't have to wait until a certain day, to dress in a certain manner. All you have to do is start talking with him. Those things that you have been taught were of great importance are not of a great importance. The only thing that is of a great importance is God. All other things fall in comparison with our Father. there is only love and peace from God. Those who seek profit from God will not find profit from this, but those who seek help from God will find it. There are many paths for mankind to follow. There is God's path, there is mankind's path, there are others' paths, but the only true path is of God. God is asking those who are lost to ask him for the way, and God will show them the way.

Let's tell you of the story of one who was lost. He felt that because of his sexuality no one loved him. Faiths had turned their heads from him. He walked in the dark alone and confused. Many years went by until one night he attempted to talk with spirits. In an attempt to write a book, God came to him. At first he was scared then confused, but nevertheless he continued to type down everything that God told him to type. He told his friends, family, and even loved ones of the story. He continued to question who was speaking to him, until one day he realized that it was God and God's messengers talking with him. Even then he doubted because all of his life he had been taught that this was evil. God talks to all who will listen. Mankind for years has been taught that the Bible is the only word of God, but what God is telling mankind is that it is not. God has been talking to people since creation. Those who fear what God is saying have a reason to. What God is saying is that I am a God of the people. There is no one above me. All are welcome. I listen to all people. There is no need to worship you, but that my children must worship me their Father, creator of the universe.

Message 36

God is asking his children to understand that he is God. What God is asking of his children is to spread positive. Through good, great things can happen. If mankind continues on this course of hate, only bad things will come from it. It is important that the world share what they have with each other. This will mean that many rich and wealthy people will have to live more modestly, but what they will get in return is a sense of peace and joy that money will never buy. Today people make money by spreading hate and fear. This is not God's way. You must spread the word that God is of love and joy, not hate and fear. For much too long mankind has made money by fear. First there were bombs, wars, terror, and now hate. You must turn to the salvation that is God. Turn from those things that spread hate toward one another, and find the true salvation which is God. Show all who will listen that God is the answer to all things, fear, hate, courage, health, all things. Mankind can put the box of hate away. Relish in the joy that is God. Mankind will see that the future is of your making. The paths that have been laid down for all to follow by God are still there. It is up to mankind whether or not to follow God's path or to continue down this same path of fear, hate, terror. God has put it in your hands. Now it is up to you whether you follow his path or your path. There are many times that God has asked his children to show compassion to one another, to seek him in others, to stand up and show the world what it means to be the children of God.

Those who continue to question God's existence must look to the past to see that there have been many prophets. There have been many saints who have spoken of God. It is now time that all men stop and listen to what God is telling them to do. To show the light of God from within each of his children. There are many things that God needs to tell his children. Some of the things God wants his children to understand is that time on this planet is running out. This is not of God's doing, but mankind is destroying their own home - all the things on it. This is not something that must be argued, for all know this. Those who continue to profess that the jury is out, need to look within themselves and ask the question, is wealth more important than life? Are riches on this planet worth my salvation? Those who ask will see that there is nothing for them after this planet. They will continue to stay on this lifeless planet alone and in the dark, just as they have led others. God is telling mankind that there are other signs, not just the warming of continents. There is the loss of life due to global warming. There is the melting of the ice caps, but there are far worse things on the horizon for mankind. Through your constant aspirations for other worlds, there is a science that is being led by science and not God. There are so many things, all of which will lead only to one end, and that is the end of mankind. Stop experimenting with things that you have no knowledge of. Those things that were provided by God are for only God.

God has given science such a hand, and now they feel they are the creator. This cannot be further from the truth. Genetics, DNA, cloning are only a few of the ideas scientists have dreamed up. On this course in their perfect world will consist of beings, not of this world or the next. Beings that will live only for the purpose of the state. Mankind must learn that things of God are things of God. Things of mankind are of God. There is no difference between the two. God has given all that they asked for, but some things God cannot or will not give. The power to be God is not for mankind. Beings throughout the universe are aware of your doings. These things that endanger the universe will be stopped. It will be by mankind or by others. But these things will not be permitted to harm other worlds. God is asking mankind to ask themselves is this what my God would want of me? If God was to talk with me, is this what he would want? Mankind must learn to listen to what God is telling them to do. This is not an attempt to steal your wealth, take your

riches. This is the benefit of all mankind. God is telling you that these things must not be done. There is no one above God. Mankind may learn how to reproduce humans, but you must ask yourself has mankind learned how to reproduce the soul? All know the answer to this. What mankind has forgotten is that all have a soul. Now ask yourself, if we haven't learned how to reproduce a soul, then how are these clones human? These are questions that mankind must learn to ask themselves. Your future depends upon it, not God's future. God will always be, but will mankind?

There are times that God has asked that his children show him praise. There are times that God has asked his children to share their love for others. There are times that God has provided tender compassion during times of struggle. What mankind must understand is that what God is telling his children to do is not so hard. It is not a struggle. It is not hard to understand. What God is asking his children to do is simple, include him in their lives. To show the love they have for God to others. Share God with all. What God wants is a universe of unity that no one, no power, no country is greater than the other. They all share a common thread, that is the thread of God. Through God's love, all are one. No one is to be excluded from God, for all are his children. There are responsibilities that come from being God's . They must aspire for good. Through God's love all things are possible. Through God's love all things can be.

Those who profess their knowledge of God must first see that God is for all. There is no one so poor, so sick, so different that he cannot be recognized by God. All things are of God's doings. Mankind's attempt to become God will only fail. There is only one God, God of the universe, creator of all things. It is now time to look down God's path for mankind to see what is, what will be, what could be. On God's path all will recognize each as children of God. All faiths have come together. They recognize the existence of God, the one voice of all mankind. Through their acceptance of each other, wars and hate have become a thing of the past, only mentioned for remembrance. On God's path, all share their love for God with each other. There is no longer poor, middle class, rich. There are only his children. All have homes, all have health, all have food. There is no need for defense, for all are our brothers and sisters. Taxation has become a things of the past, for there is no need for governments. All understand that God is sole judge. Mankind does not do crime for mankind understands that all things are gifts from God and are happy with what they have received from God. There is no need for insurance, for mankind has learned that through the gifts from God they can heal themselves of sicknesses. Mankind no longer travels by car because they have learned to live with themselves. Through this, they have stopped global warming.

Man has learned to communicate through their soul to speak with all. There is a universal language that all can speak. Faith and religion have become a distant memory because all have learned to communicate with God on their own. God has become an active member of all families, sharing happiness, joy, and sadness. Mankind has seen others from other worlds, knowing that they are all God's creations that we share in the family of the universe. Mankind has learned that violence only brings more violence. Through peace, love, joy, and happiness our planet has become an active member in the universe, learning more productive means for science, and knowledge. Murder and death are no longer a part of the human existence, for all have learned that God is the only one who has the right to determine life and death. All are welcomed to the world. All are welcomed into all homes, for all are our brothers and sisters in God. Money has become a thing of the past, for now we raise what we need. We live on what we have. We trade with others who have things we ourselves can't make. All things are seen as gifts from God. There is no need for cheating, for all know that God is watching. Our planet is full of

green water, blue skies, animals of all kinds. Animals and man coexist, for each knows they are members of God's family. Mankind has learned to talk with the animals, plants, and trees. Some may see this as a magical wonderland, but what mankind must understand is that this is not an imaginary world. It is God's world, a world, where all coexist. There is no violence, no greed, no hunger, no wealth, just beings living as God has asked them to live. There is no need for forgiveness for in this world all are forgiven. There is only peace, happiness, joy, and love. Love for our God and love for ourselves. There is nothing wrong with loving yourself. This is not self pride. It is what God is asking of his children - that they love themselves. By doing this, you will learn that there is no need for hate. With happiness for yourself, you will learn to accept all as what they are, brothers and sisters in God.

Things you feel are different from yourself are different for a reason. This does not mean that they are less or more than you. With difference comes an understanding of the universe that you are model of the universe, a universe of difference sharing the same God. Unlike the universe, you have failed to live and coexist as one. Those who fear others must learn that they like yourself share that fear. This does not mean that God sees you as less a person. Through God you will see that all are equal. There is no one greater than you or less than you. God is the only one greater than you. Listen to what God is saying. Peace, understanding, and acceptance must become the norm. Those who profess God while rejecting some, must accept that all are God's children. Through God nothing can be left behind. Through God's love for the world he would give you his only son, Jesus Christ. There is nothing wrong with doubting your world, doubting yourself, but you must never doubt God.

Message 37

There are times that God seeks acceptance, acceptance from his children, understanding that he is the ultimate knowledge and power in the universe. God has asked that his children show him their love for him and share their love for him with each other and those less fortunate. There are times that God feels that his children have forgotten him. They have become so involved in their own lives that they have forgotten to include him in theirs. God wants all to know that he loves and accepts them all and that there is no one who God will not forgive. But you must ask for the forgiveness. You must mean forgiveness. Those who have taken the time to share their lives with God, to include him as a part of your family, he will bestow great things upon. But for those who have forgotten God, who have been too busy for God, he will not. You have the ability to do all that God is asking you to do. You simply have to put your heart into it. You have to believe in yourself, that you're worthy of all that God will give you. You have to understand that through his forgiveness, all is forgiven. Your past is just that, your past. Those things you need to be forgiven for are gone. Forget them. Think only of the future, a future with God. God does not test his children. He does not question their loyalty to him, for God knows all things. He knows when you're truthful, he knows when you're not. It is you who questions your loyalty to God. It is you who questions his forgiveness, not God. Sometimes it is easier to not ask for forgiveness and forget it then it is to ask forgiveness and then attempt to forgive yourself. Through God nothing is too hard, too difficult. It is only mankind that has made it so.

In God's world, forgiveness is forgiveness. In mankind's world, forgiveness is acceptance of the forgiveness, acknowledgment of the forgiveness, and then living with the forgiveness. Mankind has made so many things that God gave you difficult through people who at the time meant well, but did not realize that in time things change. Those very things that were enacted to free people would, in fact, imprison people. Mankind understand that things change, but mankind will not accept that the Bible was not the actual word of God but rather what mankind felt that God had said, what mankind felt that Jesus Christ had said. The facts are the same but through translations, misnomers, and this need to control the masses, things in it were, in fact, changed. It is also important that mankind understand that God has been speaking to his children since creation. In God's attempt to show mankind that things are changing that things need to be changed that God's love for his children has never changed, mankind must learn to accept that there are other voices of God. There are God's messengers attempting to show mankind that the future is at hand and that the need is great that mankind come to God and ask for forgiveness.

This continues to be a message of God's love for his people. All must understand and accept that there is only one God, God the creator of the universe. God's love is all that is needed. All need to understand that with God's love come responsibilities. Mankind must hold the laws of God up to higher standards than those laws created by mankind. No one has the authority or the right to make changes to God's laws for their own needs or for their own greed. God is telling his children that his is the light. There is only his light. To find God you must follow God's light. It is also important that mankind understand that there is nothing wrong with the Bible. In fact, many have sought solace from it and found it. It is not that it is the word of God, but it is what people have thought is the word of God. It is all in how you see the Bible. If it is seen as a book, then it is a book. If it is seen as the word of God, then it is the word of God. As God has said, it does not matter what you believe as long you believe in something. Such is how the Bible is. It is not important that it is not the word of God, but that you believe it is the word of God. What God is telling mankind is that there is more to God than simply the Bible. Much of what you see

happening in the world today is a result of the Bible not changing with mankind. The Bible should be a living word of God. Just as God is not set in stone, neither should the words of God be. Throughout history mankind has felt this need to secure the knowledge that is God. What God is telling his children is that no one can or will completely understand God, for it is not for mankind to do this. It is only important that mankind learn and understand mankind.

In the beginning, there were many things that God would talk to his children about. There were things of values, there were things of survival, there were things of joy, things of beauty. In the beginning, there were many things that God would talk to his children about. As the centuries rolled by, mankind sought less and less from God. There were times of great despair for God. God had grown very close to his children and just as all parents do, felt neglected. There were other times that God began to feel excluded from his children's lives. Through their own greed, they sought more ways to have more things - things that God did not approve of, things of wealth and riches, but also things of comfort, things that made mankind's life more comfortable, but nevertheless were not a part of God's plan for mankind. Then, fathers stopped telling their children the story that God had given to his Father. This started the chain of events that would eventually lead us to the this point in time when God became less reality, and more myth.

Throughout the ages, God had been an active part of his children's lives, but just as time changes things, it changed the way God's children felt about their Father. They began to ask less from God and more from each other. They began to talk less to God and more to each other. They began to want more than what God was willing to give them. So, started a lifetime of dissolution from God. Those who relied on God for strength and courage found that they could find the same from others, not understanding that not only did God give them strength and courage, but faith, love, happiness, joy, peace, and life. God is our Father, and as such we should honor him, allow him to give input into our daily lives, input into our future, input into our loves. Mankind has forgotten their Father. Mankind must learn to see their Father in a new light, in the light of God, in the light of the past. Through our Father, we can have our lives back again. We can share our lives with our Father. God wants all of his children not only those who profess their love for him, but even those who have forgotten their love for God. God's table is a large one. There is room for all of his children to sit at his table. Those who feel left out, those who feel alone, those who feel unloved must come to God's table, for this is the only place they will feel welcomed. With their Father all are welcomed. There are many places on this planet that God has shown his children his love for them. There are many times in the past and will be in the future that God will show his love for them. Things will be happening in the near future. Those who have professed their love for God will call into question his existence. Therefore, it is important for all of God's children to listen to the messages that God is sending to his children. "That all must believe in me." "That I am your Father." " I do exist." "Make me a part of your life, not only at the sad times, and not only at the happy times, but all times." "You must show your love for me." "Share my love with all those you love." "Spread my message to all that will listen that I do exist." "That I do love them." "That I am here for all of my children."

You have seen that there are paths for God's children to follow. There are reasons that must be known for the importance of these paths. On God's path, you will learn much more than what you thought. It is true that your soul must learn things, for through learning things, you have the ability to proceed to the next plain. On each spiritual plain there are things that one must learn. There are things such as pride, hope, charity, faith, love, peace. There is also acceptance. In each plain your soul must learn to acknowledge these things, to learn to be proficient at it. Mankind has felt that popes, kings, queens, leaders of your world, have achieved these things. It is

important that mankind know that this is not so. Even your great leaders still have to process. Even they must learn things. God is telling you this so that you will understand that there is so much more to mankind than what mankind thinks. There is a life after death. Through your death, your soul is released to once again proceed, to learn to accept. God is showing you this so that you will understand that the deeds you do on this realm will account for something. The lessons you have learned in this lifetime go with you. That is not to say that it is the end. There is only one who has achieved that, and that is Jesus Christ. You will see that in the next life, you will once again attempt to achieve those things that you still need to work on. It is you who must make that judgment. Is it your faith, is it your love, is it your courage - there are many things that we all must achieve.

God is asking that his children learn to understand and accept that there is more to your lives than what you know. There is a world full of ideas and concepts that you have failed to accept and acknowledge. God wants mankind to understand that there is so much more. Mankind must learn before they can become a part of the universe. There are more things that must be learned before they can reproduce beings. There is so much more that mankind must do before they can become God. This is not for mankind to do. It is not for mankind to question who God is. Mankind feels this need to understand all things. Mankind must learn that there are things that mankind will never understand. This does not mean that it does not exist. God is showing you places, not that you can tell others what you have seen. But you can share what you experienced with others to ease their transition into the next world, God's world. You must tell those who seek peace that this is where they will find it. Peace comes in many forms, peace of mind, peace of heart, peace of the soul. Mankind will see that in the near future all will be seeking peace. There will be wars, unlike others have foretold. In these future wars, mankind will have no need for God. They will feel that it is all up to them to wage war against one another, to break God's laws of peace and justice. Mankind will continue on this course of war. Mankind will see that there is a God when God's Enforcers are sent to bring peace to your planet. In these days all mankind will find it hard to exist, for food, plague, famine, disease will run rampant. Governments will be overwhelmed with the need. This will be the time that all will question God's existence. These will be the times that all must understand that this is not of God's doing, but that mankind has brought it upon themselves. For their own honor they have chosen to do this, not in God's name, but in their own name. God is giving mankind this look into the future, so that all will see that there is a God. He does exist. It will be from God that the Enforcers will be sent to bring peace back to his children. Those who fear the unknown must learn not to fear the Enforcers, for they come from God. They love God. They will help mankind to find the God they have forgotten.

You have seen that in the future, things will happen that will question all's acceptance of God's existence. What God is trying to tell his children is that during this time, we must not question his existence. These are the times that you must have faith. You must continue to believe that, yes, God exists. You have seen in the past that there were times that people questioned God's existence, but they had the faith needed to carry them through that God does exist. You must accept yourself. You must understand and know why God is showing his people this future. It is not because he gets joy from our despair. In fact, God suffers just as his children from their despair. God wants his children to come back into his arms, to show their love for God by sharing with those who have nothing. It is not for you to decide if they are worthy of your love or acceptance. It is important that all feel your love for God through them. Those you walk by daily and pay no attention to, you must start to look them in the face. Don't look away from those things you find hard to understand. You must show that in you, you have the love of God for his

people. Show those who look at you that you have his love in you and that you will share your love for God through them.

Mankind seems to be fascinated with death. Perhaps it's because their lives have not been what they foretold. Perhaps it is because mankind in its need to control people, to drive people, to drive their economy made mankind feel that they were not worthy. They needed more, more money, more clothes, more homes, more than what God had given them. Mankind understands that they could never achieve all those things that mankind had made them desire. If mankind could learn to accept those things that God gave them, to accept each day as what it is a gift from their God to his children, mankind would not be so fascinated with the idea of death. Learn to accept those things that God has given you. Learn to accept that you don't need more. You need less. Those who have nothing need something. Do you need a new television? Do you need that new car? What of those who don't have a television or those who don't have a car? Some of mankind feel that if they give something, they have done their duty. They have honored their commitment to God. The truth is that you all must do more. You all must learn to live within your means, those things that God has given you. You must learn to spend more time with your children, enjoy those things that God has given you freely, enjoy nature, enjoy the animals, enjoy your friends, and family.

Mankind must learn to turn back the speed in which you are living your lives, in which you're striving for success, for wealth, for those things are not of God's doings. But mankind needs to have more, more family, more wealth, more homes, more of everything. Share your lives financially and spiritually with those who have nothing. See that by living in God's presence, you can have far more than what your people have. You can live closer to God's world. You will see that you can see God in the eyes of those you help. Sharing your love for God in all ways is important and will lift your spirit to a higher plane. There are many ways that God is telling his children that they can change the future from one of despair and pain to a future full of God's love for his children. In these ways, mankind can find the secrets of the universe. Through God's love and God's love only, you can find the secrets of the universe - a universe full of worlds, full of beings, full of love, full of happiness. On this planet at this time, there is only one course being offered to the children of God and that is the course of their own making, one of war, pain, suffering and despair. Turn your heads to the sky and ask God's forgiveness for all those things that you have done. Let's talk a little about God's children, those who have been taught are Adam and Eve. Mankind will learn in the future the true facts. There was not one Adam and Eve. There were thousands of Adams and Eves who were placed on this planet in specific locations. You were asked to live as God's children. In the beginning, it was a matter of meeting others like yourself, brothers and sisters in God. In the beginning, reproduction was between those who had been paired off. Relationships began to develop between others close to each.

There was true love shared by God's children for one another, for all knew they were the children of God. But then things began to happen, things which no one not even God had planned. Man began to question what God was giving them. They looked to their brothers and sisters and were jealous of what they had. They started to question why they had so little when they had so much. In the beginning, they would share with their brothers and sisters, but then brothers and sisters started to expect things from one another. They were not satisfied with what God had given them. They wanted what their brother or sister had. They started demanding things from them. Then they began taking things from them that were not theirs. They did not ask for those things. It was not out of despair or pain or suffering that they took these things, but out of greed. So is the start of what mankind is today. Through this greed, mankind has turned upon his brothers and

sisters. Through mankind's lust for more, his desire for all things, mankind even today seeks the power and the knowledge of God. All these things are of God's doing, not for mankind. What mankind receives today is only from a loving God, who is attempting to reach out to his children, for his children to find the love that God has given all things. Look at all the things God has given you, a planet to live on, an Earth full of life, full of everything that mankind needs to survive and yet they seek more, more worlds, more beings, more money, more power, more energy.

Mankind must learn to accept all the things that God gave you, those things that you cannot reproduce, those things that you cannot create, must be left behind discarded like all things that mankind created, those things that mankind felt he must have, but in time learned he needed, yes, more. Look to a future full of nothing. See what mankind has to offer you. Now look to a future full of God's love, with all the things that you need to survive. You make the choice, which way to follow on your same path or on God's path. It is not anyone's place to make you convert, to force you to love God. It is of free choice that you choose to follow God's path. It is only our duty to show you that there are other paths. If one wants change in their life, they can follow his path, the path of light, the path of hope and love.

Message 38

God is showing all that there is little time for them to make peace with God. All must come to the center to find peace with themselves. There are many questions that mankind has for God. It is impossible for God to answer all the questions that mankind has for him, but it is possible that God can answer some of the questions mankind has for him. It is not for mankind to decide which questions he will answer or what answers he will give. It is for mankind to accept that what God is doing is for the best interest of his children.

You must understand that mankind has had many questions that they wished to ask God. God has answered most questions that were asked, but mankind is never happy with the answers that God gives. What mankind is seeking is acceptance of their actions, their ways. Mankind must understand that it is not for mankind to make such determinations. It is only for God to decide what your path will be. If you wish to argue the fact with God, you must understand that there will be no argument, for God's decision is final. Those seeking acceptance of those things that they know are wrong, should not ask such questions. If you're not willing to hear and, yes, accept God's answer, then why ask him. You have sought answers to all of life's questions, things that you knew were wrong, things that you knew you had no right to ask, and still you continued to ask it.

You must look inside yourself to understand that there are things, positive things, that must be done. There are negative things that all have done. You must learn to accept those things that you have done, move on with your life. After asking God's forgiveness, you must accept your forgiveness and then carry yourself forward into a new life, one with God. We have shown you a world full of life, full of peace, full of hope and dreams, and still mankind wishing to be creator of his own destiny continues to follow the same path to ruin. God cannot promise you a great life on this planet, but what God can do is promise you that in the next you will be at peace, in a world surrounded with angels of light, the light of our God. Those who are seeking solace must accept that our Father, God creator of the universe, is all that you need. The angels that surround God are others who have professed their love for him. Many will question is God alive, does God exist. Those who continue to question, will always question, for there is nothing or no one that will change their skepticism. With faith there is no validation, only God's promise.

Today, many ask for peace. They demand that peace come to this planet, but what many don't understand is why would God allow this to happen. Mankind must understand that this is not of God's doing. Some believe that God is in control of all things. To some point, this is correct, but to some point it is not correct. Mankind has set actions into series. These actions have not played out as of yet. They will continue to run for quite some time. These are not of God's doing, but that mankind with the choices that they have made, must now sit back and watch as they play out. There is much talk of an impending war. You will see that until all have realized what God is telling them, there will always be wars. Until one man feels that he is deserving of what the other has, there will continue to be crime, continue to be hate. As long as there is one of a different color, there will always be hate. It will not be until all of mankind comes to the realization that all are our brothers and sisters. We are all a part of God's family. Our Father is just that, our Father. He is the soul of mankind. Those who believe they know what God wants are wrong. Those who profess to speak for God are wrong. Those who profess the wisdom of God are wrong. The only one who can truly speak for God is God. This is not to say that God is not telling his people what they must do to prepare his children for this future. What God is

saying is that all must ask God, is this from you, is this your message. Those who seek the answer must be willing to accept what God is telling them.

Find the peace from within. Find the love and acceptance that God is sending his children. Do not hate, for this is not of God. Do not judge. This is not of God. Do not kill, for this is not of God. Show others that you're God's child. You listen to not only what others tell you to do, but you listen to what God tells you to do. Be happy with this knowledge that our Father shares this message with you and that he shares this message with all of his children. Those who seek justice from the living must understand that it is not for you to find the justice. God has never told mankind that it was ok to kill. This is simply not so. God never said an eye for eye, for God is of love. If there is to be justice, then justice comes from only one place with our Father. God is the only one who has the authority to make a decision of life or death. This is not to say that it is ok for man to kill one another. What God is saying is that it is for him to decide the fate of life and death. What the true challenge for mankind has been is that it is not quick enough for their own need to find justice. Mankind must understand that God will not allow those who have killed to live a peaceful life. Through their own soul, they will find the justice of God. Through God and only God, those who have killed will find justice and peace. There is no justification for murder even for one's own protection. It is not a justifiable means for death. God understands that you will find this hard to understand, but there is only one true path with God. Even in one's death, there is God. Nothing happens without God's input. When your time comes, as it comes for all man, there is nothing that you or anyone can do. Is this a sad time? Yes, you're sad that you won't see them for a while, but what mankind must understand is that you will see them again. Don't allow your own greed, your own feelings to temper your judgment. Even with those who are fundamentally bad, people have a reason for being here, at this time, on this Earth.

One must remember the Christians and the lions. They were sacrificed for their beliefs, just as the Christians who walked up the steps to the arena. Mankind must have God in them, to not fear anything, to not fear death. For with death there is a new life, a new being, a new future filled with God. You must turn from your outward you to your inward you. Look to find God within you. Accept all that he tells you. Understand that death is nothing to fear. God will not allow anything bad to happen to you. This is not to say that bad things won't happen to you. What God is saying is that nothing bad will happen to your soul. Your soul is true life. Your body is a vessel only meant to hold your spirit. Throughout the history of your world, there have been many signs that have shown all that capital punishment does not work. There are the signs that the innocent have been put to death. Those who were afraid of people had them put to death. Countries have been overturned through the use of capital punishment. There have been great civilizations that have fallen over capital punishment. What God is telling his children is that if you believe in life, then there is only one answer to capital punishment, and that is God.

If you believe in God, then you must have the faith that those who have hurt you, harmed your loved ones, taken innocence, will find justice. Not on this world, but on the next. Mankind must learn to accept that death only brings more death. Life brings more life. Hate only brings more hate. Bring God forward in your life. By doing so, you will see that the world turns from a world of hate and violence, wars and despair into what God originally intended from his children - a world in which all could live in peace and harmony. Only through greed, mankind has learned the things that are harming them today. Through God's love and acceptance, peace can once again be brought to this planet. Yes, even this planet can be brought into the fold of the universe and find its place with all great civilizations. You will see if mankind can learn to find peace, to accept God, to accept what he is telling his children. There is nothing that cannot be achieved,

but if mankind continues on this course, one of hate, despair, violence, wars, and destruction, only those things will return, maybe not today, maybe not tomorrow, but one day all will return. Those things that you have sown will be returned. Shouldn't you want to have love, peace and harmony, returned instead of the negative?

Message 39

God is showing his children things, things that must be accepted. If what will be, will be, then all must understand and accept that there are other beings from other worlds. They are all of God's creations. This does not mean that they will harm you, for what they are doing is witnessing the destructiveness of mankind. They are sending messages to others in the universe that there is still no change. Things continue to worsen and mankind is still heading on a course of self-destruction. This is not what God had planned for mankind, but that is what mankind has mapped out for themselves. God has been telling his children since creation that he is the God of the universe. But for far too long, mankind assumed that they were all God had created. This is not so. There are many planets, many beings from all over the universe.

Mankind continues to be so destructive that they will not communicate with you. But once mankind listens to what God is telling them, once mankind has been accepted into the fold of the universe, then mankind will witness many things, things of joy, things of harmony, things of peace. But only once they have accepted what God is telling them to do. There are many things that God's children have forgotten, many things that God has not shared with his children for they were not ready to understand, to accept. But in the future, mankind if they listen to what God is telling them to do, will understand so much more, so much that you have to learn, so much you have to accept. God is telling you this because it is important that his children be prepared for this day. The day will come that all will have to accept that what God is telling them will come to be. God is continuing to tell you that all must come to him. his laws must be obeyed. All wars, all destruction, all killings must come to a stop or others will come to stop it for you. They are acting on the orders of God, and as such like your United Nations have the sole right and authority to do whatever it takes to bring peace to his planet.

Mankind must learn, understand, and accept that this will be. Your time is running short. There are not many years left for peace to come to the planet. The chaos is harming all that live on this planet. There is much discussion of global warming, but mankind must understand that global warming is only one of many signs that have been given to mankind. What they are doing to their own planet must stop. It is not only about global warming, about acknowledgment of God's laws. Destruction of inhabitants that wars, killings, stress on the planet, must be ceased or all life on this planet will cease. You think that you're the only civilization that has existed on this planet, but you're false. There have been many civilizations that have existed on this planet and would continue to exist if they, like you, had only listened to what God was telling them to do. Look to the south, and see what happens when you ignore your Father.

God is showing mankind that the future is for them, but only if they can learn to accept what their Father is telling them to do. They must obey God's laws. Mankind's laws are to be broken, God's laws aren't. Peace starts in one place. Did you realize that peace starts with you? You alone can start peace. Do a positive thing tomorrow and see the reaction you will get. These positive events can affect peace on you planet. Do not allow the politics of today to affect your views for tomorrow. You must understand that it starts with you, not with your leaders. Start with one positive event. Listen to that inner voice, listen to what it is telling you to do. Accept what that inner voice is telling you to do, for that inner voice is the voice of God. God is sharing with his children that all must prepare that the end is near. Those who have forgotten him will be reminded, in one way or the other, but all will be reminded of God's strength and courage. You must never question God's existence, for all will be shown shortly.

God is showing mankind different paths, paths that they can choose to follow instead of God's paths. There is one path on which mankind will learn that there is more to the universe than has been known. There is another path that will show mankind wars and pestilence. There is yet another path that will show mankind what is meant by disease and famine. There are many paths that mankind can follow. It is of their choosing. God understands that sometimes his path is not the easiest, most fun, or the bravest route, but nevertheless it is God's route, God's path. Mankind has followed too many paths throughout its creation. They have followed great leaders, they have followed great priest, they have followed each other, but they have consistently failed to follow God's path. There have been but a few who have followed what God has told them. Some call them saints, some call them prophets, some call them priests, but they like others have followed what God has told them to do. God understands that mankind must follow people. What God cannot accept is that they will not follow what he is telling them. It is not hard to understand when you look at today. You see the chaos, the turmoil that the world is in. When those who profess peace are seen as weak, those who profess God are seen as cowards. It is far easier to say you're against something than it is to accept that you're for something.

Those who profess to speak for God must watch their words carefully. For there are only a few that God would allow to say that. Mankind will see in the near future that things are happening, not just today but yesterday as well. Things that mankind has already set into motion, things that will have a long-range effect on the planet, bombs are only some, there are drugs that have already started to affect the development of mankind. Those who are professed to suffer from Attention Deficit Disorder are only a few. Where does medicine come up with these terms? Throughout history mankind has developed, sometimes there are incidents that have happened that does affect individuals, mental retardation, and other things. But even those who are disabled are still God's children and as such are loved just as they are. It is important for mankind to understand that there are cures for many of the diseases that your suffering from today. Cancer is not a disease. It is a response to a way of living. There are chemicals and toxins in almost everything today, all subjects of mankind's own doing.

God is telling mankind this not so they will waste this knowledge, but so they will begin to apply some of the knowledge he is giving you to find the cures for these diseases. God has continued to tell you that the building blocks of the universe are positive and negative ions. These are the smallest of micro organisms that created the universe. God is sharing a message of love and joy. It is not meant to be an instruction book on mankind. What mankind has been doing is in effect nullifying the warranty made with God. You must look to the past, look to the future, but importantly look to now and see what you're doing to each other. Rejoice in the fact that God is sharing this message with mankind. Just possibly mankind will find the true power of knowledge within this book. Watch for the stars and see the signs, for the signs are already written in the stars. There is a new star that will be forming shortly. This will be the start of a new planet named Orion. Mankind must respect what it is for it is a sign from God that his son is on the way. All people must turn their heads to the east and bow them in honor of his birth.

God is showing his children that there are many choices; choices for not only countries, but choices for mankind. God is asking all of his children to share their love for God with those they see daily. Through your love for God, you can show others that there is a God, that God is of love, and hope, peace, and charity. God is asking you to share your private things with those who have nothing. When you see the poor, the sick, the homeless, you should offer them a place to stay. By doing this we are showing our love for God. We are accepting what God is asking us to do. There are many things that mankind can do. It is up to mankind to do it. It is important that

mankind understand that God is with all things. Even those you question know God. Those who profess their belief in no one must understand that at one time in their lives, they did believe in someone. They believed in God, but for many different reasons, they have been led into the dark into the world of loneliness. That in this world. There is so much more than what mankind knows or understands. Simply because you don't understand it or understand how it works does not mean that it does not exist. Mankind understands only those things that they understand. They accept only those things they accept. Mankind will have to learn so much more to be included in the universe. There is so much more to be understood, to be learned, to be accepted. Only those who seek God will find God. All must learn to accept what God is telling them to do. They must look to find God in all, for God is with all. You must learn not to judge others, for this is not for mankind to do. It is not your place to judge the man or woman. It is only your place to share your message, the message of God and his love for his children. It is up to those who have forgotten, those who have been led down the wrong path to first acknowledge that they have forgotten, been led astray to find God. God is a loving God. Those who feel that God causes wars are wrong. Mankind in their false approach to God have what he has told them. God is of love and peace. This is how he wants his children to live. All are brothers, and sisters in God. There is no one above God. He shares this message freely with all who will listen. Turn to peace, turn to acceptance, share your love with all. By doing so, you're showing your love for God with them. There are times that God feels that he is sending you a carrot in hopes that you will find him, understand him, and accept him, but this is not so. God should not have to send you a carrot in hopes that you will find him. All of your life you have sought, you have looked in many places for him, you have judged yourself, thinking that you were not worthy of his love. But all are worthy of God's love for all are his children. You must learn to accept yourself accept who and what you are for you are God's creation. You must learn to accept what your Father is telling you. Death and destruction are not of God, for God wants only what he has always wanted for his children - to live in peace, love harmony with all things. Those who wish for better times must first turn to God and ask God for these better times. But mankind must also learn to accept what our Father is telling us to do. Through hate, nothing will be gained. Nothing will be changed, only more of what you have already seen. This is not God's way. This is mankind's way. You must ask yourself if God came to Earth if he was seating next to me would he be happy with me? Once mankind takes a couple of steps backward and looks to their future and sees that those things mankind has always felt important will see that those things are so unimportant. They have no basis for life, that they have only superficial meaning. They, in fact, will not improve your lives, but will cause more harm. Turn to what God is showing you, a world in which all are welcomed, where no one is turned away for any reason. Through God's love, we have so much more than what mankind feels is important. Through our Father's true and undying love for his children, peace can come to your planet. You can love all as your brothers and sister. There is room for all No one has the right to judge who you are, for what you are is God's child.

There are many things that God wishes to tell his children. There are many things that God wants to show his children. There are ways that his children can show their love for God. Did you know that there have been many people who have wished to speak to God? Did you know that many have spoken to God? You have not always heard of them. Just as now, throughout the ages mankind has spoken with God. They have asked for special help, they have asked for speedy help, and they have asked for the safe care of their loved ones. There are many, and all types of request for God's assistance. Mankind must understand that all are welcomed to speak to God. There have been many times and many types of people who have sought God's assistance. God is

happy to do this for his children. There are others who, without their knowledge, received assistance because God does watch out for his children. There have been many who through others' actions they have received help from God. What God is trying to tell his children is that you must not expect assistance only from yourself. You can ask for assistance for others, those who you don't even know, but you're made aware that they need help. We have spoken of other souls lost because of their actions or because of the negative that surrounds them. This is why it is important that you ask for forgiveness, not just for yourself but for those who also need forgiveness. God wants all of his children to understand that through forgiveness, through your own acceptance of your forgiveness much more can be achieved. There is nothing wrong with asking for forgiveness. Many have spoken of the miracles that Jesus Christ performed. What God wants mankind to understand is that those miracles were not from Jesus Christ, but from God. Through Jesus Christ those miracles were asked and God did this for him. It is important that mankind understand where miracles come from. They don't just magically appear from nowhere. But they are motivated by mankind but God answers those prayers. God, and only God, has the power to make the miracles happen. There are things that will be happening in the near future that mankind will have to ask for a miracle. This is to say that all mankind will have to ask for the miracle to happen before it will be granted by God. This is not to say that all mankind will have to ask in unison. But what God is saying is that all of mankind will ask for the miracle to happen. This is a great event that God is telling his children of. During this great event, mankind will question many things, things of God's, things of mankind, things of their own lives. At this time mankind will have to ask for the miracle to happen.

God is showing his people that there are many things that will be happening in the near future, things that his children must be prepared for. They must learn to listen to what their Father is telling them to do, not only those things that you're aware of but other things, things that you're not aware of, things that are happening in the universe, things that are happening on this planet, things that are happening within his children. We have spoken of the building blocks of the universe, but there are other building blocks that mankind has not even imagined. These are such particles that you have not even been able to notice them. Scientists understand that there is debris, matter that as of this date they have not been able to identify it. There is other matter, matter that mankind will one day realize is important to the genetic makeup of mankind. This is a part of the reason God does not wish for mankind to continue with cloning. There is important matter that is being left out, simply because mankind has not identified it or understand it. We continue to tell you that there are things, things that mankind must not attempt to do, mankind feels this need to impress themselves, others of their ability, their ability, and not God's ability.

We have spoken of wars, destruction, plagues, famine, and still mankind wants to know more. They want to understand that "They" are superior to God. Mankind will be taught a hard lesson. This is not of God's doing, but mankind will continue to feel that they are superior to God, and this is not so. God does not seek this for his children. God does not want to see his children in pain and suffering. What your Father wants is for all his children to be happy, full of joy, and love for him. Mankind will see that through their own knowledge and expertise, they will bring on new diseases, new incurable diseases that are resistant to not only medication, gene therapy, radiation, and more. This is not of God's doing, but through this need to clone animals, humans. There is so much more that mankind must learn. They should never attempt to be God, for God is the only one who can bring life or take it away, it is not for his children to supersede their Father. God is showing you a world full of love and happiness, and yet mankind continues to run toward this course of self-destruction. Why will you not listen to your Father? Listen to the words that he

is sharing with you now. Do not attempt to become God. This is not for mankind to do. This is not for any beings to attempt. Why does mankind continue to seek all the knowledge, all the power in the universe? Can you not see what this is doing to your Father? God is asking his children to not only convert to God, but to show others that through their own negligence their own destructiveness, they have killed off species, animals, plants, ecosystems that have always been would have always been but that mankind has destroyed it. God is asking that his children honor him through many forms. Some forms are of love for each other. Some forms are love for animals. Some forms are love for plants. All of these are forms of living matter, matter that is important for the survival of all. Learn to listen to those who have passed before you. See that some things are needed for your sole survival - air, water, heat - things that man must have to survive. Other things are not needed - cars, electricity, gas, oil - these things are luxuries, not necessities.

Find God within each of you. Seek him out. Find solace from God, not from material things that will only bring your physical body enjoyment, not your soul. Find those things that will bring your soul enjoyment and live with those things. Find joy from nature. Find peace from your brothers and sisters in God. Find love of those things that you have forgotten. Find God in all things. God is showing his people that there are many things that will be happening in the near future – things that his children must be prepared for. They must learn to listen to what their Father is telling them to do – to not only those things that you're aware of, but other things, things you're not aware of: things that are happening in the universe, things that are happening on this planet, and things that are happening to his children. We have spoken of the building blocks of the universe, but there are other building blocks that mankind has not even imagined.
